CONTRIBUTORS	vii
PREFACE	ix
CONTENTS OF VOLUME 2	xi
PART 1 - CONDITIONING AND LIKELIHOOD	1
What Is the Likelihood Function?	3
<i>M. J. Bayarri, M. H. DeGroot, and J. B. Kadane</i>	
Discussion - <i>L. Mark Berliner</i>	17
Discussion - <i>Ronald Butler</i>	21
Reply to Discussion	27
The Relevance of Stopping Rules in Statistical Inference	29
<i>James O. Berger and Donald A. Berry</i>	
Discussion - <i>Robert Keener</i>	49
Discussion - <i>Adam T. Martinsek</i>	57
Discussion - <i>Carl N. Morris</i>	62
Reply to Discussion	64
Conditionally Acceptable Frequentist Solutions	73
<i>George Casella</i>	
Discussion - <i>James O. Berger</i>	85
Discussion - <i>James V. Bondar</i>	91
Discussion - <i>Bruce G. Lindsay</i>	94
Discussion - <i>Mark J. Schervish</i>	99
Discussion - <i>Robert L. Wolpert</i>	104
Reply to Discussion	111
On the Validity of the Likelihood Principle	119
<i>Bruce M. Hill</i>	
Resampling Generated Likelihoods	133
<i>S. M. Ogbonmwan and Henry P. Wynn</i>	
PART 2 - BAYES AND EMPIRICAL BAYES ANALYSIS	149
Bayesian Linear Probabilistic Classification	151
<i>José M. Bernardo</i>	
Bayesian Numerical Analysis	163
<i>Persi Diaconis</i>	
Estimating Logistic Regression Probabilities	177
<i>Diane E. Duffy and Thomas J. Santner</i>	
Bayes and Empirical Bayes Analysis in Multistage Sampling	195
<i>Malay Ghosh and Parthasarathi Lahiri</i>	
Empirical Bayes Rules for Selecting the Best Binomial Population	213
<i>Shanti S. Gupta and TaChen Liang</i>	

A Bayesian Treatment of Multivariate Normal Data with Observations Missing at Random <i>Joseph B. Kadane and Ramona L. Trader</i>	225
Causality Assessment for Adverse Drug Reactions: An Application of Subjective Probability to Medical Decision Making <i>David A. Lane</i>	235
Determining the Accuracy of Bayesian Empirical Bayes Estimates in the Familiar Exponential Families <i>Carl Morris</i>	251
The U, V Method of Estimation <i>Herbert Robbins</i>	265
Some Results on Robustness in Testing <i>Herman Rubin</i>	271
PART 3 - DECISION-THEORETIC ESTIMATION	279
Shrinkage Estimators: Pseudo-Bayes Rules for Normal Mean Vectors <i>M. E. Bock</i>	281
The Differential Inequality of a Statistical Estimation Problem <i>Lawrence D. Brown</i>	299
Bayesian Estimation Subject to Minimality of the Mean of a Multivariate Normal Distribution in the Case of a Common Unknown Variance: A Case for Bayesian Robustness <i>Anirban DasGupta and Herman Rubin</i>	325
New Estimators for the Mean Vector of a Normal Distribution with Unknown Covariance Matrix <i>Leon Jay Gleser</i>	347
On Inadmissibility of Some Unbiased Estimates of Loss <i>Iain Johnstone</i>	361
Dominating Inadmissible Procedures Using Compromise Decision Theory <i>Peter J. Kempthorne</i>	381
On Estimating Characteristic Roots in a Two-Sample Problem <i>Pui Lam Leung and Robb J. Muirhead</i>	397
On Admissible Estimation in Exponential Families with Imprecise Information <i>Madan L. Puri and Stefan S. Ralescu</i>	403
Estimated Loss and Admissible Loss Estimators <i>Andrew L. Rukhin</i>	409
