## **SECTION I—DESCRIPTIVE STATISTICS**

<b>Chapter 1 The Definition of Statistical Analysis</b>	<b>2</b>
1.1 Introduction . . . . .	5
1.2 Definitions of common terms used in statistics . . . . .	6
1.3 Descriptive statistics . . . . .	9
1.4 Inferential statistics . . . . .	10
1.5 Lying with statistics . . . . .	10
1.6 A word to the student . . . . .	11
Chapter summary . . . . .	13
<b>Chapter 2 Basic Mathematical Concepts</b>	<b>17</b>
2.5 Introduction . . . . .	18
2.2 The grammar of mathematical notation . . . . .	19
2.3 Summation rules . . . . .	20
2.4 Types of numbers . . . . .	21
2.5 Types of scales . . . . .	22
2.6 Continuous and discontinuous scales . . . . .	26
2.7 Rounding . . . . .	27
2.8 Ratios, frequencies, proportions, and percentages . . . . .	29
Chapter summary . . . . .	34
<b>Chapter 3 Frequency Distributions</b>	<b>46</b>
3.1 Grouping of data . . . . .	47
3.2 Cumulative frequency and cumulative percentage distributions . . . . .	53
Chapter summary . . . . .	54

<b>Chapter 4 Graphing Techniques</b>	<b>64</b>
4.1 Introduction . . . . .	66
4.2 Misuse of graphing techniques . . . . .	66
4.3 Nominally scaled variables . . . . .	68
4.4 Ordinarily scaled variables . . . . .	69
4.5 Interval and ratio scaled variables . . . . .	70
4.6 Forms of frequency curves . . . . .	72
4.7 Pie charts . . . . .	73
4.8 Other graphic representations . . . . .	76
Chapter summary . . . . .	78
<b>Chapter 5 Percentiles</b>	<b>86</b>
5.1 Introduction . . . . .	87
5.2 Cumulative percentiles and percentile rank . . . . .	88
5.3 Percentile rank and reference group . . . . .	92
Chapter summary . . . . .	92
<b>Chapter 6 Measures of Central Tendency</b>	<b>99</b>
6.1 Introduction . . . . .	100
6.2 The arithmetic mean . . . . .	102
6.3 The median . . . . .	107
6.4 The mode . . . . .	108
6.5 Comparison of mean, median, and mode . . . . .	108
6.6 The mean, the median, and skewness . . . . .	109
Chapter summary . . . . .	110
<b>Chapter 7 Measures of Dispersion</b>	<b>116</b>
7.1 Introduction . . . . .	116
7.2 The range . . . . .	119
7.3 The interquartile range . . . . .	119
7.4 The mean deviation . . . . .	119
7.5 The variance ( $s^2$ ) and standard deviation ( $s$ ) . . . . .	121
7.6 Interpretation of the standard deviation . . . . .	126
Chapter summary . . . . .	127
<b>Chapter 8 The Standard Deviation and the Standard Normal Distribution</b>	<b>136</b>
8.1 Introduction . . . . .	136
8.2 The concept of standard scores . . . . .	136
8.3 The standard normal distribution . . . . .	137
8.4 Illustrative problems . . . . .	139
8.5 The standard deviation as an estimate of error . . . . .	143
8.6 The coefficient of variation . . . . .	144
Chapter summary . . . . .	145

<b>Chapter 9 Correlation</b>	<b>152</b>
9.1 The concept of correlation . . . . .	153
9.2 Pearson $r$ and $z$ -scores . . . . .	155
9.3 Calculation of Pearson $r$ . . . . .	156
9.4 A word of caution . . . . .	159
9.5 Ordinally scaled variables and $r_{\text{rho}}$ . . . . .	162
Chapter summary . . . . .	164
<b>Chapter 10 Regression and Prediction</b>	<b>175</b>
10.1 Introduction to prediction . . . . .	175
10.2 Linear regression . . . . .	176
10.3 Residual variance and standard error of estimate . . . . .	182
10.4 Explained and unexplained variation . . . . .	185
10.5 Correlation and causation . . . . .	187
Chapter summary . . . . .	191
Review of Section I: Descriptive statistics . . . . .	198
<b>SECTION II—INFERENTIAL STATISTICS</b>	
<b>A. Parametric Tests of Significance</b>	<b>201</b>
<b>Chapter 11 Probability</b>	<b>202</b>
11.1 An introduction to probability theory . . . . .	202
11.2 The concept of randomness . . . . .	204
11.3 Approaches to probability . . . . .	206
11.4 Formal properties of probability . . . . .	208
11.5 Probability and continuous variables . . . . .	217
11.6 Probability and the normal curve model . . . . .	217
11.7 One- and two-tailed $p$ values . . . . .	219
Chapter summary . . . . .	221
<b>Chapter 12 Introduction to Statistical Inference</b>	<b>231</b>
12.1 Why sample? . . . . .	231
12.2 The concept of sampling distributions . . . . .	232
12.3 Binomial distribution . . . . .	234
12.4 Testing statistical hypotheses: level of significance . . . . .	239
12.5 Testing statistical hypotheses: null hypothesis and alternative hypothesis . . . . .	241
12.6 Testing statistical hypotheses: the two types of error . . . . .	242
Chapter summary . . . . .	244
<b>Chapter 13 Statistical Inference and Continuous Variables</b>	<b>248</b>
13.1 Introduction . . . . .	248
13.2 Sampling distribution of the mean . . . . .	250

<b>13.3</b>	Testing statistical hypotheses: parameters known . . . . .	252
<b>13.4</b>	Estimation of parameters: point estimation . . . . .	254
<b>13.5</b>	Testing statistical hypotheses with unknown parameters: Student's <i>t</i> . . . . .	256
<b>13.6</b>	Estimation of parameters: interval estimation . . . . .	259
<b>13.7</b>	Confidence intervals and confidence limits . . . . .	260
<b>13.8</b>	Test of significance for Pearson <i>r</i> , one-sample case . . . . .	262
	Chapter summary . . . . .	265
<b>Chapter 14</b>	<b>Statistical Inference with Two Independent Samples</b>	<b>270</b>
<b>14.1</b>	Sampling distribution of the difference between means . . . . .	271
<b>14.2</b>	Estimation of $\sigma_{\bar{X}_1 - \bar{X}_2}$ from sample data . . . . .	272
<b>14.3</b>	Testing statistical hypotheses: Student's <i>t</i> . . . . .	273
<b>14.4</b>	The <i>t</i> -ratio and homogeneity of variance . . . . .	276
	Chapter summary . . . . .	277
<b>Chapter 15</b>	<b>Statistical Inference with Correlated Samples</b>	<b>283</b>
<b>15.1</b>	Introduction . . . . .	285
<b>15.2</b>	Standard error of the difference between means for correlated groups . . . . .	285
<b>15.3</b>	The direct-difference method: Student's <i>t</i> -ratio . . . . .	288
<b>15.4</b>	Sandler's <i>A</i> -statistic . . . . .	289
	Chapter summary . . . . .	290
<b>Chapter 16</b>	<b>An Introduction to the Analysis of Variance</b>	<b>297</b>
<b>16.1</b>	Multigroup comparisons . . . . .	297
<b>16.2</b>	The concept of sums of squares . . . . .	298
<b>16.3</b>	Obtaining variance estimates . . . . .	301
<b>16.4</b>	Fundamental concepts of analysis of variance . . . . .	302
<b>16.5</b>	An example involving three groups . . . . .	302
<b>16.6</b>	The interpretation of <i>F</i> . . . . .	304
<b>16.7</b>	Within-group variance and homogeneity . . . . .	306
	Chapter summary . . . . .	306
<b>SECTION II—INFERRENTIAL STATISTICS</b>		
	<b>B. Nonparametric Tests of Significance</b>	<b>313</b>
<b>Chapter 17</b>	<b>Statistical Inference with Categorical Variables</b>	<b>315</b>
<b>17.1</b>	Introduction . . . . .	315
<b>17.2</b>	The binomial test . . . . .	316
<b>17.3</b>	Normal curve approximation to binomial values . . . . .	318
<b>17.4</b>	The $\chi^2$ one-variable case . . . . .	319

17.5 The $\chi^2$ test of the independence of categorical variables . . . . .	321
17.6 Limitations in the use of $\chi^2$ . . . . .	324
Chapter summary . . . . .	325
<b>Chapter 18 Statistical Inference with Ordinally Scaled Variables</b>	<b>330</b>
18.1 Introduction . . . . .	330
18.2 Mann-Whitney <i>U</i> -test . . . . .	330
18.3 Nonparametric tests involving correlated samples . . . . .	333
18.4 The sign test . . . . .	334
18.5 Wilcoxon matched-pairs signed-rank test . . . . .	335
Chapter summary . . . . .	337
Review of Section II—Inferential Statistics . . . . .	340
<b>References</b>	<b>342</b>
<b>Appendices</b>	<b>A1</b>
I. Review of basic mathematics . . . . .	A2
II. Glossary of symbols . . . . .	A10
III. Glossary of terms . . . . .	A15
IV. List of formulas . . . . .	A19
V. Tables . . . . .	A23
<b>Answers to Selected Exercises</b>	<b>Ans 1</b>
