Contents

1 INTRODUCTION 1

1.1 Sample and Population, 1
1.2 Order of Chapters, 2
References, 4

2 EMPIRICAL DISTRIBUTIONS AND DESCRIPTIVE MEASURES 5

2.1 Introduction, 5
2.2 Empirical Distributions, 6
2.3 Pictorial Representations of Empirical Distributions, 9
2.4 Descriptive Measures, 15
References, 24
Exercises, 24

3 PROBABILITY THEORY—GENERAL 32

3.1 Introduction and Definition, 32
3.2 Compound Events, 34
3.3 A Further Concept of Probability, 35
3.4 Conditional Probability, 36
3.5 Theorems on Probabilities, 38
3.6 Random Variables, 42
3.7 Cumulative Distribution Functions, 43
3.8 Probability Density Functions, 46
3.9 Joint Distributions, 47
3.10 Independence, 47

3.11 The Binomial Distribution, 48
3.12 The Multinomial Distribution, 49
3.13 Expected Values, 50
3.14 Moments, 53
3.15 Standardization, 55
3.16 Correlation, 56
3.17 Chebyshev's Inequality, 61
3.18 Moment Generating Functions, 62
References, 64
Exercises, 64

4 DISCRETE DISTRIBUTIONS 71

4.1 Introduction, 71
4.2 Binomial Distribution, 71
4.3 The Poisson Distribution, 79
4.4 The Hypergeometric Distribution, 82
4.5 A Comparison of the Binomial, Poisson, and Hypergeometric Distributions, 85
4.6 The Multinomial Distribution, 86
4.7 The Rectangular Distribution (Discrete), 87
4.8 The Negative Binomial as a Compound Poisson Distribution, 88
4.9 Some other Distributions, 91
References, 95
Exercises, 96

5 CONTINUOUS DISTRIBUTIONS 100

5.1 Introduction, 100
5.2 The Normal (Gaussian) Distribution, 100
5.3 The Rectangular Distribution, 109
5.4 The Exponential Distribution, 110
5.5 The Weibull Distribution, 112
5.6 Some Useful Distributions, 114
5.7 The Chi-Square Distribution, 118
5.8 The "Student's" t-Distribution, 119
5.9 The F-Distribution, 123
5.10 Modified Distributions, 124
5.11 Joint Distributions, 129
5.12 Transformation of Variables, 133
5.13 Derivation of the χ^2 Distribution, 136

5.14 Fitting a Distribution to Observed Data, 139
5.15 Interpolation, 143
References, 148
Exercises, 149

6 ORDER STATISTICS 155

6.1 Introduction, 155
6.2 Definitions, 155
6.3 Distribution of Least and Greatest Sample Values, 156
6.4 Distribution of Order Statistics from Random Samples, 157
6.5 Tolerance Distributions, 161
6.6 Some Large-Sample Approximations, 163
6.7 Distribution of Range, 166
6.8 Discrete Variables, 168
6.9 Some Approximate Results for Normal Distributions, 170
References, 174
Exercises, 175

7 TESTING AND ESTIMATION 179

7.1 Introduction, 179
7.2 Point Estimation, 180
7.3 Estimation by Maximum Likelihood, 184
7.4 Estimation by Confidence Intervals, 187
7.5 Tests of Significance, 195
7.6 Likelihood Ratio Tests, 203
7.7 Uniformly Most Powerful Tests, 206
7.8 Likelihood Ratio Tests of Composite Hypotheses, 207
References, 208
Exercises, 208

8 SOME STANDARD TESTS OF SIGNIFICANCE 213

8.1 Introduction, 213
8.2 Illustrations of Tests of Significance, 213
8.3 A Significance Test Procedure, 215
8.4 Tests of Significance on the Variance of Normal Distributions, 219

8.5 Tests of Significance on Means of Normal Distributions, 223
8.6 Summary of Some Standard Significance Tests, 231
8.7 Significance Tests for the Binomial Distribution, 231
8.8 Confidence Intervals and Significance Tests for the parameter, θ, of the Poisson Distribution, 235
8.9 The χ^2 ("Chi-Square") Test, 236
8.10 Rejection of Outliers, 242
8.11 "Noncentral" Distributions, 244
References, 248
Exercises, 248

9 NONPARAMETRIC TESTS 255

9.1 Robustness, 255
9.2 Distribution-Free Methods, 256
9.3 Nonparametric Methods, 258
9.4 Outline of Remainder of Chapter, 259
9.5 Tests Based on Signs, 260
9.6 Wilcoxon's and Allied Tests, 264
9.7 Bivariate Techniques, 272
9.8 Tolerance Regions and Probability Integral Transformation, 278
9.9 Estimation of Cumulative Distribution Functions, 284
9.10 Confidence Intervals for Percentiles, 287
9.11 Matched Pairs, 289
9.12 Power, 289
9.13 Probability Paper, 290
9.14 Concluding Remarks, 291
References, 291
Exercises, 292

10 CONTROL CHARTS 298

10.1 Introduction, 298
10.2 The Shewhart Control Charts, 299
10.3 Geometric Moving Average, 316
10.4 Acceptance Control Charts, 318
10.5 Cumulative Sum Control Charts (CSCC), 320
10.6 Average Run Length, 340
10.7 Sampling Inspection, 342
10.8 Multivariate Control Charts, 347

References, 348
Exercises, 349

11 ANCILLARY QUANTITIES 357

11.1 Introduction, 357
11.2 Forms of Ancillary Quantities, 358
11.3 The Distribution Function $F_i(x)$, 359
11.4 Prior Probabilities, 361
11.5 Decisions and Loss Functions, 364
11.6 Sampling Costs, 367
References, 371
Exercises, 371

12 REGRESSION AND CORRELATION 377

12.1 Introduction, 377
12.2 Simple Linear Regression, 382
12.3 Correlation, 399
12.4 Multiple Linear Regression, 413
12.5 Curvilinear Regression, 423
12.6 Additional Remarks on Regression and Correlation, 435
References, 437
Exercises, 437

APPENDIX 451

Table *A* Random Digits, 451
Table *B* Poisson Distribution, 455
Table *C* Cumulative Normal Distribution, 460
Table *D* Percentage Points (X) of the Normal Distribution, 462
Table *E* Percentage Points of the χ^2 Distribution, 464
Table *F* Percentage Points of Students' t-Distribution, 466
Table *G* Percentage Points of the F-Distribution, 467
Table *H* Moments and Percentage Points of the Distribution of the Range, 471
Table *I* Percentage Points of Studentized Range, 472
Table *J* Critical Values for Testing Outliers, 474
Table *K* Confidence Belts for Proportions, 475
Table *L* Confidence Limits for the Expected Value of a Poisson Distribution, 478
Table *M* Number of Observations for t-Test of Mean, 479

Table *N* Number of Observations for *t*-Test of Difference between Two Means, 481
Table *O* Number of Observations Required for the Comparison of a Population Variance with a Standard Value Using the χ^2 Test, 483
Table *P* Number of Observations Required for the Comparison of Two Population Variances Using the *F*-Test, 484
Table *Q* Significance Limits R_α for the Sign Test, 485
Table *R* Significance Limits for Tests Based on Runs, 486
Table *S* Tables of Critical Values for S_1, 488
Table *T* Approximate Significance Limits, $d_{1-\alpha}(n)$ of the Maximum Absolute Difference between Sample and Population Cumulative Distribution Functions, 493
Table *U* Normal Scores (Expected Values of Order Statistics from Normal Population $N(0, 1)$), 494
Table *V* Tolerance Factors for Normal Distribution, 495
Table *W* Confidence Intervals for the Median, 497
Table *X* Confidence Belts for the Correlation Coefficient, 498
Table *Y* Power Functions for ANOVA Tests, 499
Table *Z* Chart for Determining the Power Function of the *t*-Test, 502

SOLUTIONS OF SELECTED EXERCISES 503
