

Table of Contents

Preface	VII
1. Topological Foundations	
1.1 Manifolds and Differentiable Manifolds	1
1.2 Homotopy of Maps. The Fundamental Group	3
1.3 Coverings	7
1.4 Global Continuation of Functions on Simply-Connected Manifolds	15
2. Differential Geometry of Riemann Surfaces	
2.1 The Concept of a Riemann Surface	19
2.2 Some Simple Properties of Riemann Surfaces	21
2.3 Metrics on Riemann Surfaces	22
2.3.A Triangulations of Compact Riemann Surfaces	33
2.4 Discrete Groups of Hyperbolic Isometries. Fundamental Polygons. Some Basic Concepts of Surface Topology and Geometry	40
2.4.A The Topological Classification of Compact Riemann Surfaces	53
2.5 The Theorems of Gauss-Bonnet and Riemann-Hurwitz	56
2.6 A General Schwarz Lemma	64
2.7 Conformal Structures on Tori	72
3. Harmonic Maps	
3.1 Review: Banach and Hilbert Spaces. The Hilbert Space L^2 .	79
3.2 The Sobolev Space $W^{1,2} = H^{1,2}$	91
3.3 The Dirichlet Principle. Weak Solutions of the Poisson Equation	99
3.4 Harmonic and Subharmonic Functions	103
3.5 The C^α -Regularity Theory	110
3.6 Maps Between Surfaces. The Energy Integral. Definition and Simple Properties of Harmonic Maps	117
3.7 Existence of Harmonic Maps	123
3.8 Regularity of Harmonic Maps	132

3.9	Uniqueness of Harmonic Maps	146
3.10	Harmonic Diffeomorphisms	151
3.11	Metrics and Conformal Structures	160
4.	Teichmüller Spaces	
4.1	The Basic Definitions	167
4.2	Harmonic Maps, Conformal Structures and Holomorphic Quadratic Differentials. Teichmüller's Theorem	169
4.3	Fenchel-Nielsen Coordinates. An Alternative Approach to the Topology of Teichmüller Space	179
4.4	Uniformisation of Compact Riemann Surfaces	191
5.	Geometric Structures on Riemann Surfaces	
5.1	Preliminaries: Cohomology and Homology Groups	203
5.2	Harmonic and Holomorphic Differential Forms on Riemann Surfaces	211
5.3	The Periods of Holomorphic and Meromorphic Differential Forms	219
5.4	Divisors. The Riemann-Roch Theorem	225
5.5	Holomorphic 1-Forms and Metrics on Compact Riemann Surfaces	236
5.6	Divisors and Line Bundles	238
5.7	Projective Embeddings	247
5.8	Algebraic Curves	254
5.9	Abel's Theorem and the Jacobi Inversion Theorem	267
5.10	Elliptic Curves	274
	Sources and References	281
	Bibliography	283
	Index of Notation	285
	Index	287
