CONTENTS

Preface to the Third Edition v
Preface to the First Edition vi

1 SOME BASIC CONCEPTS 1

1.1 A Simple Statistical Investigation *1,* 1.2 How the Book Is Organized *4,* 1.3 A Note on the Next Section *4,* 1.4 Types of Characteristics and Simple Tables *5,* 1.5 Where We Stand *14,* 1.6 Problems for Review *15*

PART 1 SUMMARIZING AND DESCRIBING UNIVARIATE DISTRIBUTIONS 17

2 MEASURES ESPECIALLY APPROPRIATE TO ATTRIBUTES 19

2.1 Ungrouped or Raw Data *20,* 2.2 Grouping the Observations *21,* 2.3 The Problem of Nonresponse or Missing Observations *22,* 2.4 The Size of a Table *24,* 2.5 Ratios, Proportions and Percentages, and Rates *25,* 2.6 Another Kind of Summary: The Modal Category *31,* 2.7 Where We Stand *32,* 2.8 Problems for Review *33*

3 MEASURES ESPECIALLY APPROPRIATE TO ORDINAL VARIABLES 35

3.1 How Ordinal Variables Arise *35,* 3.2 Numbers and Ordinal Observations *38,* 3.3 Cumulated Frequencies or Proportions *40,* 3.4 Cumulated Percentages: The Percentile *43,* 3.5 Ordinal Measurement and Conventional Scales *45,* 3.6 Where We Stand *46,* 3.7 Problems for Review *46*

4 MEASURES ESPECIALLY APPROPRIATE TO INTERVAL DATA 48

4.1 The Array *48,* 4.2 The Table: Grouping Interval Data *49,* 4.3 Intervals, Limits, and Midpoints *51,* 4.4 Types of Distributions *55,* 4.5 Use of the Computation Designs *58,* 4.6 The Normal Distribution *61,* 4.7 Where We Stand *61,* 4.8 Problems for Review *62*

5 MEASURES OF CENTRAL TENDENCY AND DISPERSION 65

5.1 Measures of Central Tendency *65,* 5.2 Uses and Interpretations of the Mode, Median, and Mean *76,* 5.3 Measures of Dispersion *79,*

5.4 The Normal Curve *88*, 5.5 Where We Stand *92*, 5.6 Problems for Review *92*

PART II THE RELATIONSHIP BETWEEN TWO OR MORE CHARACTERISTICS 95

6 THE BIVARIATE TABLE 99

6.1 The Origin of a Bivariate Frequency Distribution *99*, 6.2 The General Form of a Bivariate Table *102*, 6.3 Summarizing the Information in a Bivariate Table *104*, 6.4 The Concept of Relationship *107*, 6.5 The Basic Rules for Percentaging Tables *107*, 6.6 The Symmetric Interpretation of a Bivariate Table *110*, 6.7 Bivariate Distributions Presented in Summary Form *110*, 6.8 Where We Stand *111*, 6.9 Problems for Review *112*

7 THE BIVARIATE TABLE: INTERVAL VARIABLES 115

7.1 Graphing a Bivariate Distribution *115*, 7.2 The Basic Idea of Regression *118*, 7.3 Examples of Curvilinear Regression *122*, 7.4 Linear Regression and the Conditional Distributions of Y Given X *123*, 7.5 Estimating the Regression Constants: The Principle of Least Squares *126*, 7.6 Computation of a and b from Raw or Ungrouped Data *127*, 7.7 The Standard Error of Estimate *129*, 7.8 Correlation *132*, 7.9 Points to Remember in Interpreting Correlation or Amount of Relationship *135*, 7.10 Where We Stand *137*, 7.11 Problems for Review *137*

8 THE BIVARIATE TABLE: ATTRIBUTES AND ORDERS 142

8.1 The Percent Difference and the Ratio of Percents as Measures of Association *144*, 8.2 Association Derived from Statistical Independence *145*, 8.3 The Special Case of the 2×2 Table *149*, 8.4 Association between Two Ordinal Variables *151*, 8.5 Relationship between an Attribute and an Interval Variable *163*, 8.6 Similarities in the Measures of Association: The 2×2 Table *168*, 8.7 Where We Stand *169*, 8.8 Problems for Review *170*

9 SELECTED MULTIVARIATE PROBLEMS 173

9.1 The General Form of the Multivariate Table *173*, 9.2 Ways to Account for the Observed Relationship between X and Y *175*, 9.3 The Basic Procedure: Holding a Third Variable Constant *181*, 9.4 A Formula for Multivariate Association *185*, 9.5 The Average Partial Table: Standardization and Partial Association *186*, 9.6 Interaction *190*, 9.7 Where We Stand *192*, 9.8 Problems for Review *196*

10 MULTIVARIATE ANALYSIS WITH INTERVAL VARIABLES 198

10.1 Accounting for Variation in *Y:* A Major Research Objective *199,* 10.2 Linear Multiple Regression *201,* 10.3 Multiple Correlation *202,* 10.4 Estimating the Coefficients in a Multiple Regression Equation *204,* 10.5 Determining the Importance of Independent Variables: A Summary *209,* 10.6 Reading a Correlation Matrix *210,* 10.7 Where We Stand *215,* 10.8 Problems for Review *215*

PART III INTRODUCTION TO STATISTICAL INFERENCE 217

11 THE ELEMENTS OF STATISTICAL INFERENCE 221

11.1 A Formal Statement of the Problem of Inference *221,* 11.2 The Two Basic Kinds of Sampling Error *223,* 11.3 Drawing Random Samples *225,* 11.4 The Sampling Distribution *228,* 11.5 Three Basic Standard Errors *234,* 11.6 Confidence Intervals: Large Sample Procedures *237,* 11.7 Tests of Hypotheses: Large Sample Procedures *241,* 11.8 The Power of a Test *247,* 11.9 Where We Stand *250,* 11.10 Problems for Review *250*

12 THE BINOMIAL SAMPLING DISTRIBUTION 253

12.1 The Concept of a Random Variable or Variate *254,* 12.2 The Joint Distribution of Two Random Variates: Samples of Size Two *256,* 12.3 Another Way to Present the Distribution of Random Variates *260,* 12.4 The Binomial Expansion *262,* 12.5 The Binomial as a Sampling Distribution *265,* 12.6 Using the Sampling Distribution to Test an Hypothesis *267,* 12.7 The Sign Test: An Application of Binomial Sampling Theory *276,* 12.8 Where We Stand *276,* 12.9 Problems for Review *277*

13 TESTS OF THE HYPOTHESIS OF ZERO ASSOCIATIONS 280

13.1 The Central Limit Theorem *281,* 13.2 The Chi-Square Test: Independence between Two Attributes *284,* 13.3 Fisher's Exact Test *291,* 13.4 The Kolmogorov-Smirnov Test: Independence between a Dichotomy and an Ordinal Variable *295,* 13.5 The Randomization Test: Independence between a Dichotomy and an Interval Variable *298,* 13.6 Testing the Significance of Tau: Independence between Two Ordinal Variables *303,* 13.7 Testing the Significance of r_{yx}: Independence between Two Interval Variables *303,* 13.8 Where We Stand *308,* 13.9 Problems for Review *309*

14 ANALYSIS OF VARIANCE 311

14.1 Control of Extraneous Variation through Random Assignment *312,* 14.2 Partitioning the Sum of Squares *315,* 14.3 The Summary Table and Its Interpretation *318,* 14.4 An Illustration of the Use of Analysis of Variance with Random Assignment *323,* 14.5 Where We Stand *326,* 14.6 Problems for Review *326*

15 ON SOME USES OF STATISTICAL ANALYSIS 329

15.1 Reliability and Validity through Statistical Analysis *330,* 15.2 Statistical Analysis and the Control of Extraneous Variation *334,* 15.3 Sequential Sampling *340,* 15.4 The Scientific Use of Statistical Analysis: A Note on Testing the Hypothesis of Zero Association *341,* 15.5 Where We Stand *347*

BIBLIOGRAPHY AND REFERENCES 348

APPENDIX 352

Table 1. Table of Square Roots *354,* Table 2. Probabilities That Given Values of *z* Will Be Exceeded *361,* Table 3. Table of Selected Critical Deviations of *F* *362,* Table 4. Table of Critical Values of Chi Square *363,* Table 5. A Page of Random Digits *364*
