

CONTENTS

<i>Preface</i>	iii
<i>Introduction</i>	ix
1 BAYESIAN INFERENCE FOR THE GENERAL LINEAR MODEL	1
Introduction	1
The Parametric Inference Problem	1
Bayes Theorem	2
Prior Information	3
Posterior Analysis	5
An Example	7
Inferences for the General Linear Model	8
Predictive Analysis	14
Summary and Guide to the Literature	18
Exercises	21
References	22
2 LINEAR STATISTICAL MODELS AND BAYESIAN INFERENCE	25
Introduction	25
Linear Statistical Models	26
Bayesian Statistical Inference	39
Summary	58
Exercises	58
References	60

3	THE TRADITIONAL LINEAR MODELS	65
	Introduction	65
	Prior Information	66
	Normal Populations	70
	Linear Regression Models	84
	Multiple Linear Regression	94
	Nonlinear Regression Analysis	104
	Some Models for Designed Experiments	117
	The Analysis of Two-Factor Experiments	123
	The Analysis of Covariance	134
	Comments and Conclusions	137
	Exercises	138
	References	140
4	THE MIXED MODEL	143
	Introduction	143
	The Prior Analysis	145
	The Posterior Analysis	147
	Approximations	150
	Approximation to the Posterior Distribution of σ^2	153
	Approximation to the Posterior Distribution of the Variance Components	154
	Posterior Inferences	155
	Summary and Conclusions	177
	Exercises	177
	References	178
5	TIME SERIES MODELS	181
	Introduction	181
	Autoregressive Processes	183
	Moving Average Models	187
	Autoregressive Moving Average Models	196
	The Identification Problem	203
	Other Time Series Models	207
	A Numerical Study of Autoregressive Processes Which Are Almost Stationary	216
	Exercises	232
	References	234
6	LINEAR DYNAMIC SYSTEMS	237
	Introduction	237
	Discrete Time Linear Dynamic Systems	238

Estimation	239
Control Strategies	244
An Example	251
Nonlinear Dynamic Systems	267
Adaptive Estimation	274
An Example of Adaptive Estimation	294
Summary	302
Exercises	303
References	305
7 STRUCTURAL CHANGE IN LINEAR MODELS	307
Introduction	307
Shifting Normal Sequences	308
Structural Change in Linear Models	315
Detection of Structural Change	346
Structural Stability in Other Models	351
Summary and Comments	369
Exercises	370
References	371
8 MULTIVARIATE LINEAR MODELS	375
Introduction	375
Multivariate Regression Models	376
Multivariate Design Models	384
The Vector Autoregressive Process	389
Other Time Series Models	400
Multivariate Models with Structural Change	410
Comments and Conclusions	425
Exercises	426
References	428
9 LOOKING AHEAD	431
Introduction	431
A Review of the Bayesian Analysis of Linear Models	431
Future Research	434
Conclusions	438
References	438
APPENDIX	
Introduction	441
The Univariate Normal	441
The Gamma	442

The Normal-Gamma	442
The Univariate t Distribution	443
The Multivariate Normal	443
The Wishart Distribution	444
The Normal-Wishart	444
The Multivariate t Distribution	445
The Poly- t Distribution	447
The Matrix t Distribution	448
Comments	449
References	449
<i>Index</i>	451
