

CONTENTS

Preface iii

1.	Fitting a Model to Data	1
1.1	Introduction	1
1.2	How to Fit a Line	3
1.3	Residuals	10
1.4	Transformations to Obtain Linearity	12
1.5	Fitting a Model Using Vectors and Matrices	16
1.6	Deviations from Means	21
1.7	An Example - Value of a Postage Stamp over Time	24
	Problems	28
2.	Goodness of Fit of the Model	30
2.1	Introduction	30
2.2	Coefficient Estimates for Univariate Regression	31
2.3	Coefficient Estimates for Multivariate Regression	32
2.4	ANOVA Tables	33
2.5	The F-Test	35
2.6	The Coefficient of Determination	36
2.7	Predicted Values of Y and Confidence Intervals	37
2.8	Residuals	41
2.9	Reduced Models	45
2.10	Pure Error and Lack of Fit	48
2.11	Example - Lactation Curve	50
	Problems	53
3.	Which Variables Should Be Included in the Model	56
3.1	Introduction	56
3.2	Orthogonal Predictor Variables	57
3.3	Linear Transformations of the Predictor Variables	60
3.4	Adding Nonorthogonal Variables Sequentially	61

3.5	Correlation Form	64	
3.6	Variable Selection - All Possible Regressions		68
3.7	Variable Selection - Sequential Methods	71	
3.8	Qualitative (Dummy) Variables	74	
3.9	Aggregation of Data	78	
	Problems	81	
4.	Peculiarities of Observations	84	
4.1	Introduction	84	
4.2	Sensitive, or High Leverage, Points		85
4.3	Outliers	86	
4.4	Weighted Least Squares	87	
4.5	More on Transformations	91	
4.6	Eigenvalues and Principal Components		93
4.7	Ridge Regression	96	
4.8	Prior Information	100	
4.9	Cleaning up Data	101	
	Problems	103	
5.	The Experimental Design Model	106	
5.1	Introduction	106	
5.2	What Makes an Experiment		107
5.3	The Linear Model	112	
5.4	Tests of Hypothesis	118	
5.5	Testing the Assumptions	120	
	Problems	123	
6.	Assessing the Treatment Means	126	
6.1	Introduction	126	
6.2	Specific Hypothesis		127
6.3	Contrasts	133	
6.4	Factorial Analysis	139	
6.5	Unpredicted Effects	144	
6.6	Conclusion	150	
	Problems	151	
7.	Blocking	153	
7.1	Introduction	153	
7.2	Structure of Experimental Units		154
7.3	Balanced Incomplete Block Designs		159
7.4	Confounding	165	
7.5	Miscellaneous Tricks	173	
	Problems	176	
8.	Extensions to the Model	182	
8.1	Introduction	182	
8.2	Hierarchic Designs	182	
8.3	Repeated Measures	190	
8.4	Covariance Analysis	192	
8.5	Unequal Replication	198	
8.6	Modelling the Data	204	
	Problems	207	

Appendix A. Review of Vectors and Matrices	212
A.1 Some Properties of Vectors	212
A.2 Some Properties of Vector Spaces	215
A.3 Some Properties of Matrices	217
Appendix B. Expectation, Linear and Quadratic Forms	219
B.1 Expectation	219
B.2 Linear Forms	219
B.3 Quadratic Forms	220
B.4 The F-Statistic	220
Appendix C. Data Sets	221
C.1 Ultra-Sound Measurements of Horses' Hearts	221
C.2 Ph Measurement of Leaf Protein	222
C.3 Lactation Records of Cows	223
C.4 Sports Cars	224
C.5 House Price Data	225
C.6 Computer Teaching Data	
C.7 Weedicide Data	227
References	229
Index	231
