

<b>Preface</b>	<i>page vii</i>
----------------	-----------------

## **PART I PRINCIPLES**

<b>1. Nature and objectives of statistical analysis</b>	<b>3</b>
1.1 Introduction	3
1.2 Data quality	4
1.3 Data structure and quantity	5
1.4 Phases of analysis	6
1.5 Styles of analysis	7
1.6 Computational and numerical analytical aspects	7
1.7 Response and explanatory variables	8
1.8 Types of investigation	10
1.9 Purposes of investigation	12
<b>2. Some general concepts</b>	<b>14</b>
2.1 Types of observation	14
2.2 Descriptive and probabilistic methods	15
2.3 Some aspects of probability models	17
<b>3. Some strategical aspects</b>	<b>20</b>
3.1 Introduction	20
3.2 Incorporation of related data and external information	20
3.3 Role of special stochastic models	21
3.4 Achievement of economical and consistent description	21
3.5 Attitudes to assumptions	23
3.6 Depth and complexity of analysis appropriate	24
3.7 Analysis in the light of the data	25
<b>4. Some types of statistical procedure</b>	<b>28</b>
4.1 Introduction	28
4.2 Formulation of models: generalities	28
4.3 Formulation of models: systematic component	29
4.4 Formulation of models: random component	33
4.5 Calculation of summarizing quantities	35

4.6 Graphical analysis	36
4.7 Significance tests	37
4.8 Interval estimation	39
4.9 Decision procedures	41
4.10 Examination of the adequacy of models	42
4.11 Parameters and parameterization	42
4.12 Transformations	46
4.13 Interaction	47
 <b>PART II EXAMPLES</b>	
<b>A Admissions to intensive care unit</b>	53
<b>B Intervals between adjacent births</b>	58
<b>C Statistical aspects of literary style</b>	63
<b>D Temperature distribution in a chemical reactor</b>	68
<b>E A 'before and after' study of blood pressure</b>	72
<b>F Comparison of industrial processes in the presence of trend</b>	77
<b>G Cost of construction of nuclear power plants</b>	81
<b>H Effect of process and purity index on fault occurrence</b>	91
<b>I Growth of bones from chick embryos</b>	95
<b>J Factorial experiment on cycles to failure of worsted yarn</b>	98
<b>K Factorial experiment on diets for chickens</b>	103
<b>L Binary preference data for detergent use</b>	107
<b>M Fertilizer experiment on growth of cauliflowers</b>	112
<b>N Subjective preference data on soap pads</b>	116
<b>O Atomic weight of iodine</b>	121
<b>P Multifactor experiment on a nutritive medium</b>	126
<b>Q Strength of cotton yarn</b>	131
<b>R Biochemical experiment on the blood of mice</b>	135
<b>S Voltage regulator performance</b>	139
<b>T Intervals between the failure of air-conditioning equipment in aircraft</b>	143
<b>U Survival times of leukemia patients</b>	148
<b>V A retrospective study with binary data</b>	151
<b>W Housing and associated factors</b>	155
<b>X Educational plans of Wisconsin schoolboys</b>	162
<b>Summary of examples</b>	165
<b>Further sets of data</b>	168
<b>References</b>	181
<b>Author index</b>	185
<b>Subject index</b>	187
