

CONTENTS

PREFACE	v
ACKNOWLEDGMENTS	vii
CHAPTER 1: INTRODUCTION	1
I. Categorical or Count Data	1
II. Contingency Tables	5
III. Examples	6
IV. Notations and Preliminaries	8
V. Investigations Associated with Contingency Tables	12
VI. General Remarks	16
CHAPTER 2: HYPOTHESES OF INDEPENDENCE IN TWO- AND THREE-WAY TABLES	23
I. Two-Way Tables	23
II. Three-Way Tables	27
CHAPTER 3: ANALYSIS BY FITTING MARGINALS	37
I. Loglinear Representation	37
II. Fitting Marginals, Internal Constraints Problem	40
III. The 2 x 2 Table	45
IV. Analysis of Information	51
V. The 2 x 2 x 2 x 2 Table	54
VI. The $r \times s \times t \times u$ Table	58
VII. Fitting Strategies	60
VIII. Algorithms to Calculate Quadratic Approximations	65
IX. Confidence Intervals	68
CHAPTER 4: APPLICATIONS	71
EXAMPLE 1. Multiway Contingency Table Analysis Applied to the Classification of Multivariate Dichotomous Populations	72
EXAMPLE 2. The Analysis of Leukemia Death Observations at Atomic Bomb Casualty Commission	96
EXAMPLE 3. Automobile Accident Data—Driver Ejection	112
EXAMPLE 4. Classification of Minnesota High School Graduates of June 1938	118

EXAMPLE 5. Coronary Heart Disease Risk	131
EXAMPLE 6. Hospital Data	148
EXAMPLE 7. Partitioning Using OUTLIERS	163
EXAMPLE 8. Association Between Smoking and Lung Cancer	166
EXAMPLE 9. Zero Marginals	173
CHAPTER 5: ANALYSIS: GENERAL FORM	181
I. General Linear Hypothesis	181
II. Examples: External Constraints Problem (ECP)	182
III. General Formulation and MDI Analysis (Single Sample Case)	191
IV. Numerical Example (Fisher's Data)	196
V. General Formulation and MDI Analysis (k-Samples)	199
VI. An Elementary Example	205
VII. Minimum Modified Chi-Square Estimation	207
CHAPTER 6: COMPUTER ALGORITHMS	211
I. Introduction	211
II. Chi-Square Table	213
III. Iteration, Marginal Fitting Algorithm	214
IV. GOKHALE	217
V. DARRAT	219
CHAPTER 7: NO INTERACTION ON A LINEAR SCALE	225
I. No Linear Interaction	225
II. Three-Way Table: General Formulation	227
III. The 2 x 2 x 2 Table	228
IV. The 4 x 2 x 2 Table	236
CHAPTER 8: FURTHER APPLICATIONS	245
EXAMPLE 1. Gail's Data	246
EXAMPLE 2. Discrete Distributions	251
EXAMPLE 3. Marginal Homogeneity of an $r \times r$ Contingency Table	254
EXAMPLE 4. Several Samples, Incomplete Data	258
EXAMPLE 5. Specified Loglinear Representation	265
EXAMPLE 6. Four Point Bioassay-Fit of Logistic Function	267
EXAMPLE 7. Respiratory Data	272
EXAMPLE 8. Injury Producing Accidents	309
BIBLIOGRAPHY	319
