	Preface	v
1.	EQUATION ERROR FORMULATION OF PARAMETER ESTIMATION PROBLEMS	1
	1.1 Introduction	1
	1.2 Equation Error Identification Systems	5
	1.3 Applications	12
	1.4 Outline of Contents of the Book	35
	Problems	39
	References	53
2.	LEAST-SQUARES PARAMETER ESTIMATION	55
	2.1 Introduction	55
	2.2 Formulation and Statement of the Estimation Problem	56
	2.3 Solution for the Generalized Least-Squares Estimate	64
	2.4 Applications	68
	2.5 Some Properties of Generalized Least Squares and Least-Squares Parameter Estimates	74
	2.6 Choice of L	88

2.7	Sequential Generalized Least-Squares Estimation	90
2.8	A Technique for Sequential Startup of the Sequential Generalized Least-Squares Algorithm	101
2.9	Generalizations to Vector Measurements	107
2.10	Sequential and Simultaneous Data Processing	111
2.11	Analyses of the Sequential Generalized Least-Squares Algorithm	118
2.12	Computational Aspects of Generalized Least-Squares Estimation	126
2.13	Applicability of Generalized Least-Squares Parameter Estimation Algorithms	130
	Problems	133
	References	142
3.	MINIMUM-VARIANCE PARAMETER ESTIMATION	145
3.1	Introduction	145
3.2	Formulation and Statement of the Estimation Problem	145
3.3	Implication of the Unbiasedness Constraint	148
3.4	Computation of Unbiased, Minimum-Variance $F(k)$	150
3.5	Comparison of Unbiased Minimum-Variance and Generalized Least-Squares Estimates	153
3.6	Some Properties of Unbiased Minimum-Variance Parameter Estimates	154
3.7	Sequential Unbiased Minimum-Variance Estimation	157
3.8	Relationship of Sequential Unbiased Minimum-Variance Estimation to Discrete Kalman Filtering	159
3.9	Relationship of Unbiased Minimum-Variance Estimation to Maximum-Likelihood Estimation	164
3.10	Sensitivity Considerations	166
3.11	Computational Aspects of Unbiased Minimum-Variance Estimation	170
3.12	Applicability of Unbiased Minimum-Variance Parameter Estimation Algorithms	173
	Problems	175
	References	178

4.	DETERMINISTIC-GRADIENT PARAMETER ESTIMATION	180
4.1	Introduction	180
4.2	Formulation, Statement, and Solution of the Estimation Problem	181
4.3	Convergence: Contraction Mapping Approach	189
4.4	Convergence: Stability Theory Approach	193
4.5	Orthogonality of Parameter Estimation Error and Input Vectors	204
4.6	An Optimum Choice for the Weighting Matrix $R(k)$	208
4.7	Applications	210
4.8	Computational Considerations	215
4.9	Applicability of Deterministic-Gradient Parameter Estimation Algorithms	216
	Problems	217
	References	221
5.	STOCHASTIC-GRADIENT PARAMETER ESTIMATION	224
5.1	Formulation and Statement of the Estimation Problem	224
5.2	Three Types of Stochastic Identification Problems	229
5.3	A Stochastic-Gradient Algorithm: First Attempt	233
5.4	A Stochastic-Gradient Algorithm: Second Attempt	238
5.5	Convergence	242
5.6	Identification of Coefficients in Finite-Difference Equations	253
5.7	Rate of Convergence and Choice of $R(k)$	267
5.8	Computational Considerations	269
5.9	Applicability of Unbiased Stochastic-Gradient Parameter Estimation Algorithms	271
	Problems	272
	References	280
6.	ESTIMATION OF TIME-VARYING PARAMETERS	283
6.1	Introduction	283
6.2	Estimation from Type-A Information	288

6.3	Estimation from Type-B Information	291
6.4	Estimation from Type-C Information	300
	Problems	315
	References	318
Appendix A	REPRESENTATIONS OF ABSTRACT DIGITAL SYSTEMS	320
Appendix B	DISCRETE-TIME REPRESENTATIONS OF CONTINUOUS-TIME SYSTEMS	325
	B.1 Continuous-Time State Space Representation	325
	B.2 Discrete-Time State Space Representations of Continuous-Time Systems	329
	B.3 Finite-Difference Equation Representations of Continuous-Time Systems	333
	References	338
Appendix C	PARAMETER TRANSFORMATION MATRICES	340
	C.1 The Matrix $\Lambda(\hat{\theta})$ for an Abstract Digital System	341
	C.2 The Matrix $\Lambda(\hat{\theta})$ for a Discrete-Time Representation of a Continuous-Time System	344
Appendix D	LYAPUNOV'S MAIN STABILITY THEOREM: STATEMENT AND PROOF	351
Appendix E	SOME FACTS ABOUT CONDITIONAL EXPECTATIONS	357
Appendix F	VENTER'S THEOREM	361
Appendix G	UPPER BOUND ON $\overline{\ \tilde{\theta}(k + \ell)\ ^2}$	367
AUTHOR INDEX	375
SUBJECT INDEX	379
