<b>Preface</b>	viii
<b>1 General introduction</b>	<b>1</b>
1.1 Introduction	1
1.2 Latent variables and latent variable models	2
1.3 The role of models	4
1.4 The general latent model	5
1.5 A simple latent variable model	6
1.6 Estimation and goodness-of-fit	8
1.7 Path diagrams	10
1.8 Summary	11
<b>2 Factor analysis</b>	<b>13</b>
2.1 Introduction	13
2.2 Explanatory and confirmatory factor analysis	13
2.3 The factor analysis model	14
2.4 Identifiability of the factor analysis model	16
2.5 Estimating the parameters in the factor analysis model	18
2.6 Goodness-of-fit tests	21
2.7 Rotation of factors	22
2.8 Numerical examples	26
2.9 Confirmatory factor analysis	30
2.10 Summary	31
<b>3 The LISREL model</b>	<b>32</b>
3.1 Introduction	32
3.2 The LISREL model	34
3.3 Identification	36
3.4 Estimating the parameters in the LISREL model	37

3.5	Instrumental variables	38
3.6	Numerical examples	41
3.7	Assessing goodness-of-fit	59
3.8	Multigroup analysis	63
3.9	Summary	71
<b>4</b>	<b>Latent variable models for categorical data</b>	<b>72</b>
4.1	Introduction	72
4.2	Factor analysis of binary variables	72
4.3	Latent structure models	76
4.4	Summary	87
<b>5</b>	<b>Some final comments</b>	<b>89</b>
5.1	Introduction	89
5.2	Assessing the fit of latent variable models by cross-validation procedures	89
5.3	Latent variables – fact or fiction ?	92
5.4	Summary	92
<b>Appendix A</b>		
Estimating the parameters in latent variable models; a brief account of computational procedures		94
<b>Appendix B</b>		
Computer programs for latent variable models		96
<b>Exercises</b>		98
<b>References</b>		101
<b>Index</b>		105
