CONTENTS OF VOLUME 2

On Methods of Structure Identification for a Class of Nonlinear Mechanical Systems 637
H.G. NATKE, M. ZAMIROWSKI

Spectral Expression of Information Measures for Discrimination and Stochastic Simplification 643
S. SUGIMOTO, M. FIJITA

Two Algorithms for Model Structure Determination of Nonlinear Dynamic Systems with Applications to Industrial Processes 649
M. KORTMANN, H. UNBEHAUEN

Application of AR and ARMA Model Identification Methods in Spectral Analysis of Nuclear Reactor Noise Processes 657
L. KEVICZKY, J. BOKOR, S. VERES, I. NAGY

System Structure Identification by Sets of Observation Data on the Base of Unbiasness Principle 663
A.G. IVAKHNENKO, YU.P. YURACHKOVSKY

Structural Instability of Nonlinear Model Fittering Criteria 667
A. VAN DEN BOS

Cross-validation Ideas in Model Structure Selection for Multivarialbe Systems 671
P. JANSSEN, P. STOICA, T. SÖDERSTRÖM, P. EYKHOFF

Model Reduction using Impulse Energy 677
S. ZHANG, Y. CAO, A. VAN CAUWENBERGHE

Model Reduction of Estimated Models 683
B. WAHLBERG

A Hankel-norm Approach to Approximate Recursive Estimation 689
A. GOMBANI, M. PAVON

A Geometric Approach to System Identification using Model-reduction Techniques 695
B. HANZON

Balanced Parametrizations and Canonical Forms for System Identification 701
J.M. MACIEJOWSKI, R.J. OBER

A New On-line Structure Selection Algorithm for MIMO State Space Model 709
WU XIUJING, ZHANG ZHONGJUN, WANG YUZHONG, ZHUANG SONGXIN

A Criterion Based Approach to Parametrization and Identification of Multivariable Systems 715
P. VAN DEN HOF

New Tools in Rational Approximation 721
L. BARATCHART, M. OLIVI

An Algorithm for Simultaneous Order and Parameter Identification in Multivariable Systems 727
S. BINGULAC, R.V. KRTOLICA

On the Limits of Order Estimation 733
J. SCHOUKENS, R. PINTELON

Order Determination and Parameter Estimation of Continuous-time Systems 739
S. SAGARA, K. YUAN, K. WADA

A Multiobjective Decision Making Method for Determining Model's Order 745
Z.F. ZHANG, Z.G. HUANG, L.Q. HU

Identification of Stochastic Feedback Control Systems 751
L. GUO, CHEN HAN-FU, J.F. ZHANG

On-line Model Order Determination and Parameter Estimation 757
T.S. NG

A Comparison of Criteria for Autoregressive Order Selection 763
P.M.T. BROERSEN

Robust PrOtection-time Delay Tracing Adaptive Control and its Application 769
XU HONGYAO

Mixture Reduction Algorithms for Uncertain Tracking 775
D.J. SALMOND, D.P. ATHERTON, J.A. BATHER

New Recursive Smoothing Algorithms for Bernoulli-Gaussian Input Sequence 781
LI-XING WANG, GUAN-ZHONG DAI

Adaptive Stepsize Control in Stochastic Approximation Algorithms 787
G.CH. PFLUG

An Efficient QR-decomposition Algorithm for Block-Toeplitz and Block-Hankel Matrices 793
N.D. CRISTOV, P.HR. PETKOV, M.M. KONSTANTINOV

A New Algorithm of the Recursive Generalized Least-squares Method 797
I.N. VUCHKOV, L.N. BOYADJIEVA

Optimal Rubust Transformation for Nonlinear State Estimation Procedures of Stochastic Approximation Type 803
K. UOSAKI, Y. KOKETSU

Robust Parameter Estimation for Linear Models with Set-membership Uncertainty 809
G. BELFORTE, R. TEMPO, A. VICINO

Robust Identification and Adaptive Control for Stochastic Systems 815
CHEN HAN-FU, L. GUO

Robust Estimation and Prediction using ARMA Models: A Nonstatistical Approach 821
R. TEMPO, B.R. BARMISH, J. TRUJILLO

Robust Recursive Output Error Method for Bilinear System Identification 827
H. DAI, N.K. SINHA

Results on Robustness of Pole Location in Perturbed Systems 833
A. VICINO

State Estimation in Regulating a Harvested Population 839
D.J. BALLANCE, O.L.R. JACOBS, J.W. HORWOOD

Towards a Globally Convergent Approximation of Optimal On-line Parameter Estimation 845
D.M. WIBERG

Comparison of Some Parameter Estimation Methods for Continuous-time Models 851
D. NEUMANN, R. ISERMANN, S. NOLD

Parameter Estimation Aspects in Adaptive Control 857
F. GIRI, J.M. DION, L. DUGARD, M. M'SAAD

On-line Modified Least-squares Parameter Estimation of Linear Systems with Input-output Data Polluted by Measurement Noises 863
CHUN-BO FENG, WEI-XING ZHENG

Combined Filtering and Parameter Estimation for Discrete-time Systems Driven by Approximately White Gaussian Noise Disturbances 869
W.J. RUNGGALDIER, C. VISENTIN

Identification and Estimation of Parameters for a Computer-based Organization 873
C. SIMONE

A Weighted RLS Algorithm for Systems with Bounded Disturbances 879
C. CANUDAS DE WIT, J. CARRILLO

Identification of Linear Systems Containing Unknown Gain Elements 885
B.D.O. ANDERSON, C.R. JOHNSON JR

Evaluation of the Signal-to-noise Ratio for Average Evoked Potentials Contaminated by Colored Noise 891
M. NAKAMURA, S. NISHIDA, H. SHIBASAKI

Relationships Between Backward Markovian Models and Two-filters Smoothing Formulae 897
G. FAVIER, P. VINCENT

Sequential Test Signal Generation for Parameter Estimation in Continuous-time Systems 903
M.B. ZARROP, ZHAO ZHI-FAN

Simultaneous Estimation of Innovation Variance and States in a Dynamic System 913
N.K. POULSEN, J. HOLST

Algorithms of Solving an Estimation Problem with their Program Realization 921
R. GABASOV, F.M. KIRILLOVA, V.V. MULYARCHIK, P.V. GAISHUN

Modal Functions for Continuous-time MIMO Parameter and State Estimation 927
E.V. BOHN

Long-range Predictive Control of Nonlinear Systems given by Volterra Series 931
R. BARS, R. HABER

State-space Self-tuning Control with Application to End Milling 937
L. LIU, N.K. SINHA, M.A. ELBESTAWI

Moving Order Series and Percentile Series Analysis 945
WU MINJIN

Properties of the Parametrization of Monic ARMA Systems 949
M. DEISTLER, M. GEVERS

Seasonal Adjustment by Optimally Smoothed Time-variable Parameter Estimation 957
T.J. YOUNG, C.N. NG, P.C. YOUNG

Spectral Analysis of Records with Missing Data 963
J.L. DOUCE, Q.M. ZHU

Optimal Identification of Non-minimum Phase ARMA(P,Q) Seismic Wavelet 969
HONG-ZHU LIANG, JIA-JIN CHU

Parametrization of Electroencephalogram Signals, a Possible Methodology 975
A.C. TSOI

State-space Methods of Deconvolution for Geophysical Data Processing 983
S.-F. YIU, P.C. YOUNG, B. ROBINSON

On AR Modeling of Nonstationary Signals 989
D. ABOUTAJDINE, G. ALENGRIN, M. BARLAUD, Y. GRENIER, J. MENEZ, M. NAJIM

Identifiability of the Deconvolution Problem 995
A. AHLEN

High-order Yule Walker Estimation of the Parameters of Autoregressions from Noisy Measurements 1001
P. STOICA, B. FRIEDLANDER, T. SÖDERSTRÖM

Robust Approximate Stochastic Modeling and Partial Realization 1007
A.A.L. BEEX

System Parameter Estimation Based on Impulse Response Data using Prediction Theory 1013
H. SAKAI

Order-recursive Least-squares Adaptive Algorithms - A Unified Framework 1017
FUYUN LING

Parameter Identification of Exponential Signals in Colored Noise Environments 1023
TONG-ZHANG KOU, A.A.L. BEEX

Performance Analysis of the Pisarenko Harmonic Decomposition Method 1029
P. STOICA, A. NEHORAI

Statistical Analysis of the Overdetermined Yule-Walker Estimator of Frequencies of Multiple Sinusoids 1035
P. STOICA, T. SÖDERSTRÖM, F.-N. TI, B. FRIEDLANDER

An IIR Structure for Digital Tunable Frequency Response Filter, Adaptive Notch Filtering and Line Enhancers 1041
T.S. NG, J.F. CHICHARO

Estimation of ARMA Models for Narrow Band Processes 1049
B. WAHLBERG

A New Recursive Time Delay Estimation Method for ARMAX Models 1055
CS. BÁNYÁSZ, L. KEVICZKY

A Wavelet Transformations in Signal Detection 1061
F.B. TUTEUR

Constrained Adaptive Time Delay Estimation in the Presence of a Multipath 1067
Y.T. CHAN, P.C. CHING, K.M. TSE

On-line Dynamic Particle Size Estimator for Grinding Plant Control 1073
G. GONZÁLEZ, A. CIPRIANO, A. FEDDERSEN, C. ZAMORA, J. VALENZUELA

Nonlinear Dynamic Model and Parameter Estimation for Fluidized Catalytic Cracking Unit 1079
XIA ZHAO, YONG-ZAI LU

Identification of an Industrial Fluidized Bed Phosphate Calcination Reactor 1085
A. MAJDOUL, M. NAJIM, M. OUADOU, H. YOULAL, M. ZYOUTE, A. BENNIS

An Algorithm for Estimating Cross and Machine Direction Moisture Profiles for Paper Machines 1091
K. NATARAJAN, G.A. DUMONT, M.S. DAVIES

Identification and Self-tuning Control of a Paper Machine 1097
LI QINGQUAN, LIU HAIYI

Identification and Control of a Large CPT Glass Furnace 1103
HUAI-QIANG ZHANG, CHONG-ZHAO HAN, BAI-WU WAN, REN SHI

A Variable-structure Model for Policy Formulation of Mineral Resources Systems 1109
L. CHU

Estimation of Tunnel Kiln Parameters 1113
J. TÓTH, G.GY. HALASZ

The Use of System Identification to Validate Dynamic Model of a FBC 1119
J.M.P. VAN DER LOOIJ

A New Diagnosis Method for Component Failures 1129
W. GE, C.Z. FANG

On-line Fault Detection in Adaptive Control Systems by Using Kullback Discrimination Index 1135
K. KUMAMARU, T. SÖDERSTRÖM. S. SAGARA, K. MORITA

Failure Detection of Linear Dynamical Systems by a Generalized-likelihood-ratio Method Based on a Detectability Analysis 1141
S. TANAKA

Application of Estimation Techniques to Failure Detection for A.C. Electric Machines 1147
H. SHIBATA, Y. IKEDA, G. MARUOKA, S. AOKI, T. OGAWA

Backward SPRT Failure Detection System for Detection of Innovation Variance Change 1153
K. UOSAKI, M. KAWAGOE

Fault Diagnosis of Dynamic System by Means of Parameter Estimation 1159
LI ZHI, ZHENG YONG

Identification of a Pulsed Liquid-liquid Extraction Column 1165
K. NAJIM, H. YOULAL, M. NAJIM

Modeling of a Neutralization Reaction and Self-adaptive Control of pH 1171
D.P. PASZKIEWICZ, P. PRÉVOT

Application of Self-tuning Predictive Control in Lead and Zinc Smelting Blast-furnace 1177
MA RUNJIN, PAN JIAJING, WANG FEI, LI SHOUXIANG, LI SHI

Quality Control of Raw Materials Blending in the Cement Industry 1183
F. MORANT, P. ALBERTOS

On Line Steady State Security Assessment and Enhancement of an Energy System using Pattern Recognition Techniques 1191
S.A. KHAPARDE, G. NAGARAJA

Monthly Electric Load Forecasting using GMDH 1197
J. MURATA, S. SAGARA

Dynamic State Estimation of Interconnected Power System by Singular Perturbation Method 1203
NAN ZHI YAN, WANG RUI SHEN

Application of Parameter Estimation Theory to Power Systems Analysis 1209
S. BERGMAN, S. LJUNG

Expert System Identification: The Supervisory Approach 1215
F. GOMIDE, W.C. AMARAL, L.V.R. ARRUDA, G. FAVIER, A.S. BÁRBARA, W. FONTANINI

An Application of Pattern Recognition to Systems Modelling 1221
NAN YE, YONG-ZAI LU

The Automating Identification System with Intelligence 1227
TIAN XIAO-LIN, LI BAI-LAN, ZHONG YAN-JONG

Robust and Adaptive Control System for Regulation of Arterial Gas Pressures by using Transcutaneous Sensors 1233
A. SANO, H. OHMORI, M. YAZAWA, J. XUE, M. KIKUCHI

Identification of Glucose Regulation System using a Mathematical Model with a Derivative and a Proportional Insulin Secretory Mechanism 1239
H. MORI, S. KITAMURA

Identification of the Thermoregulation System in Newborn Infants 1245
H.J. DANE

Identification of Physiological Dynamics in Hydroponics 1251
T. MORIMOTO, T. FUKUYAMA, Y. YI, Y. HASHIMOTO

On the Identification of a Middle-large Dynamic System for In Vivo Drug Distribution and Metabolism: Comparison of Three Optimization Routines 1257
F.W. SCHULTZ, J.A. MULDER, P. SONNEVELD

Sufficient Experimental Conditions for the Convergence of an Adaptive Observer for Nonlinear Biochemical Processes 1263
G. BASTIN, I.M.Y. MAREELS, D. DOCHAIN, M. GEVERS

An Outside Temperature Prediction Model and Sky Cloudiness Estimation Model for Application to Domestic Heating Control 1269
K. SCHWAMBERGER, R. OTTO

Recursive Identification and Adaptive Forecasting of Wastewater Flows 1275
P.C. TAN, C.S. BERGER, K.P. DABKE, R.G. MEIN

An Adaptive Controller for Blood Pressure 1281
PENG LIXIN, WANG GANBING, ZHANG SHENGJIAN, HOU BO

Identification of System Models Through a Prior Knowledge of Dominant Characteristics 1287
YIHUI ZHAN, WEIMIN ZHENG

An Optical Fiber Drawing Self-tuning Control System 1291
ZHIXIANG ZHU, GUANZHONG DAI, TIEJUN YU

Adaptive Control of Hierarchical Econometric Model with Decentralized Decision-makers 1297
Y. ITO

Parameter Estimation for a Nonlinear Macroeconometric Model of the United States based on Optimal Corporate Pricing and Production 1303
L. W. TAYLOR JR, R. SMITH-TAYLOR

An Adaptive Control Macroeconomic Model of China 1309
ANGZAHO DI, YAN ZHENG

Real Time Estimation of Aircraft Angular Attitude 1315
G. SHADMON

Optimal and Sub Optimal Integration of Position and Doppler Sensors for Target Tracking 1321
P. KALATA, M. KAM, C. LIN

Aircraft Flight Control System Identification 1327
J.A. MULDER

The Applications of Parameter Estimation in Wind Tunnel Dynamic Experiments 1333
X.Z. HUANG, H.J. CAI

A Flight-test Methodology for Identification of an Aerodynamic Model for a V/Stol Aircraft 1339
R.E. BACH JR, B.D. MCNALLY

Parameter Identification for Software Reliability Growth Models 1349
S. BITTANTI, P. BOLZERN, R. SCATTOLINI

An Expert Workstation for System Identification 1355
M. HAEST, G. BASTIN, M. GEVERS, V. WERTZ

Impulse Transfer Function Equivalent Models for Multivariable Linear Stochastic System and its Realization with Finite Markov Parameters 1361
GUANG-WEN HAN

The Uncertainty Principle of Mathematical Modelling 1367
B. DE MOOR, J. VANDERWALLE

Calibration of Simulation Models via Nonlinear Optimization 1373
H. TALPAZ, A. B. HEARN

Author Index 1377

Keyword Index 1381
