

CONTENTS

PREFACE	v
I. REDUCTION OF BIAS BY JACKKNIFING	
1. Introduction	1
2. The Generalized Jackknife	1
3. The Method of Quenouille	5
4. The Higher Order Generalized Jackknife	36
5. Estimators Invariant Under Jackknifing	72
II. APPLICATIONS TO BIASED ESTIMATORS	
1. Introduction	80
2. Ratio Estimators	80
2.1 Normal Auxiliary	85
2.2 Gamma Auxiliary	96
2.3 Pseudoreplication	103
3. Truncation Point	107
4. Discriminant Analysis	115
III. ASYMPTOTIC DISTRIBUTIONS	
1. Introduction	137
2. Asymptotic Theorems	138
3. Approximate Confidence Intervals and Tests	162
4. Finite Populations	182

IV.	JACKKNIFING STOCHASTIC PROCESSES	
1.	Introduction	187
2.	The $J(\cdot; n)$ Estimator	191
3.	The J_{∞} Estimator	199
4.	Asymptotic Distribution Properties of $J_{\infty}[\hat{f}(\theta)]$	217
5.	The G_{∞} Estimator	225
6.	Applications of the J_{∞} Estimator	231
V.	THE $J_{\infty}^{(2)}$ ESTIMATOR	
1.	Introduction	243
2.	The $J_{\infty}^{(2)}$ Estimator	243
3.	Bias Reduction Properties	250
4.	Asymptotic Distribution Properties of the $J_{\infty}^{(2)}$ Estimator	270
	APPENDIX	276
