PREFACE **xiii**

Chapter 1

DOUBT IN DECISION MAKING **1**

Chapter 2

MEANINGS OF PROBABILITY **4**

2.1 Objective Probability, 4

2.1.1 Probabilities Based on Theoretical Reasoning, 5

2.1.2 Empirical Probabilities, 5

2.1.3 Interpretation of Objective Probability, 6

2.2 Subjective Probability, 8

**2.3 Comparison of Viewpoints, 9
Problems, 10**

Chapter 3

COUNTING POSSIBLE OUTCOMES **13**

3.1 Factorial Notation, 14

3.2 The Fundamental Principle of Counting, 14

3.3 Permutations, 17

3.3.1 Permuting n Distinguishable Objects, 17

3.3.2 Permutations Involving Indistinguishable Objects, 17

3.3.3 Selecting and Permuting r Objects from n Objects, 19

3.3.4 Permutations Allowing Repetitions, 20

3.4 Combinations, 21

**3.5 Debriefing, 23
Problems, 24**

Chapter 4

SETS AND SAMPLE SPACES **30**

4.1 Basic Set Concepts, 30

4.1.1 Ways of Defining Sets, 30

4.1.2 Subsets, 32

4.1.3 Complementary and Universal Sets, 34

- 4.2 Defining Events on Sample Spaces, 34**
- 4.3 Intersections of Events, 37**
- 4.4 Unions of Events, 39**
- 4.5 Mutually Exclusive Events, 41**
- 4.6 Partitioning Sample Spaces, 41**
- 4.7 Venn-Euler Diagrams, 45**
Problems, 52

Chapter 5

PROBABILITIES OF EVENTS 57

- 5.1 Assigning Probabilities to Events, 57**
- 5.2 Conditional Probability, 60**
- 5.3 Independence, 65**
- 5.4 Probabilities of Unions of Events, 68**
 - 5.4.1 Unions of Mutually Exclusive Events, 68*
 - 5.4.2 Unions of Non-mutually Exclusive Events, 69*
- 5.5 Bayes' Theorem, 72**
 - 5.5.1 Intuitive Demonstration, 72*
 - 5.5.2 Formal Statement, 75*
- Problems, 79**

Chapter 6

RANDOM VARIABLES 89

- 6.1 Basic Concept of a Function, 89**
- 6.2 Traditional Definition of a Random Variable, 91**
- 6.3 Extended Definition of a Random Variable, 93**
- 6.4 Discrete and Continuous Random Variables, 95**
- 6.5 Defining Events in Terms of Random Variables, 96**
Problems, 98

Chapter 7

PROBABILITY FUNCTIONS 102

- 7.1 Basic Concept of a Probability Function, 102**
- 7.2 Discrete Probability Functions, 104**
 - 7.2.1 Probability Mass Functions, 104*
 - 7.2.2 Cumulative Mass Functions, 107*
- 7.3 Continuous Probability Functions, 110**
 - 7.3.1 Probability Density Functions, 110*
 - 7.3.2 Cumulative Density Functions, 112*
 - 7.3.3 Applications of Continuous Probability Functions, 115*
- Problems, 125**

Chapter 8

CENTRAL TENDENCY AND VARIABILITY 135

8.1 Measures of Central Tendency: Averages, 135

8.1.1 *The Median, 135*

8.1.2 *The Mode, 137*

8.1.3 *The Arithmetic Mean, 139*

8.1.4 *Expected Value of a Function of a Random Variable, 144*

8.1.5 *Mathematical Properties of Expectations, 146*

8.2 Measures of Variability, 148

8.2.1 *Expected Deviation, 150*

8.2.2 *Variance and Standard Deviation, 152*

8.3 Chebyshev's Inequality, 158

Problems, 160

Chapter 9

COMMONLY USED DISCRETE PROBABILITY MODELS 168

9.1 The Hypergeometric Model, 169

9.1.1 *The Hypergeometric Mass Function, 171*

9.1.2 *The Hypergeometric Cumulative Mass Function, 172*

9.1.3 *Mean and Variance of the Hypergeometric Distribution, 174*

9.2 Models Based on the Bernoulli Process, 175

9.2.1 *The Binomial Model, 177*

9.2.2 *The Negative Binomial Model, 184*

9.3 The Poisson Model, 187

9.3.1 *Characteristics of the Poisson Process, 188*

9.3.2 *The Poisson Mass Function, 189*

9.3.3 *The Poisson Cumulative Mass Function, 192*

9.3.4 *The Use of Poisson Tables, 192*

9.3.5 *Mean and Variance of the Poisson Distribution, 194*

Problems, 194

Chapter 10

COMMONLY USED CONTINUOUS PROBABILITY MODELS 199

10.1 The Normal Probability Model, 199

10.1.1 *The General Normal Probability Model, 199*

10.1.2 *The Standard Normal Probability Model, 203*

10.1.3 *The Use of the Standard Normal Integral Table, 204*

10.1.4 *Remarks on the Normal Model, 210*

10.2 The Gamma Probability Model, 211

10.2.1 *The Erlang Distribution, 213*

10.2.2 *The Exponential Distribution, 214*

10.3 The Rectangular Probability Model, 215

Problems, 219

Chapter 11

SOME USEFUL PROBABILITY APPROXIMATIONS 224

- 11.1 Effect of the Binomial Parameters on the Shape of the Distribution, 225**
- 11.2 Poisson Approximation to the Binomial, 227**
 - 11.2.1 Mechanics of the Poisson Approximation, 228*
 - 11.2.2 Accuracy of the Poisson Approximation, 229*
- 11.3 Normal Approximation to the Binomial, 231**
 - 11.3.1 Mechanics of the Normal Approximation, 231*
 - 11.3.2 Accuracy of the Normal Approximation to the Binomial, 237*
- 11.4 Poisson or Normal Approximation: Which?, 238**
- 11.5 Binomial Approximation to the Hypergeometric Distribution, 240**
Problems, 243

Chapter 12

DECISION CONDITIONS AND CRITERIA 248

- 12.1 Conditions Under Which Decisions are Made, 248**
 - 12.1.1 Decision Making Under Certainty, 250*
 - 12.1.2 Decision Making Under Risk, 250*
 - 12.1.3 Decision Making Under Uncertainty, 252*
 - 12.1.4 Decision Making Under Conflict, 252*
- 12.2 Criteria for Decision Making Under Certainty, 253**
- 12.3 Criteria for Decision Making Under Risk, Uncertainty, or Conflict, 254**
 - 12.3.1 Decision Criteria Based on Monetary Consequences Alone, 257*
 - 12.3.2 Decision Criteria Based Primarily on Probabilities, 262*
 - 12.3.3 Decision Criteria Based on Monetary Consequences and Probabilities Combined, 264*
- 12.4 Incremental Analysis: An Application of the EMV Criterion, 269**
Problems, 272

Chapter 13

THE VALUE OF INFORMATION IN DECISION MAKING 279

- 13.1 EMV of the Decision with Available Information, 279**
 - 13.2 EMV of the Decision with Perfect Information, 282**
 - 13.3 Expected Value of Perfect Information (EVPI), 284**
 - 13.3.1 EVPI in Terms of EMV, 284*
 - 13.3.2 EVPI in Terms of EOL, 285*
 - 13.4 Evaluating Imperfect Information, 288**
 - 13.4.1 Revision of Probabilities Due to Additional Information, 289*
 - 13.4.2 EMV of the Decision with Imperfect Information, 294*
 - 13.4.3 Expected Value of Imperfect Information (EVII), 296*
- Problems, 297**

Chapter 14

UTILITY IN DECISION MAKING 302

14.1 The Decision Maker's Attitude Toward Risk, 302

14.2 Utility Functions, 305

14.3 Expected Utility Criterion, 311

**14.4 Three Basic Shapes of Utility Functions, 314
Problems, 316**

Appendix I

SUMMARIES 319

1. Summary of Set Notation, 320

2. Summary Comparison of Discrete and Continuous Random Variables, 321

3. Summary of Common Discrete Probability Models, 322

4. Summary of Common Continuous Probability Models, 323

5. Basic Rules for Derivatives, 324

6. Basic Rules for Integration, 325

Appendix II

TABLES 327

A. Factorial Values, 328

B. Binomial Coefficients, 329

C. Exponential Functions, 330

D. Binomial Distribution — Individual Terms, 331

E. Binomial Distribution — Cumulative Terms, 342

F. Poisson Distribution — Individual Terms, 354

G. Poisson Distribution — Cumulative Terms, 358

H. Standard Normal Integral, 362

I. Squares and Square Roots, 364

J. Four-place Mantissas for Common Logarithms, 365

K. Natural (Napierian) Logarithms, 367

ANSWERS TO SELECTED PROBLEMS 369

INDEX 379
