

Preface	v
PART ONE	
1. Introduction	1
1.1 Tests of Hypothesis	1
1.2 The General Linear Hypothesis	3
1.3 Power of the F-test	4
1.4 Purpose and Range of Charts	5
2. Literature Survey	7
2.1 Tables of the Operating Characteristics	7
2.2 Tables of φ	8
2.3 Curves of Constant f_2	9
2.4 Computer Programs	9
2.5 Special Purpose Charts and Tables	9
2.6 Stein Two-sample Procedure	11
3. Examples	13
3.1 General Remarks	13
3.2 One-way Layout	14
3.3 Two-way Layout	19
3.4 Randomized Blocks	25
3.5 Simple Linear and Quadratic Regression	31
3.6 Multivariate t-tests	36
3.7 Fixed α on a Sphere	38
3.8 A Bayesian Approach	42
4. Details of Computation	47
4.1 Auxiliary Functions	47
4.2 Generation of Percentage Points	50
4.3 Power Computation	52

4.4 Construction of the Charts	54
5. Interpolation in Table 1	57
References	59
Theoretical References	59
Previous Tables, Charts and Programs	59
Examples	61
Computational Methods	62
PART TWO	
Table 1 -- Upper Percentage Points of F-Distribution	65
Table 2 -- Upper Percentage Points of the Chi-Square Distribution	77
Table 3 -- Upper Percentage Points of the T-Distribution	79
PART THREE	
Charts	83
Index	189
