Foreword to the Series

Preface

Introduction

Part 1 Forecasting and Management

- | | | |
|-----|---|---|
| 1.1 | An example of the consequences of poor forecasting. | 3 |
| 1.2 | Forecasting as part of the overall management activity. | 5 |
| 1.3 | Some guidelines for tackling a forecasting problem. | 7 |

Part 2 Five classes of time series models

- | | | |
|-----|---|----|
| 2.1 | Univariate stochastic (single output) models. | 14 |
| 2.2 | Transfer function (single output - multiple input) models. | 16 |
| 2.3 | Intervention models. | 18 |
| 2.4 | Multivariate stochastic (multiple output) models. | 21 |
| 2.5 | Multivariate transfer function (multiple output - multiple input) models. | 23 |
| 2.6 | Building time series models. | 25 |

Part 3 Applications

- | | | |
|-------|--|----|
| 3.1 | An application of univariate models to operational planning. | 31 |
| 3.2 | Three applications of transfer function models. | 38 |
| 3.2.1 | Relationship between market share, price and advertising. | 38 |
| 3.2.2 | Relationship between electricity consumption and temperature. | 44 |
| 3.2.3 | Relationships between manufacturing employment, G.D.P. and manufacturing output. | 59 |

3.3	Two applications of intervention models.	66
3.3.1	The effect of a change in policy on bad debt collection.	67
3.3.2	The effects of promotional activity on sales of a consumer product.	70
3.4	An application of multivariate stochastic models to the sales of competitive products.	75
3.5	An application of multivariate transfer function models to sales volume - price relationships.	81
Part 4 Comparisons with econometric modelling		88
4.1	Seasonality.	88
4.2	Trends.	89
4.3	Lag Structures.	89
4.4	'Error' or 'Noise' structures.	89
4.5	Model Building.	90
4.6	Forecasting.	93
Appendices : Mathematical description of the five classes of model		95
A1	Non - linear transformation of the data.	95
A2	Univariate stochastic models.	97
A3	Transfer function models.	100
A4	Intervention models.	104
A5	Multivariate stochastic models.	109
A6	Multivariate transfer function models.	119
References		124
Glossary of technical terms		126
