Preface v

1 Isotonic Regression 1
- 1.1 Introduction 1
- 1.2 Isotonic regression over a simply ordered finite set 5
- 1.3 Isotonic regression over a quasi-ordered set 24
- 1.4 Generalized isotonic regression problems 38
- 1.5 Extremum problems associated with dual convex cones 46
- 1.6 Complements 55

2 Estimation Under Order Restrictions 64
- 2.1 Isotonization of estimates 64
- 2.2 Isotonic estimation of regression 66
- 2.3 Algorithms for calculation 72
- 2.4 Maximum likelihood and Bayesian estimation of ordered parameters in exponential families 91
- 2.5 Maximum likelihood estimation of stochastically ordered distributions 105
- 2.6 Complements 110

3 Testing the Equality of Ordered Means: Likelihood Ratio Tests in the Normal Case 116
- 3.1 Introduction 116
- 3.2 The $\bar{\chi}^2$ and $\bar{E}^2$ tests 117
- 3.3 The null hypothesis distributions of $\bar{\chi}^2$ and $\bar{E}^2$ 126
- 3.4 The power function of $\bar{\chi}^2$ 153
- 3.5 Complements 170

4 Testing the Equality of Ordered Means: Extensions and Generalizations 175
4.1 A one-sided test for the multivariate normal mean 175
4.2 Tests based on contrasts among the means 183
4.3 Ordered tests for non-normal distributions 191
4.4 Distribution-free tests for ordered alternatives 198
4.5 Complements 213

5 Estimation of Distributions 222
5.1 Introduction 222
5.2 Estimation of unimodal densities 223
5.3 Maximum likelihood estimation for distributions with monotone failure rate 231
5.4 Isotonic window estimators for the generalized failure rate function 242
5.5 Isotonic estimators for star-ordered families of distributions 254
5.6 Complements 261

6 Isotonic Tests for Goodness of Fit 263
6.1 Introduction 263
6.2 Tests for exponentiality against monotone failure rate alternatives 263
6.3 Asymptotic minimax property of the cumulative total time on test statistic 279
6.4 Generalizations 297
6.5 Complements 305

7 Conditional Expectation Given a σ-Lattice 307
7.1 Introduction 307
7.2 Formulation of the isotonic regression problem in terms of projection in L_2 307
7.3 Conditional expectation given a σ-lattice as projection in L_2 314
7.4 Conditional expectation given a σ-lattice as a Lebesgue-Radon-Nikodym derivative 326
7.5 Complements 354

Appendix: Tables 359
