Preface	xvi
<b>1 Introduction to Probability and Counting</b>	<b>1</b>
1.1 Interpreting Probabilities	3
1.2 Sample Spaces and Events	5
1.3 Permutations and Combinations	9
<i>Counting Permutations</i>	10
<i>Counting Combinations</i>	14
<i>Permutations of Indistinguishable Objects</i>	15
Chapter Summary	16
Exercises	16
Review Exercises	22
<b>2 Some Probability Laws</b>	<b>24</b>
2.1 Axioms of Probability	24
2.2 Conditional Probability	28
2.3 Independence of the Multiplication Rule	29
<i>The Multiplication Rule</i>	34
2.4 Bayes' Theorem	35
Chapter Summary	37
Exercises	37
Review Exercises	42
<b>3 Discrete Distributions</b>	<b>44</b>
3.1 Random Variables	44
3.2 Discrete Probability Densities	45
<i>Cumulative Distribution</i>	48
3.3 Expectation and Distribution Parameters	50
<i>Variance and Standard Deviation</i>	53

3.4	Moment Generating Function and the Geometric Distribution	57
	<i>Geometric Distribution</i>	57
	<i>Moment Generating Function</i>	60
	<i>Forgetfulness Property: Geometric</i>	64
3.5	Binomial Distribution	65
3.6	Negative Binomial Distribution	69
3.7	Hypergeometric Distribution	71
3.8	Poisson Distribution	75
	<i>Poisson Approximation to the Binomial Distribution</i>	77
3.9	Simulating a Discrete Distribution	80
	Chapter Summary	82
	Exercises	83
	Review Exercises	96
<b>4</b>	<b>Continuous Distributions</b>	<b>99</b>
4.1	Continuous Densities	99
	<i>Cumulative Distribution</i>	103
	<i>Uniform Distribution</i>	105
4.2	Expectation and Distribution Parameters	105
4.3	Gamma Distribution	108
	<i>Gamma Distribution</i>	110
	<i>Exponential Distribution</i>	111
	<i>Forgetfulness Property: Exponential</i>	113
	<i>Chi-Squared Distribution</i>	113
4.4	Normal Distribution	114
	<i>Standard Normal Distribution</i>	117
4.5	Normal Probability Rule and Chebyshev's Inequality	120
4.6	Normal Approximations	123
4.7	Weibull Distribution and Reliability	125
	<i>Reliability</i>	127
	<i>Reliability of Series and Parallel Systems</i>	130
4.8	Transformation of Variables	132
4.9	Simulating a Continuous Distribution	135
	Chapter Summary	136
	Exercises	139
	Review Exercises	153
<b>5</b>	<b>Joint Distribution</b>	<b>156</b>
5.1	Joint Densities and Independence	156
	<i>Marginal Distributions: Discrete</i>	158
	<i>Joint and Marginal Distributions: Continuous</i>	159
	<i>Independence</i>	163
5.2	Expectation and Covariance	164
	<i>Covariance</i>	166
5.3	Correlation	168
5.4	Conditional Densities and Regression	172
	<i>Curves of Regression</i>	174

5.5	Transformation of Variables	176
	Chapter Summary	180
	Exercises	181
	Review Exercises	188
<b>6</b>	<b>Descriptive Statistics</b>	<b>190</b>
6.1	Random Sampling	190
6.2	Picturing the Distribution	193
	<i>Stem-and-Leaf Charts</i>	194
	<i>Histograms and Ogives</i>	195
	<i>Rules for Breaking Data into Categories</i>	195
6.3	Sample Statistics	200
	<i>Location Statistics</i>	200
	<i>Measures of Variability</i>	202
6.4	Boxplots	204
	Chapter Summary	209
	Exercises	210
	Review Exercises	218
	Computing Supplement: SAS	220
I	Summary Statistics and Histograms	220
<b>7</b>	<b>Estimation</b>	<b>226</b>
7.1	Point Estimation	226
7.2	The Method of Moments and Maximum Likelihood	229
	<i>Maximum Likelihood Estimators</i>	231
7.3	Functions of Random Variables—Distribution of $\bar{X}$	234
	<i>Distribution of <math>\bar{X}</math></i>	236
7.4	Interval Estimation and the Central Limit Theorem	237
	<i>Confidence Interval on the Mean: Variance Known</i>	238
	<i>Central Limit Theorem</i>	241
	Chapter Summary	242
	Exercises	243
	Review Exercises	253
<b>8</b>	<b>Inferences on the Mean and Variance of a Distribution</b>	<b>257</b>
8.1	Interval Estimation of Variability	258
8.2	Estimating the Mean and the Student- <i>t</i> Distribution	261
	<i>The T Distribution</i>	262
	<i>Confidence Interval on the Mean: Variance Estimated</i>	265
8.3	Hypothesis Testing	267
8.4	Significance Testing	271
8.5	Hypothesis and Significance Tests on the Mean	273
8.6	Testing for Normality and Hypothesis Tests on the Variance	278
	<i>Testing for Normality</i>	278
	<i>Testing Hypotheses on the Variance</i>	281

8.7	Alternative Nonparametric Methods	282
	<i>Sign Test for Median</i>	283
	<i>Wilcoxon Signed-Rank Test</i>	285
	Chapter Summary	288
	Exercises	289
	Review Exercises	308
	Computing Supplement	312
II	One Sample $T$ Tests and Confidence Intervals	312
III	Testing for Normality	313
<b>9</b>	<b>Inference on Proportions</b>	<b>316</b>
9.1	Estimating Proportions	316
	<i>Confidence Interval on <math>p</math></i>	317
	<i>Sample Size for Estimating <math>p</math></i>	320
9.2	Testing Hypotheses on a Proportion	321
9.3	Comparing Two Proportions: Estimation	323
	<i>Confidence Interval on <math>p_1 - p_2</math></i>	324
9.4	Comparing Two Proportions: Hypothesis Testing	326
	<i>Pooled Proportions</i>	328
	Chapter Summary	330
	Exercises	330
	Review Exercises	337
<b>10</b>	<b>Comparing Two Means and Two Variances</b>	<b>340</b>
10.1	Point Estimation: Independent Samples	340
10.2	Comparing Variances: The $F$ Distribution	342
10.3	Comparing Means: Variances Equal (Pooled Test)	346
	<i>Confidence Interval on <math>\mu_1 - \mu_2</math>: Pooled</i>	347
	<i>Pooled <math>T</math> Test</i>	350
10.4	Comparing Means: Variances Unequal	351
10.5	Comparing Means: Paired Data	353
	<i>Paired <math>T</math> Test</i>	354
10.6	Alternative Nonparametric Methods	355
	<i>Wilcoxon Rank-Sum Test</i>	356
	<i>Wilcoxon Signed-Rank Test for Paired Observations</i>	358
	Chapter Summary	360
	Exercises	360
	Review Exercises	375
	Computing Supplement	379
IV	Comparing Means and Variances	379
V	Paired $T$ Test	380
<b>11</b>	<b>Simple Linear Regression and Correlation</b>	<b>382</b>
11.1	Model and Parameter Estimation	384
	<i>Description of the Model</i>	384
	<i>Least-Squares Estimation</i>	386
11.2	Properties of Least-Squares Estimators	391
	<i>Distribution of <math>B_1</math></i>	393
	<i>Distribution of <math>B_0</math></i>	395

	<i>Estimator of <math>\sigma^2</math></i>	397
	<i>Summary of Theoretical Results</i>	398
11.3	Confidence Interval Estimation and Hypothesis Testing	399
	<i>Inferences about Slope</i>	399
	<i>Inferences about Intercept</i>	403
	<i>Inferences about Estimated Mean</i>	404
	<i>Inferences about Single Predicted Value</i>	406
11.4	Repeated Measures and Lack of Fit	411
11.5	Residual Analysis	414
	<i>Residual Plots</i>	414
	<i>Checking for Normality: Stem-and-Leaf and Boxplots</i>	418
11.6	Correlation	425
	<i>Interval Estimation and Hypothesis Tests on <math>\rho</math></i>	429
	<i>Coefficient of Determination</i>	432
	Chapter Summary	434
	Exercises	434
	Review Exercises	445
	Computing Supplement	448
VI	Scattergrams, Estimation of $\beta_0$ and $\beta_1$ , and the Use of the Regression Line for Predictions	448
VII	Testing $H_0: \beta_1 = 0$	452
VIII	Confidence Intervals on $\beta_0, \beta_1, \mu_{Y x}, Y x$	452
IX	Testing for Lack of Fit	455
X	Residual Plots	456
XI	Correlation	460
<b>12</b>	<b>Multiple Linear Regression Models</b>	<b>462</b>
12.1	Least-Squares Procedures for Model Fitting	462
	<i>Polynomial Model of Degree <math>p</math></i>	463
	<i>Multiple Linear Regression Model</i>	467
12.2	A Matrix Approach to Least Squares	470
	<i>The Normal Equations</i>	473
	<i>Solving the Normal Equations</i>	475
	<i>Simple Linear Regression: Matrix Formulation</i>	477
	<i>Polynomial Model: Matrix Formulation</i>	479
12.3	Properties of the Least-Squares Estimators	481
	<i>Expected Value of <math>\hat{\beta}</math></i>	483
	<i>Estimation of <math>\sigma^2</math> and Variance of <math>\hat{\beta}</math></i>	483
12.4	Interval Estimation	488
	<i>Confidence Interval on Coefficients</i>	488
	<i>Confidence Interval on Estimated Mean</i>	489
	<i>Prediction Interval on a Single Predicted Response</i>	491
12.5	Testing Hypotheses about Model Parameters	492
	<i>Testing a Single Predictor Variable</i>	492
	<i>Testing for Significant Regression</i>	493
	<i>Testing a Subset of Predictor Variables</i>	495
12.6	Use of Indicator or “Dummy” Variables	497

12.7	Criteria for Variable Selection	501
	<i>Forward Selection Method</i>	502
	<i>Backward Elimination Procedure</i>	503
	<i>Stepwise Method</i>	504
	<i>Maximum <math>R^2</math> Method</i>	506
	<i>Mallows <math>C_k</math> Statistic</i>	506
	<i>PRESS Statistic</i>	506
12.8	Model Transformation and Concluding Remarks	512
	Chapter Summary	516
	Exercises	517
	Review Exercises	528
	Computing Supplement	530
XII	Multiple Regression	530
XIII	Polynomial Regression	531
<b>13</b>	<b>Analysis of Variance</b>	<b>535</b>
13.1	One-Way Classification Fixed-Effects Model	536
	<i>The Model</i>	539
	<i>Testing <math>H_0</math></i>	541
13.2	Comparing Variances	547
13.3	Pairwise Comparisons	549
	<i>Bonferroni <math>T</math> Tests</i>	550
	<i>Duncan's Multiple Range Test</i>	552
13.4	Testing Contrasts	555
13.5	Randomized Complete Block Design	559
	<i>The Model</i>	561
	<i>Testing <math>H_0</math></i>	565
	<i>Effectiveness of Blocking</i>	565
	<i>Paired Comparisons</i>	568
13.6	Latin Squares	569
13.7	Random-Effects Model	573
	<i>One-Way Classification</i>	573
13.8	Design Models in Matrix Form	576
13.9	Alternative Nonparametric Methods	580
	<i>Kruskal-Wallis Test</i>	580
	<i>Friedman Test</i>	582
	Chapter Summary	583
	Exercises	584
	Review Exercises	596
	Computing Supplement	599
XIV	One-Way Classification with Multiple Comparisons	599
XV	Randomized Complete Blocks with Multiple Comparisons	601
<b>14</b>	<b>Factorial Experiments</b>	<b>604</b>
14.1	Two-Factor Analysis of Variance	606
	<i>Testing <math>H_0</math></i>	608
	<i>Paired Comparisons</i>	612
	<i>Sample Size</i>	616
14.2	Extension to Three Factors	616

14.3	Random and Mixed Model Factorial Experiments	616
	<i>Random-Effects Model</i>	617
	<i>Mixed-Effects Model</i>	620
14.4	$2^k$ Factorial Experiments	620
	<i>Computational Techniques—Yates Method</i>	629
14.5	$2^k$ Factorial Experiments in an Incomplete Block Design	631
14.6	Fractional Factorial Experiments	634
	Exercises	648
	Review Exercises	648
	Computing Supplement	650
XVI	Two-Way Classification with Multiple Comparisons	650
XVII	$2^k$ Factorial Experiments	654
<b>15</b>	<b>Categorical Data</b>	<b>656</b>
15.1	Multinomial Distribution	656
15.2	Chi-Squared Goodness of Fit Tests	658
15.3	Testing for Independence	660
	<i>r × c Test for Independence</i>	665
15.4	Comparing Proportions	667
	<i>r × c Test for Homogeneity</i>	670
	<i>Comparing Proportions with Paired Data:</i>	
	<i>McNemar's Test</i>	672
	Chapter Summary	673
	Exercises	674
	Review Exercises	680
<b>16</b>	<b>Statistical Quality Control</b>	<b>683</b>
16.1	Properties of Control Charts	684
	<i>Monitoring Means</i>	685
	<i>Distribution of Run Lengths</i>	686
16.2	Shewhart Control Charts for Measurements	689
	<i><math>\bar{X}</math> Chart (Mean)</i>	690
	<i>R Chart (Range)</i>	693
16.3	Shewhart Control Charts for Attributes	696
	<i>P Chart (Proportion Defective)</i>	697
	<i>C Charts (Average Number of Defects)</i>	700
16.4	Acceptance Sampling	702
16.5	Two-Stage Acceptance Sampling	706
16.6	Extensions in Quality Control	709
	<i>Modifications of Control Charts</i>	709
	<i>Parameter Design Procedures</i>	710
	Exercises	711
	Appendix A Statistical Tables	719
	Appendix B Answers to Selected Problems	764
	Index	807
