

# contents

## 1 some argument, some arithmetic, and a little psychotherapy 1

How to Study and How not to	5
Arithmetic: A Therapeutic Review	7
<i>Addition and Subtraction</i>	7
<i>Equality</i>	11
<i>Multiplication and Division</i>	12
<i>Combining Addition, Subtraction,         Multiplication, and Division</i>	16
<i>Counting versus Measuring</i>	19
<i>Summary</i>	21
Statistics and the Behavioral Sciences:	
A Meeting of Minds?	23
<i>Example 1</i>	25
<i>Example 2</i>	29
<i>Example 3</i>	29
<i>Example 4 (or is it 1 again?)</i>	30
Exercise	32

## 2 dimensions, variables, and measurement 33

Is Humanity Measurable?	35
The Scaling of Psychological Dimensions	37
Various Procedures for Scaling	38
<i>Measuring</i>	38
<i>Comparing</i>	40
<i>Categorizing</i>	41
Variables and Empirical Research	42
Data	45
<i>Validity</i>	45
<i>Reliability</i>	48
<i>Usefulness of Data</i>	49
Self-Test on Chapters 1 and 2	51
Some Ordinary Problems	59

## 3 all about graphs 61

Meeting Graphs	62
<i>Data Curves</i>	67

<i>Correlation Scattergrams</i>	69
<i>Theoretical Functions</i>	69
<i>Frequency Distributions</i>	71
Grouping Data	73
Graphing Nominal Data	78
<i>Cumulative Frequency Distributions</i>	79
Self-Test on Chapter 3	82
Some Ordinary Problems	88

## **4** averages: measuring togetherness 90

Arithmetic Mean	92
The Median	93
The Mode	94
Averages Sullied—and Sillied	96
On Calculating Averages	98
<i>Mode</i>	98
<i>Median</i>	98
<i>Arithmetic Mean</i>	100
Clean Living with Calculations	102
Exercises for a Very Rainy Evening	105
Some Ordinary Problems	108

## **5** variability: measuring apartness 111

Range	113
Quartile Deviation	114
Mean Deviation	116
Variance	117
Standard Deviation	118
<i>Disadvantages of the Standard Deviation</i>	120
<i>Error and Standard Deviations</i>	121
<i>Constant Error and Variable Error</i>	121
<i>The Calculation of s</i>	123
<i>Derivation of the Working Formula for the Variance</i>	124
<i>Mathematical Independence between Mean and Standard Deviation</i>	125
<i>Estimating the Standard Deviation from Grouped Data</i>	127
Using Calculating Machines	128
<i>Electro-mechanical or Rotary Calculators</i>	128
<i>Electronic Calculators</i>	128
<i>The Electronic Computer</i>	130

Exercises for Another Rainy Weekend	132
Further Problems	134
Self-Test on Chapters 4 and 5	135
Some Ordinary Problems	139

## **6** percentiles and standard scores **143**

Percentiles Revisited	145
<i>Percentiles Have Their Problems</i>	148
<i>An Easy to Find Percentile Ranks with Large Amounts of Data</i>	149
<i>And an Easy Way to Find Percentile Points with Large Amounts of Data</i>	151
Standard Scores	151
<i>Caution . . .</i>	154
<i>The z Score, Statistics, and Research</i>	156
Important Look Backward and Forward	159
Exercise for a Rainy Coffeebreak	159
Self-Test on Chapter 6	161
Some Ordinary Problems	166

## **7** probability: measuring likelihood **170**

Various Concepts of Probability	172
Combining Separate Probabilities	174
<i>The Multiplication Rule</i>	175
<i>The Addition Rule</i>	178
<i>The Venn Diagram</i>	180
Randomness	183
Probability Distributions: Combining the Additive and Multiplicative Rules	184
A Direct Use of Pascal's Triangle	196
<i>The Binomial Test</i>	196
Scientific (Exponential) Notation	198
Exercises for a Rainy Chemistry Lab	202
Self-Test on Chapter 7	203
Some Ordinary Problems	208

## **8** samples and populations **211**

Population	212
Sample	213

<i>Casual Samples</i>	213
<i>Biased Samples</i>	214
<i>Representative Samples</i>	214
<i>Random Samples</i>	214
Statistics and Parameters	215
<i>Terminology</i>	215
Estimating Parameters from Statistics	216
<i>Estimating <math>\mu</math> from <math>\bar{X}</math></i>	216
<i>Estimating <math>\sigma^2</math> from <math>s^2</math></i>	217
A Small Question of Accuracy	219
<i>Confidence Intervals</i>	221
<i>An Example Worked Out</i>	221
<i>A Couple of Cautions and a Bonus</i>	223
The $z$ Test	224
Exercise for a Rainy St. Swithin's Day	227
Self-Test on Chapter 8	229
Some Ordinary Problems	236

## 9 correlation: measuring relatedness 239

Relationship	240
Quantification of Relationship	242
Showing Correlation Graphically	244
The Pearson Product-Moment Coefficient of Correlation	244
<i>Calculation of <math>r</math></i>	248
<i>Sample Calculation of <math>r</math> Using Raw Data, Given <math>\bar{X}</math>, <math>\bar{Y}</math>, <math>s_x</math>, and <math>s_y</math></i>	
The Spearman Rank-Order Coefficient or Correlation	252
How (Not?) to Lie with Correlation Statistics	254
Correlation and Experimentation	258
Generalizing about Correlations	260
Correlation and the Concept of Reliability	264
Self-Test on Chapter 9	267
Some Ordinary Problems	274

## 10 regression: measuring predictability 278

Calculating Regression Lines	281
Calculating Regression from Raw Scores	283
<i>Example of Use</i>	283
Prediction and the Regression Line	284
"Explained" and "Unexplained" Variation	285
Predicted and Unpredicted Variation	286
Standard Error of an Estimate	290
Self-Test on Chapter 10	295
Some Ordinary Problems	301

## **11** experiments: mathematics meets reality 303

The $z$ Test in Experiments	306
The Standard Error of the Difference between Two Means	306
<i>A Worked Example</i>	309
What Do We Now Mean by Population?	310
The Concept of Significance	310
Type I and Type II Errors	311
“I believe in $\alpha = 0.051 \dots$ ”	312
Controlling for Type II Error	314
Simple Randomized Groups	315
The Matched-Subjects Design	316
<i>Sample Problem</i>	317
The Within-Subjects or Repeated-Measures Design	320
Why the Null Hypothesis?	321
Testing the Difference between Two Correlation Coefficients	322
<i>A Worked Example</i>	325
Exercise for a Rainy Garden Party	326
Self-Test on Chapter 11	327
Some Ordinary Problems	339

## **12** the $t$ test 341

Characteristics of the $t$ Distribution	343
The $t$ Test of the Null Hypothesis	345
<i>A Worked Example: Random Groups Design</i>	348
Degrees of Freedom	348
<i>Determining df for Matched-Subjects Experiments</i>	350
<i>Another Worked Example: Repeated-Measures Design</i>	351
Parametric Statistical Tests	354
Two-Tailed and One-Tailed Tests	355
<i>How to Know How Many Tails You Have</i>	358
Degrees of Significance?	358
Self-Test on Chapter 12	361
Some Ordinary Problems	368

## **13** analysis of variance and the $F$ test 371

The $F$ Distribution	377
<i>The Rationale of the <math>F</math> Test</i>	378
<i>The <math>F</math> Distribution, Again</i>	380
<i>One Tail or Two?</i>	381
<i>How to Determine Values of <math>df</math></i>	382
<i>The Additivity of Sums of Squares</i>	383

ANOVA Calculations Made Easy	383
General Comparisons and Planned Comparisons	390
Parametric Assumptions	391
Another Coefficient of Correlation!	392
<i>Example 1. 0 Relationship</i>	392
<i>Example 2. Perfect Relationship</i>	393
<i>Example 3. The Prune Nectar Relationship</i>	393
Self-Test on Chapter 13	395
Some Ordinary Problems	399

## **14** how to do two experiments at once 402

Interaction	406
<i>But Beware</i>	407
Interpretation of Interactions	416
How to Know an Interaction When You Meet One	417
Self-Test on Chapter 14	421
Some Ordinary Problems	423

## **15** nonparametric statistics 425

Power Efficiency	427
<i>More Bad News</i>	428
<i>But Now the Good News</i>	428
Significance in Nonparametric Tests	429
Tests for Categorical Frequencies	429
The $\chi^2$ Test	430
The Sign Test	436
The Binomial Test Again	437
The Mann-Whitney $U$ Test	439
<i>Calculation of <math>U</math> with Large <math>n_A</math> and <math>n_B</math></i>	441
<i>Interpreting the Significance of <math>U</math> with Large <math>n_A</math> or <math>n_B</math></i>	442
<i>What to Do about Tied Scores</i>	442
<i>How to Use Table I</i>	444
The Kruskal-Wallis One-Way Analysis of Variance	445
<i>What to Do about Tied Values</i>	447
Summary	448
Self-Test on Chapter 15	449
Some Ordinary Problems	457
<b>Epilogue</b>	460
<b>Statistical Tables</b>	463
<b>Answers to Selected Problems</b>	489
<b>Glossary of Symbols</b>	490
<b>Index</b>	493
