1	ORIENTATION AND INTRODUCTION	1
	1.1 "Statistics" and You	1
	1.2 The History of Statistics	2
	1.3 Descriptive and Sampling Statistics	4
	1.4 The Random Sample and the Stratified Random Sample	5
	1.5 The Abuses of Statistics	6
	1.6 Skepticism and the Counter-Resistance to Statistics	7
	Problems	10
2	THE MODE, THE MEDIAN, AND THE MEAN	12
	2.1 Definitions	12
	2.2 Two Properties of the Mean	14
	2.3 How Changing the Terms Affects the Mean	18
	2.4 Some Applications of the Mean, the Median, and the Mode	21
	2.5 Notation	22
	Problems	23
3	VARIABILITY AND TWO MEASURES OF VARIABILITY	25
	3.1 Variability	25
	3.2 The Variance	26
	3.3 The Standard Deviation	29
	3.4 How Changing the Terms in a Distribution Affects the Standard Deviation and the Variance	31
	3.5 Applications of the Variance	32
	3.6 Notation	33
	3.7 Computational Formula for the Variance	35
	Problems	36

4	WAYS TO DESCRIBE THE POSITION OF A TERM IN A DISTRIBUTION	38
	4.1 Percentile Ranks and Percentiles	38
	4.2 $z$ Scores	40
	4.3 $z$ Score Averages	43
	4.4 No Inherent Relationship between $z$ Scores and Percentile Ranks	44
	4.5 The Mean and Standard Deviation of a Set of $z$ Scores	45
	4.6 Standard Scores	47
	4.7 Applications	47
	4.8 Notation	48
	Problems	48
5	GROUPING DATA AND DRAWING GRAPHS	50
	5.1 Discrete and Continuous Variables	50
	5.2 Tabulating and Graphing the Values of a Discrete Variable	52
	5.3 Rounding Off	52
	5.4 Grouping Data and Drawing the Group Frequency Table	55
	5.5 The Histogram and the Frequency Polygon	56
	5.6 The Curve as an Approximate Graph	58
	5.7 The Meaning of Area	60
	5.8 Applications	61
	Problems	62
6	COMPUTING VARIOUS MEASURES FROM GROUPED DATA	65
	6.1 Introduction	65
	6.2 The Median and Percentiles from a Histogram	65
	6.3 Computation of the Median and Other Percentiles	67
	6.4 Quartiles and Deciles	69
	6.5 The Cumulative Curve	70
	6.6 The Mode for Grouped Data	71
	6.7 The Mean for Grouped Data	71
	6.8 The Variance and the Standard Deviation for Grouped Data	76
	Problems	80
7	REVIEW: DETERMINANTS OF THE SHAPE OF A DISTRIBUTION	86
	7.1 Review	86
	7.2 Data That Account for the Shape of a Graph	89
	Problems	91
8	THE NORMAL DISTRIBUTION	94
	8.1 Theoretical Distributions	94
	8.2 The Normal Distribution and the Normal Curve	94
	8.3 Four Properties of the Normal Distribution	96
	8.4 Making Inferences about Terms from the Normal Distribution Table	98
	8.5 The Distribution of Shots	103

8.6	Determining Scores from Percentile Ranks	105
8.7	Applications	107
	Problems	107
<b>9</b>	<b>DISTRIBUTIONS OF SAMPLE SUMS AND SAMPLE MEANS</b>	<b>111</b>
9.1	The Central Limit Theorem	111
9.2	How Nature Uses Theorem 9.1	113
9.3	The Central Limit Theorem for Sample Means	114
9.4	Properties of the Distribution of Sample Means	116
9.5	Locating a Sample Mean in the Distribution of Sample Means	118
	Problems	122
<b>10</b>	<b>PROBABILITY AND SAMPLING FROM THE NORMAL DISTRIBUTION</b>	<b>125</b>
10.1	Probability	125
10.2	The Word Probability in Everyday Language	127
10.3	Probability and the Sampling Experiment	128
10.4	Probability and the Normal Distribution	130
10.5	Probability Statements about Sample Means	132
	Problems	134
<b>11</b>	<b>DECISION MAKING AND RISK</b>	<b>137</b>
11.1	Introduction	137
11.2	Hypothesis Testing	139
11.3	The Long-Run Outcomes with a Fair and a Biased Coin	142
	Problems	148
<b>12</b>	<b>THE HYPOTHESIS-TESTING PROCEDURE</b>	<b>150</b>
12.1	Introduction	150
12.2	When to Reject a Hypothesis; the Significance Level	152
12.3	Steps in the Hypothesis-Testing Procedure	155
12.4	Three Hypothesis-Testing Problems	158
12.5	Some New Language	162
12.6	One-Tail Tests	162
	Problems	165
<b>13</b>	<b>ESTIMATION</b>	<b>168</b>
13.1	Introduction	168
13.2	Unbiasedness of an Estimate	168
13.3	The Concept of Degrees of Freedom	172
13.4	Estimating the Variance	175
13.5	Computing Formulas for $s^2$ and $s$	178
13.6	Interval Estimation	179
13.7	Interval Estimation of the Population Mean	181
	Problems	185

14	THE <i>t</i> DISTRIBUTION AND <i>t</i> TESTS	187
	14.1 Introduction	187
	14.2 The <i>t</i> Distribution	189
	14.3 The <i>t</i> Test for the Difference between Means	193
	14.4 Application of the <i>t</i> Test for the Difference between Means	197
	Problems	200
15	INDEPENDENCE AND THE CHI SQUARE DISTRIBUTION	204
	15.1 More Than One Variable	204
	15.2 Independence	204
	15.3 Illustrations of Relatedness	206
	15.4 Presentation of Findings in a Contingency Table	208
	15.5 Expected Frequencies	209
	15.6 The Chi Square Test	211
	15.7 Chi Square for More Complex Problems	214
	Problems	218
16	REGRESSION AND PREDICTION	221
	16.1 Introduction	221
	16.2 Blind Prediction	222
	16.3 Predictor and Predicted Variables	225
	16.4 Regression	233
	Problems	236
17	CORRELATION	240
	17.1 The Concept of Correlation	240
	17.2 Correlation Construed as the Relationship between Two Sets of <i>z</i> Scores	249
	17.3 The Correlation Coefficient	251
	17.4 Computing the Correlation Coefficient	254
	Problems	258
18	CORRELATION AND LINEAR REGRESSION	263
	18.1 Introduction	263
	18.2 The Geometric Meaning of the Correlation Coefficient	266
	18.3 The Best-Fitting Line in the Scattergram of Original Data	268
	18.4 The Best-Fitting Line and Prediction	271
	18.5 Correlation and the Accuracy of Linear Prediction	277
	18.6 The Test of Significance for a Correlation Coefficient	279
	Problems	281
19	NONPARAMETRIC STATISTICAL TESTS	283
	19.1 Introduction	283
	19.2 The Rank Correlation Test	284
	19.3 Significance of Rank Correlation Coefficient	287
	19.4 The Sign Test—"Before" and "After" Data	288
	19.5 Runs	291
	19.6 Runs Relative to the Median	294
	Problems	295

20.1	Introduction	298
20.2	The Theoretical Model of the $F$ Distribution	299
20.3	Comparing More Than Two Sample Means	304
20.4	Introduction to Analysis of Variance	305
20.5	The Technique of Analysis of Variance	309
20.6	Partitioning the Sums of Squares	314
	Problems	316
	Appendixes	321
	Index	355
