

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>2</b>	<b>Basic notions</b>	<b>9</b>
2.1	Fuzzy sets . . . . .	9
2.1.1	Basic notions . . . . .	9
2.1.2	<i>L</i> -fuzzy-sets . . . . .	12
2.2	Set-theoretic operations . . . . .	13
2.2.1	Inclusion, min-intersection, max-union, complement, partition . . . . .	13
2.2.2	<i>t</i> -norms and <i>t</i> -conorms . . . . .	15
2.3	Special fuzzy sets . . . . .	19
2.3.1	Fuzzy sets on the real line . . . . .	19
2.3.2	Fuzzy sets on multi-dimensional universes . . . . .	21
2.4	Extension principle and applications . . . . .	24
2.4.1	The extension principle and other principles for extending set functions . . . . .	25
2.4.2	Extended real operations . . . . .	29
2.5	Fuzzy relations . . . . .	33
2.5.1	From ordinary to fuzzy relations . . . . .	33
2.5.2	Binary fuzzy relations and some examples . . . . .	35
2.6	Fuzzy functions . . . . .	40
2.7	Measuring the uncertainty . . . . .	44
2.7.1	Fuzziness measures . . . . .	45
2.7.2	Fuzzy measures and related topics . . . . .	48
2.7.3	Fuzzy integrals . . . . .	56
<b>3</b>	<b>Basic notions of data analysis</b>	<b>61</b>
3.1	Data . . . . .	61
3.2	Grouping and transformations . . . . .	63
3.3	Similarity and distances . . . . .	64

3.3.1	Similarity . . . . .	64
3.3.2	Distances . . . . .	66
3.3.3	Similarity coefficients . . . . .	71
3.4	Cluster analysis . . . . .	73
3.5	Evaluation of functional relationships . . . . .	79
3.6	Projection techniques . . . . .	82
<b>4</b>	<b>Fuzzy data</b>	<b>89</b>
4.1	Simple fuzzy data . . . . .	89
4.1.1	Fuzzy data vectors . . . . .	90
4.1.2	Grey-tone pictures . . . . .	96
4.1.3	Simple linguistic data . . . . .	97
4.2	Complex fuzzy data . . . . .	98
4.2.1	Modified and composed fuzzy data . . . . .	99
4.2.2	Evaluated fuzzy data . . . . .	102
4.3	Simple operations and transformations . . . . .	108
4.3.1	Aggregation, projection, addition . . . . .	109
4.3.2	Dilation and erosion . . . . .	113
<b>5</b>	<b>Qualitative analysis</b>	<b>121</b>
5.1	Fuzzy clustering . . . . .	122
5.2	Similarity of fuzzy data . . . . .	127
5.2.1	Similarity among sets . . . . .	127
5.2.2	Similarity of fuzzifying functions . . . . .	133
5.3	Fuzzy similarity of fuzzy data . . . . .	145
5.3.1	Fuzzily expressed fuzzy similarities . . . . .	145
5.3.2	Fuzzy similarity among fuzzy sets . . . . .	146
5.3.3	Handling information in knowledge bases . . . . .	151
5.4	Shape similarity . . . . .	160
5.4.1	Similarity of crisp shapes . . . . .	161
5.4.2	Description of fuzzy shapes . . . . .	167
5.4.3	Similarity of shapes using shape parameters . . . . .	176
<b>6</b>	<b>Quantitative analysis</b>	<b>185</b>
6.1	Preliminary operations . . . . .	185
6.2	Local functional approximation . . . . .	188
6.3	Global evaluation . . . . .	191
6.3.1	Transfer principles . . . . .	192
6.3.2	A practical example . . . . .	202

6.4	Global approximation of fuzzy data . . . . .	207
6.4.1	Transfer principles for belts . . . . .	208
6.4.2	Distances between fuzzy data and the fuzzy functional relationship . . . . .	209
6.4.3	Best covering fuzzifying functions . . . . .	213
6.5	Some fuzzy counterparts . . . . .	215
6.5.1	Empirical and multiphase regression . . . . .	215
6.5.2	A fuzzy analogue to partial least squares tech- nique . . . . .	221
6.5.3	Some elementary inference methods . . . . .	225
6.6	Minimization of fuzzy functions . . . . .	230
<b>7</b>	<b>Evaluation of methods</b> . . . . .	<b>241</b>
7.1	Towards a normative theory . . . . .	242
7.1.1	Descriptive and normative data analysis . . . . .	242
7.1.2	Modelling the environment of fuzzy data . . . . .	243
7.1.3	Towards a general decision theory . . . . .	249
7.2	Truth evaluation . . . . .	251
7.2.1	Truth-based identification of parametric fuzzy setups . . . . .	251
7.2.2	The special case of crisp data . . . . .	255
7.2.3	The fuzzy data case . . . . .	258
7.2.4	Simplifications for parametric functional rela- tionships . . . . .	260
7.3	Possibility evaluation . . . . .	263
7.3.1	Possibilistic inference . . . . .	263
7.3.2	The case of a one-dimensional parameter . . . . .	266
7.3.3	Possibilistic regression . . . . .	270
7.4	Probability evaluation . . . . .	273
7.4.1	Fuzzy random variables . . . . .	274
7.4.2	Fuzzy data as realization of probabilistic sets . . . . .	282
7.4.3	Fuzzy data from a fuzzy information system . . . . .	283
7.4.4	On the development of proper statistics for fuzzy data . . . . .	286
7.4.5	Regression for random fuzzy data . . . . .	288
7.4.6	Modified random set methods for fuzzy data . . . . .	295
7.5	Fuzzy measure evaluation . . . . .	300
7.5.1	Several risks . . . . .	300
7.5.2	Some results for decomposable measures . . . . .	303
