

| | | |
|-------------|---|-----------|
| | Preface | xi |
| 1 | Introduction | 1 |
| <i>1.1</i> | Numerical Analysis | 1 |
| <i>1.2</i> | Approximation | 3 |
| <i>1.3</i> | Errors | 5 |
| <i>1.4</i> | Significant Figures | 10 |
| <i>1.5</i> | Determinacy of Functions. Error Control | 16 |
| <i>1.6</i> | Machine Errors | 19 |
| <i>1.7</i> | Random Errors | 23 |
| <i>1.8</i> | Recursive Computation | 28 |
| <i>1.9</i> | Mathematical Preliminaries | 31 |
| <i>1.10</i> | Supplementary References | 38 |
| | Problems | 39 |
| 2 | Interpolation with Divided Differences | 51 |
| <i>2.1</i> | Introduction | 51 |
| <i>2.2</i> | Linear Interpolation | 52 |
| <i>2.3</i> | Divided Differences | 54 |
| <i>2.4</i> | Second-Degree Interpolation | 58 |

| | | |
|----------|--|------------|
| 2.5 | Newton's Fundamental Formula | 60 |
| 2.6 | Error Formulas | 62 |
| 2.7 | Iterated Interpolation | 66 |
| 2.8 | Inverse Interpolation | 68 |
| 2.9 | Supplementary References | 70 |
| | Problems | 71 |
| 3 | Lagrangian Methods | 80 |
| 3.1 | Introduction | 80 |
| 3.2 | Lagrange's Interpolation Formula | 81 |
| 3.3 | Numerical Differentiation and Integration | 85 |
| 3.4 | Uniform-spacing Interpolation | 89 |
| 3.5 | Newton-Cotes Integration Formulas | 91 |
| 3.6 | Composite Integration Formulas | 95 |
| 3.7 | Use of Integration Formulas | 97 |
| 3.8 | Richardson Extrapolation. Romberg Integration | 99 |
| 3.9 | Asymptotic Behavior of Newton-Cotes Formulas | 103 |
| 3.10 | Weighting Functions. Filon Integration | 107 |
| 3.11 | Differentiation Formulas | 110 |
| 3.12 | Supplementary References | 114 |
| | Problems | 116 |
| 4 | Finite-Difference Interpolation | 129 |
| 4.1 | Introduction | 129 |
| 4.2 | Difference Notations | 130 |
| 4.3 | Newton Forward- and Backward-difference Formulas | 133 |
| 4.4 | Gaussian Formulas | 136 |
| 4.5 | Stirling's Formula | 138 |
| 4.6 | Bessel's Formula | 140 |
| 4.7 | Everett's Formulas | 143 |
| 4.8 | Use of Interpolation Formulas | 144 |
| 4.9 | Propagation of Inherent Errors | 150 |
| 4.10 | Throwback Techniques | 153 |
| 4.11 | Interpolation Series | 154 |
| 4.12 | Tables of Interpolation Coefficients | 158 |
| 4.13 | Supplementary References | 161 |
| | Problems | 162 |
| 5 | Operations with Finite Differences | 174 |
| 5.1 | Introduction | 174 |

| | | |
|----------|--|------------|
| 5.2 | Difference Operators | 175 |
| 5.3 | Differentiation Formulas | 181 |
| 5.4 | Newtonian Integration Formulas | 186 |
| 5.5 | Newtonian Formulas for Repeated Integration | 189 |
| 5.6 | Central-Difference Integration Formulas | 192 |
| 5.7 | Subtabulation | 195 |
| 5.8 | Summation and Integration. The Euler-Maclaurin Sum Formula | 197 |
| 5.9 | Approximate Summation | 203 |
| 5.10 | Error Terms in Integration Formulas | 208 |
| 5.11 | Other Representations of Error Terms | 217 |
| 5.12 | Supplementary References | 222 |
| | Problems | 222 |
| 6 | Numerical Solution of Differential Equations | 240 |
| 6.1 | Introduction | 240 |
| 6.2 | Formulas of Open Type | 241 |
| 6.3 | Formulas of Closed Type | 244 |
| 6.4 | Start of Solution | 245 |
| 6.5 | Methods Based on Open-Type Formulas | 250 |
| 6.6 | Methods Based on Closed-Type Formulas. Prediction-Correction Methods | 252 |
| 6.7 | The Special Case $F = Ay$ | 257 |
| 6.8 | Propagated-Error Bounds | 265 |
| 6.9 | Application to Equations of Higher Order. Sets of Equations | 269 |
| 6.10 | Special Second-order Equations | 275 |
| 6.11 | Change of Interval | 280 |
| 6.12 | Use of Higher Derivatives | 282 |
| 6.13 | A Simple Runge-Kutta Method | 285 |
| 6.14 | Runge-Kutta Methods of Higher Order | 290 |
| 6.15 | Boundary-Value Problems | 293 |
| 6.16 | Linear Characteristic-value Problems | 297 |
| 6.17 | Selection of a Method | 301 |
| 6.18 | Supplementary References | 303 |
| | Problems | 303 |
| 7 | Least-Squares Polynomial Approximation | 314 |
| 7.1 | Introduction | 314 |
| 7.2 | The Principle of Least Squares | 314 |
| 7.3 | Least-Squares Approximation over Discrete Sets of Points | 315 |
| 7.4 | Error Estimation | 318 |

| | | |
|----------|---|------------|
| 7.5 | Orthogonal Polynomials | 327 |
| 7.6 | Legendre Approximation | 329 |
| 7.7 | Laguerre Approximation | 332 |
| 7.8 | Hermite Approximation | 334 |
| 7.9 | Chebyshev Approximation | 336 |
| 7.10 | Properties of Orthogonal Polynomials. Recursive Computation | 340 |
| 7.11 | Factorial Power Functions and Summation Formulas | 344 |
| 7.12 | Polynomials Orthogonal over Discrete Sets of Points | 348 |
| 7.13 | Gram Approximation | 350 |
| 7.14 | Example: Five-Point Least-Squares Approximation | 353 |
| 7.15 | Smoothing Formulas | 357 |
| 7.16 | Recursive Computation of Orthogonal Polynomials on Discrete Sets of Points | 363 |
| 7.17 | Supplementary References Problems | 365 365 |
| 8 | Gaussian Quadrature and Related Topics | 379 |
| 8.1 | Introduction | 379 |
| 8.2 | Hermite Interpolation | 382 |
| 8.3 | Hermite Quadrature | 385 |
| 8.4 | Gaussian Quadrature | 387 |
| 8.5 | Legendre-Gauss Quadrature | 390 |
| 8.6 | Laguerre-Gauss Quadrature | 392 |
| 8.7 | Hermite-Gauss Quadrature | 395 |
| 8.8 | Chebyshev-Gauss Quadrature | 398 |
| 8.9 | Jacobi-Gauss Quadrature | 399 |
| 8.10 | Formulas with Assigned Abscissas | 402 |
| 8.11 | Radau Quadrature | 406 |
| 8.12 | Lobatto Quadrature | 409 |
| 8.13 | Convergence of Gaussian-quadrature Sequences | 412 |
| 8.14 | Chebyshev Quadrature | 414 |
| 8.15 | Algebraic Derivations | 421 |
| 8.16 | Application to Trigonometric Integrals | 427 |
| 8.17 | Supplementary References Problems | 432 433 |
| 9 | Approximations of Various Types | 446 |
| 9.1 | Introduction | 446 |
| 9.2 | Fourier Approximation: Continuous Domain | 447 |
| 9.3 | Fourier Approximation: Discrete Domain | 452 |

| | | |
|-----------|--|------------|
| 9.4 | Exponential Approximation | 457 |
| 9.5 | Determination of Constituent Periodicities | 462 |
| 9.6 | Optimum Polynomial Interpolation with Selected Abscissas | 466 |
| 9.7 | Chebyshev Interpolation | 469 |
| 9.8 | Economization of Polynomial Approximations | 471 |
| 9.9 | Uniform (Minimax) Polynomial Approximation | 475 |
| 9.10 | Spline Approximation | 478 |
| 9.11 | Splines with Uniform Spacing | 482 |
| 9.12 | Spline Error Estimates | 485 |
| 9.13 | A Special Class of Splines | 488 |
| 9.14 | Approximation by Continued Fractions | 494 |
| 9.15 | Rational Approximations and Continued Fractions | 498 |
| 9.16 | Determination of Convergents of Continued Fractions | 502 |
| 9.17 | Thiele's Continued-Fraction Approximations | 506 |
| 9.18 | Uniformization of Rational Approximations | 514 |
| 9.19 | Supplementary References | 518 |
| | Problems | 519 |
| 10 | Numerical Solution of Equations | 539 |
| 10.1 | Introduction | 539 |
| 10.2 | Sets of Linear Equations | 539 |
| 10.3 | The Gauss Reduction | 543 |
| 10.4 | The Crout Reduction | 545 |
| 10.5 | Intermediate Roundoff Errors | 549 |
| 10.6 | Determination of the Inverse Matrix | 553 |
| 10.7 | Inherent Errors | 555 |
| 10.8 | Tridiagonal Sets of Equations | 559 |
| 10.9 | Iterative Methods and Relaxation | 561 |
| 10.10 | Iterative Methods for Nonlinear Equations | 567 |
| 10.11 | The Newton-Raphson Method | 575 |
| 10.12 | Iterative Methods of Higher Order | 578 |
| 10.13 | Sets of Nonlinear Equations | 583 |
| 10.14 | Iterated Synthetic Division of Polynomials. Lin's Method | 588 |
| 10.15 | Determinacy of Zeros of Polynomials | 595 |
| 10.16 | Bernoulli's Iteration | 598 |
| 10.17 | Graeffe's Root-squaring Technique | 602 |
| 10.18 | Quadratic Factors. Lin's Quadratic Method | 609 |
| 10.19 | Bairstow Iteration | 613 |
| 10.20 | Supplementary References | 618 |
| | Problems | 621 |

| | | |
|----------|--------------------------------------|------------|
| | Appendixes | 640 |
| <i>A</i> | Justification of the Crout Reduction | 640 |
| <i>B</i> | Bibliography | 644 |
| <i>C</i> | Directory of Methods | 659 |
| | Index | 663 |
