

CONTENTS

1. Outline	1
2. Preliminaries, problem formulation and survey of known results	7
2.1 The linear model	7
2.2 Graphs	22
2.3 State of the art	25
3. Characterizations of connected designs by means of digraphs with labeled cycles	39
3.1 Prerequisites	39
3.2 Row-column designs	51
3.3 Designs for two-way elimination of heterogeneity	59
3.4 Four-factor designs	113
3.5 Multi-factor designs	135
4. Invariance properties, reduction methods, algorithms	155
List of symbols	183
References	185
Index	189
