PART 1 INVARIANCE PRINCIPLES

| | | |
|----------|--|-----------|
| 2 | Some Basic Inequalities and Limit Theorems for Certain Stochastic Processes | 11 |
| 2.1 | Introduction, 11 | |
| 2.2 | Some Basic Results in Martingale Theory, 12 | |
| 2.3 | Weak Convergence of Probability Measures on $C[0, 1]^p$ and $D[0, 1]^p$, 16 | |
| 2.4 | Weak Invariance Principles for Some Dependent Random Variables, 27 | |
| 2.5 | An Almost Sure Invariance Principle for Martingales, 33 | |
| 2.6 | Invariance Principles for Some Empirical Processes, 36 | |
| 2.7 | Certain Boundary-Crossing Probabilities for Wiener Processes, 41 | |
| 3 | Invariance Principles for U-Statistics and von Mises' Differentiable Statistical Functions | 48 |
| 3.1 | Introduction, 48 | |
| 3.2 | U -Statistics and von Mises Functionals, 49 | |
| 3.3 | Weak Convergence of $\{U_n\}$ and $\{\theta(F_n)\}$, 56 | |

| | | |
|----------|---|------------|
| 3.4 | Embedding of Wiener Processes for $\{U_n\}$ and $\{\theta(F_n)\}$, 64 | |
| 3.5 | Brownian Bridge Approximations for Finite Population Sampling, 66 | |
| 3.6 | Weak Convergence of Generalized U -Statistics and von Mises Functionals, 71 | |
| 3.7 | Strongly Consistent Estimators of the Dispersion of U -Statistics and von Mises Functionals, 80 | |
| 3.8 | Exercises, 83 | |
| 4 | Invariance Principles for Linear Rank Statistics | 88 |
| 4.1 | Introduction, 88 | |
| 4.2 | Preliminary Notions, 88 | |
| 4.3 | Weak Convergence of $\{L_N\}$, 92 | |
| 4.4 | Skorokhod-Strassen Representation for $\{L_N\}$, 109 | |
| 4.5 | Asymptotic Linearity of L_N in Regression Parameter, 114 | |
| 4.6 | Almost Sure Convergence of $\{L_N\}$, 119 | |
| 4.7 | Exercises, 123 | |
| 5 | Invariance Principles for Signed Rank Statistics | 126 |
| 5.1 | Introduction, 126 | |
| 5.2 | Preliminary Notions, 126 | |
| 5.3 | Weak Convergence of $\{S_N\}$, 129 | |
| 5.4 | Embedding of Wiener Processes, 132 | |
| 5.5 | Asymptotic Linearity of S_N in Shift Parameter, 141 | |
| 5.6 | Weak Convergence of Aligned Signed Rank Statistics, 145 | |
| 5.7 | Almost Sure Convergence of $N^{-1}S_N$, 146 | |
| 5.8 | Exercises, 147 | |
| 6 | Invariance Principles for Rank Statistics for Testing Bivariate Independence | 150 |
| 6.1 | Introduction, 150 | |
| 6.2 | Preliminary Notions, 150 | |
| 6.3 | Weak Convergence of $\{M_N\}$ and $\{Q_N\}$, 155 | |
| 6.4 | Embedding of Wiener Processes for $\{M_N\}$ and $\{Q_N\}$, 159 | |

| | | |
|---|--|------------|
| 6.5 | A.S. Representation of M_N and Q_N in Terms of I.I.D.R.V., 163 | |
| 6.6 | Almost Sure Convergence of M_N and Q_N , 166 | |
| 6.7 | Exercises, 169 | |
| 7 | Invariance Principles for Linear Combinations of Functions of Order Statistics | 170 |
| 7.1 | Introduction, 170 | |
| 7.2 | Preliminary Notions, 170 | |
| 7.3 | Bahadur Representation of Sample Quantiles and Invariance Principles for Type I LCFOS, 172 | |
| 7.4 | Weak Convergence of Type II LCFOS, 176 | |
| 7.5 | Embedding of Wiener Processes for Type II LCFOS, 187 | |
| 7.6 | A.S. Convergence of LCFOS and some Related Functionals, 191 | |
| 7.7 | Exercises, 198 | |
| 8 | Invariance Principles for M-Estimators and Extrema of Certain Sample Functions | 203 |
| 8.1 | Introduction, 203 | |
| 8.2 | M -Estimators of Location and Regression, 204 | |
| 8.3 | Weak Invariance Principles for M -Estimators, 207 | |
| 8.4 | A.S. Representation of M -Estimators, 211 | |
| 8.5 | Asymptotic Equivalence of M -, R -, and L -Estimators, 214 | |
| 8.6 | Extrema of Certain Sample Functions, 217 | |
| 8.7 | Invariance Principles for Z_N , 221 | |
| 8.8 | Some General Remarks on Some Other Estimators, 224 | |
| 8.9 | Exercises, 227 | |
| Part 2 STATISTICAL INFERENCE | | |
| 9 | Asymptotic Theory of Nonparametric Sequential Tests | 233 |
| 9.1 | Introduction, 233 | |
| 9.2 | Some Nonparametric Sequential Tests With Power One (1), 233 | |

| | | |
|-----------|--|------------|
| 9.3 | Nonparametric Repeated Significance Tests, 243 | |
| 9.4 | Sequential Rank Order and Related Tests, 252 | |
| 9.5 | OC Function of SROT and Related Tests, 257 | |
| 9.6 | ASN of SROT and Related Tests, 266 | |
| 9.7 | Asymptotic Efficiency of SROT and Related Tests, 272 | |
| 9.8 | Exercises, 276 | |
| 10 | Asymptotic Theory of Nonparametric Sequential Estimation | 280 |
| 10.1 | Introduction, 280 | |
| 10.2 | Type A Sequential Confidence Regions, 281 | |
| 10.3 | Type B Sequential Confidence Regions, 295 | |
| 10.4 | Confidence Sequences for Parameters, 306 | |
| 10.5 | Sequential Point Estimation Based on U -Statistics, 309 | |
| 10.6 | Sequential Point Estimation of Location Based on Some R -, L -, and M -Estimators, 315 | |
| 10.7 | Some General Comments, 327 | |
| 10.8 | Exercises, 329 | |
| 11 | Nonparametric Time-Sequential Procedures | 336 |
| 11.1 | Introduction, 336 | |
| 11.2 | Preliminary Notions, 337 | |
| 11.3 | Nonparametric Testing Under Progressive Censoring, 342 | |
| 11.4 | Asymptotic Distributions of $D_{n,r}^+$ and $D_{n,r}$, 343 | |
| 11.5 | Asymptotic Power of the Tests Based on $D_{n,r}^+$ and $D_{n,r}$, 348 | |
| 11.6 | Some Additional Problems and Related Tests, 356 | |
| 11.7 | Some Quasi-Nonparametric PCS Tests, 369 | |
| 11.8 | Exercises, 376 | |
| | Appendix | 385 |
| A.1 | Introduction, 385 | |
| A.2 | Proof of Theorem 2.5.1, 385 | |
| A.3 | Proofs of Theorems 2.4.1, 2.4.2, 2.4.7, and Corollary 2.4.4.1, 389 | |

A.4 Some A.S. Linearity Theorems on Nonparametric
Statistics, 392

A.5 Some Selected Tables, 396
