Contents

Preface ix

I Introduction 1

1.1 The Background of the Book 1
1.2 The Structure of the Book 1

II General Linear Model 3

2.1 General Linear Model 3
2.1.1 Descriptive Regression 3
2.1.2 The Classical Regression Model 8
2.1.3 Linear Estimators 8
2.1.4 Mean Square Error 9
2.1.5 Admissibility of Estimators 11
2.1.6 Gauss–Markov Theorem 13
2.1.7 Estimating the Variance 15
2.1.8 Univariate Examples 15
2.1.9 The Classical Normal Regression 16
2.1.10 The Maximum-Likelihood Principle in Regression . 17
2.1.11 Testing Linear Hypotheses about the Regression Coefficients 18

2.2 Generalized Linear Model 19
2.2.1 The Aitken Estimator 19
2.2.2 Heteroscedasticity 21
2.2.3 Autoregressive Disturbances 23
2.2.4 Misspecification of the Dispersion Matrix 28
2.2.5 Estimation of Subvectors 31

2.3 Linear Restrictions and Related Problems 32
2.3.1 Multicollinearity 32
2.3.2 Restricted Least Squares 33
2.3.3 Ridge Regression 37
2.3.4 The Shrunken Estimator 40
2.3.5 Testing Linear Hypotheses 42
2.3.6 Exact Linear Restrictions in the Full Rank Case . . 44

2.4 Optimal Linear Estimators 45
2.4.1 Heterogeneous Set-Up 45
2.4.2 Homogeneous Estimation 46
2.4.3 Homogeneous Unbiased Estimation 48

III Mixed Estimation **49**

3.1 Linear Stochastic Restrictions 49
3.1.1 Sample and Prior Information 49
3.1.2 Examples of Prior Information 50
3.1.3 The Mixed Estimation Procedure 51

3.2 Auxiliary Information on σ^2 53
3.2.1 Using the Sample Information 53
3.2.2 Using a Constant 54
3.2.3 Optimal Choice of c 56
3.2.4 Comparison of $\hat{\beta}(c)$ and the GLSE 57
3.2.5 Measuring the Gain in Efficiency 59

3.3 Mixed Estimation under Incorrect Prior Information 60
3.3.1 Introduction 60
3.3.2 The Biased Mixed Estimator 61
3.3.3 Comparing the Mixed Estimator and the OLSE. . . 62
3.3.4 Ridge and Mixed Estimation 64
3.3.5 Optimal Choice of k 65

3.4 Test Procedures 68
3.4.1 Testing the Compatibility of Prior and Sample Information 68
3.4.2 Testing Linear Restrictions—the Biased Restricted Estimator 69

3.5 Alternative Estimators 73
3.5.1 Mixing Exact and Stochastic Restrictions 73
3.5.2 Auxiliary Estimates and Piecewise Regression 75

IV Minimax Estimation **80**

4.1 The Idea and Derivation of the Estimator 80
4.1.1 Introduction 80
4.1.2 Inequality Restrictions—The Concentration Ellipsoid 80
4.1.3 The Minimax Principle 82
4.1.4 The Presentation of MILE for a General Loss Matrix 83

4.2 The MILE for a Loss Matrix of Rank One 84
4.2.1 The Presentation of MILE 84
4.2.2 Connection of MILE with GLSE 86

4.2.3 Comparison with the R-optimal Biased Estimator . 87
4.2.4 MILE and Ridge Estimator 89

4.3 Minimax Estimation under Incorrect Prior Information . . 89
4.3.1 Incorrectness Caused by Rotation and/or Changing the Length of the Axes 89
4.3.2 Incorrectness Caused by Translation 92
4.3.3 Substitution of σ^2 95
4.3.4 A Numerical Example 98

4.4 Robustness of the Minimax Estimator—A Simulation Approach 99
4.4.1 Introduction 99
4.4.2 The Simulation Model 101
4.4.3 Interpretation of the Simulation Experiment 116

4.5 Further Aspects of Minimax Estimation 118
4.5.1 Admissibility of Linear Estimators with Respect to a Restrained Parameter Set 118
4.5.2 Comparison of Mixed and Minimax Estimators. . . 123
4.5.3 On the Combination of Equality and Inequality Restrictions 128

V Problems in Model Choice 132

5.1 On Prediction 132
5.1.1 Introduction 132
5.1.2 Some Simple Linear Models 132
5.1.3 Classical Prediction in Regression 135
5.1.4 Best Linear Unbiased Prediction 137
5.1.5 Further Optimal Predictors 140
5.1.6 Relationship Between Unbiased Estimation and Unbiased Prediction 141
5.1.7 Prediction Ellipsoids 142

5.2 Prediction and Model Choice 143
5.2.1 Reduced Regressor Set 143
5.2.2 Misspecified Linear Restrictions 144
5.2.3 MSE-Criterion for Model Choice 145

5.3 Two-Stage Procedures for Estimation and Model Choice . 146
5.3.1 Models with Replications of the Input Matrix 146
5.3.2 Two-Stage Restricted Estimator 149
5.3.3 Further Results on Pre-Test Estimators 153

VI Prior Information in Econometric Models 156

6.1 Multivariate and Stochastic Regression 156
6.1.1 Introduction 156

6.1.2 Prior Information and the Simultaneous-Equation Model 156
6.1.3 Single-Equation Model with Stochastic Regressors. 158
6.1.4 General Multivariate Regression. 161
6.1.5 Multivariate Contemporaneously Independent Regression 163

6.2 The Simultaneous-Equation Model. 166
6.2.1 Introduction—the Keynesian Model 166
6.2.2 Specification of the Model 167
6.2.3 The Reduced Form 169
6.2.4 Identification 171

6.3 Simultaneous-Equation Techniques Using Prior Information 172
6.3.1 The Two-Stage Least Squares (2 SLSE) 172
6.3.2 Interpretation of 2 SLSE as Aitken Estimator 174
6.3.3 The Restricted 2 SLS Estimator 176
6.3.4 A Numerical Example 178

Appendix A Matrix Results **181**

A.1 Quadratic Forms, Definiteness, etc. 181
A.2 Trace of a Matrix 186
A.3 Idempotent Matrices 187
A.4 Orthogonal Matrices 187
A.5 Kronecker Product 188
A.6 Inverse of a Matrix 188
A.7 Generalized Inverse 189
A.8 Functions of Normally Distributed Variables 190
A.9 Differentiation of Scalar Functions of Matrices 193
A.10 Miscellaneous Results, Stochastic Convergence 194

Appendix B Matrix Differentiation **197**

B.1 Introduction 197
B.2 The Trace Function 198
B.3 Differentiating Inverse Matrices 201
B.4 The Determinant 202

Glossary **204**

Bibliography **207**

Index **213**
