## PREFACE v

1. Historical review v
2. Outline of the present monograph vii
- References ix

## CHAPTER 1: MATRIX ALGEBRA 1

- 1.1. Notation and basic results 1
- 1.2. Generalized inverse of matrices 3
- 1.3. Orthogonal projection 6
- 1.4. Matrix products 8
- 1.5. Representation of matrices by vectors 10
- 1.6. Quadratic subspaces 11
- 1.7. Quasi inner products 16
- 1.8. Complements and problems 22

## CHAPTER 2: ASYMPTOTIC DISTRIBUTION OF QUADRATIC STATISTICS 31

- 2.1. Fourth order moments of quadratic statistics 31
- 2.2. Cumulants of quadratic forms of normal variables 36
- 2.3. Inequalities on moments of quadratic forms 37
- 2.4. Consistency of linear and quadratic functions of independent random variables 41
- 2.5. Asymptotic normality 47
- 2.6. Complements and problems 52

## CHAPTER 3: VARIANCE AND COVARIANCE COMPONENTS MODELS 59

- 3.1. Extensions of the Gauss–Markoff model 59
- 3.2. A general model 62
- 3.3. Models for two way classification data 64
- 3.4. Variance and covariance components 65
- 3.5. Autoregressive random effects 67
- 3.6. A general random effects model 68
- 3.7. A general multivariate model 69
- 3.8. Complements and problems 70

CHAPTER 4: IDENTIFIABILITY AND ESTIMABILITY	73
4.1. Notation	73
4.2. Identifiability	73
4.3. Unbiased estimability	75
4.4. Invariant estimability	78
4.5. Estimability of covariance parameters in growth curve models	81
4.6. Complements and problems	84
CHAPTER 5: MINIMUM NORM QUADRATIC ESTIMATION	87
5.1. The principle of MINQE	87
5.2. MINQE(U, I)	93
5.3. MINQE(U)	100
5.4. $\infty$ -MINQE(U)	102
5.5. MINQE without unbiasedness	106
5.6. MINQE(U, NND)	108
5.7. Complements and problems	123
CHAPTER 6: POOLING OF INFORMATION FOR ESTIMATION	133
6.1. Replicated model	134
6.2. Models with block structure	139
6.3. Models with a common mean	143
6.4. Complements and problems	151
CHAPTER 7: UNIFORM OPTIMALITY OF MINQE'S	161
7.1. Uniform optimality of MINQE(U, I)	162
7.2. Uniform optimality of MINQE(U)	164
7.3. Pooled observations	167
7.4. Balanced ANOVA models	172
7.5. Complements and problems	177
CHAPTER 8: COMPUTATION OF MINQE'S FOR VARIANCE-COVARIANCE COMPONENTS MODELS	181
8.1. The principal scheme of computations	181
8.2. Generalized hierarchical models	183
8.3. Some extensions of the algorithm	191
8.4. Nested classification model	199
8.5. Complements and problems	202
CHAPTER 9: ITERATED MINQE AND MLE	223
9.1. Iterated MINQE (IMINQE)	223
9.2. Maximum likelihood estimation (MLE)	229
9.3. Marginal MLE (MMLE)	235

- 9.4. Computation of MLE 237
- 9.5. Computation of the log-likelihood function 243
- 9.6. Complements and problems 248

## CHAPTER 10: ASYMPTOTIC PROPERTIES OF ESTIMATORS 257

- 10.1. Introduction 257
- 10.2. Consistency of MINQE 260
- 10.3. Asymptotic normality of MINQE(U, I) and MINQE(1) 268
- 10.4. Replicated error structure 272
- 10.5. Some results on iterated MINQE 274
- 10.6. Efficiency of iterated MINQE under normality 284
- 10.7. Large sample tests and confidence regions 288
- 10.8. Complements and problems 293

## CHAPTER 11: MINIMUM VARIANCE QUADRATIC ESTIMATION 301

- 11.1. Locally best quadratic estimators 302
- 11.2. Bayes quadratic estimates under normal distribution 309
- 11.3. Hsu's theorem and extensions 317
- 11.4. Complements and problems 323

## CHAPTER 12: APPLICATIONS TO SELECTION PROBLEMS 329

- 12.1. Selection rules 329
- 12.2. Simultaneous prediction in linear models 333
- 12.3. Simultaneous prediction in a multivariate case 341
- 12.4. Estimation in a mixed linear model 343
- 12.5. Complements and problems 348
