<i>Preface</i>	xiii
<i>Acknowledgements</i>	xiv
<i>Introduction</i>	xv
1. Populations and samples	1
1.1 Populations	1
1.2 Samples	2
1.3 How to choose a (simple) random sample	4
Summary	7
Exercises	7
2. Tabular and graphical summaries of data	9
2.1 Introduction	9
2.2 Kinds of data	9
2.3 Summarizing qualitative data	10
2.4 Summarizing quantitative data	14
2.5 Population distributions for continuous variates	20
Summary	21
Exercises	22
3. Numerical summary of data – sample statistics	33
3.1 Measures of location	33
3.2 Which measure of location?	35
3.3 Variance and standard deviation	36
3.4 Notation	37
3.5 Grouped data	38
3.6 Variability of sample means	41
Summary	42
Exercises	43
4. Association between variables	46
4.1 Introduction	46
4.2 Correlation	47
4.3 Simple linear regression	49
4.4 A real association?	56
4.5 Cause and effect	59

Summary	59
Exercises	59
5. <i>Testing hypotheses</i>	65
5.1 Introduction	65
5.2 Probability	65
5.3 Probability distributions	67
5.4 Testing a hypothesis	72
5.5 Problems of hypothesis testing	78
5.6 Estimation	80
Summary	81
Exercises	81
6. <i>Published statistics</i>	85
6.1 The collection of data	85
6.2 UK published statistics	86
6.3 Reliability	90
6.4 Consistency	91
6.5 Official statistics in the developing countries	92
Summary	94
Exercises	94
7. <i>Delving in tables</i>	95
7.1 Introduction	95
7.2 Tabular presentation	95
7.3 Writing about tables	97
Summary	98
Exercises	98
8. <i>Changes with time – index numbers</i>	103
8.1 Introduction	103
8.2 Simple indices	103
8.3 Weighted indices	104
8.4 Comments on the Laspeyres (L) and Paasche (P) indices	106
8.5 Changing the base	106
8.6 UK Index of Retail Prices	107
8.7 UK Index of Industrial Production	108
Summary	109
Exercises	109
9. <i>Demography – introduction</i>	111
9.1 The importance of demographic studies	111
9.2 Dynamics of population change	112

9.3 Demographic transition	112
9.4 Age–sex profiles	113
9.5 Cohorts	119
Summary	120
Exercises	120
10. <i>Components of population change</i>	122
10.1 Death	122
10.2 Marriage	130
10.3 Fertility (live births)	131
10.4 Migration	133
Summary	134
Exercises	134
11. <i>Population projection</i>	139
11.1 Reliability of projections	139
11.2 An example	140
Summary	142
Exercises	142
12. <i>Changes with time – time series</i>	144
12.1 Introduction	144
12.2 Smoothing times series	144
12.3 Components of time series	147
Summary	150
Exercises	150
13. <i>Data analysis and the computer</i>	152
13.1 The computer	152
13.2 The analysis	153
Summary	160
Exercises	160
14. <i>Social surveys</i>	161
14.1 The basic framework	161
14.2 Pilot study	161
14.3 Methods of data collection	162
14.4 Confidentiality	165
14.5 Questionnaire design	165
14.6 Analysis	170
14.7 The report	171
Summary	171
Exercises	172

15. <i>Schemes of investigation</i>	174
15.1 Introduction	174
15.2 Problems	174
15.3 Matching	179
15.4 Randomization	180
Summary	181
Exercises	181
16. <i>Controlled experiments</i>	183
16.1 Twin studies	183
16.2 'Blocking'	184
16.3 Confounding	186
16.4 Factorial treatment combinations	186
16.5 Clinical trials	188
Summary	189
Exercises	189
17. <i>Sampling schemes</i>	191
17.1 Introduction	191
17.2 Systematic sampling	191
17.3 Simple random sampling from a sequence	192
17.4 Stratified sampling	193
17.5 Multistage sampling	195
17.6 Quota sampling	198
17.7 Standard errors	198
Summary	199
Exercises	199
18. <i>Longitudinal studies and interrupted time series</i>	201
18.1 Prevalence	201
18.2 Incidence	201
18.3 Cross-sectional versus longitudinal surveys	202
18.4 Interrupted time series studies	203
Summary	208
Exercises	209
19. <i>Smoking and lung cancer</i>	210
19.1 Introduction	210
19.2 Experiments	210
19.3 Published figures	210
19.4 Retrospective studies	211
19.5 Prospective studies	211

Summary	212
Exercises	212
20. An overview	214
<i>Glossary of symbols</i>	217
<i>Index</i>	219
