

## CONTENTS

Preface . . . . .	vii
<b>1. <i>The Art of Computation</i></b> . . . . .	<b>1</b>
1.1 Errors and Blunders . . . . .	1
1.2 Composition of Error . . . . .	4
1.3 Propagated Error and Significant Figures . . . . .	6
1.4 Generated Error . . . . .	7
1.5 Complete Error Analyses . . . . .	10
1.6 Statistical Estimates of Error . . . . .	14
1.7 Bibliographic Notes . . . . .	15
<b>2. <i>Matrices and Linear Equations</i></b> . . . . .	<b>17</b>
2.1 Iterative Methods . . . . .	44
2.2 Direct Methods . . . . .	65
2.3 Some Comparative Evaluations . . . . .	81
2.4 Bibliographic Notes . . . . .	83
<b>3. <i>Nonlinear Equations and Systems</i></b> . . . . .	<b>86</b>
3.1 The Graeffe Process . . . . .	106
3.2 Bernoulli's Method . . . . .	114
3.3 Functional Iteration . . . . .	118
3.4 Systems of Equations . . . . .	132
3.5 Complex Roots and Methods of Factorization . . . . .	138
3.6 Bibliographic Notes . . . . .	141
<b>4. <i>The Proper Values and Vectors of a Matrix.</i></b> . . . . .	<b>143</b>
4.1 Iterative Methods . . . . .	150
4.2 Direct Methods . . . . .	166
4.3 Bibliographic Notes . . . . .	184
<b>5. <i>Interpolation</i></b> . . . . .	<b>185</b>
5.1 Polynomial Interpolation . . . . .	193
5.2 Trigonometric and Exponential Interpolation . . . . .	211
5.3 Bibliographic Notes . . . . .	213

<i>6. More General Methods of Approximation</i>	. . . . .	215
6.1 Finite Linear Methods	. . . . .	215
6.2 Chebyshev Expansions	. . . . .	223
6.3 Bibliographic Notes	. . . . .	225
<i>7. Numerical Integration and Differentiation</i>	. . . . .	226
7.1 The Quadrature Problem in General	. . . . .	226
7.2 Numerical Differentiation	. . . . .	231
7.3 Operational Methods	. . . . .	232
7.4 Bibliographic Notes	. . . . .	241
<i>8. The Monte Carlo Method</i>	. . . . .	242
8.1 Numerical Integration	. . . . .	243
8.2 Random Sequences	. . . . .	245
8.3 Bibliographic Notes	. . . . .	246
<b>Bibliography</b>	. . . . .	247
<b>Problems</b>	. . . . .	263
<b>Index</b>	. . . . .	269
