

TABLE OF CONTENTS

PREFACE		VII
CHAPTER 1	A HEURISTIC INTRODUCTION TO EXPERIMENTAL DESIGN	1
CHAPTER 2	OPTIMUM STATISTICAL EXPERIMENTAL DESIGN AS A BRANCH OF MATHEMATICAL STATISTICS	5
	2.1. The Statistical Decision Problem	5
	2.2. Demonstration of the Statistical Decision Problem Using Simple Examples	7
	2.2.1. Estimating the Expectation and Variance of a Normal Distribution in V^0	7
	2.2.2. Estimation Problems in Simple Linear Regression Model I	12
	2.2.2.1. Estimating the Slope β_1	13
	2.2.2.2. Estimation of the Regression Function	20
	2.2.3. Further Parameter Estimation Problems	26
	2.2.4. Experimental Design and Analysis with Restricted Data Measurement	27
	2.2.4.1. Description of the Circumstances of the Experiment	27
	2.2.4.2. Estimating the Expected Value of a Normal Distribution in V^0	27
CHAPTER 3	DEFINITION OF THE MOST IMPORTANT EXPERIMENTAL DESIGNS	35
	3.1. General Definition of an Experimental Design	35
	3.2. Simple Experimental Designs	36
	3.3. Experimental Designs for Eliminating the Effects of Disturbance Factors — Block Designs	37
	3.4. Experimental Designs for Eliminating two Disturbance Factors — Double Block Designs	49
CHAPTER 4	PROPERTIES AND THE CONSTRUCTION OF BLOCK DESIGNS	57
	4.1. Properties	57
	4.1.1. General Properties of Balanced Block Designs	57

4.1.2.	Properties of Resolvable Block Designs	71
4.1.3.	Elementary BIB's and BIB's with Repeated Blocks	74
4.2.	Construction and Existence	79
4.2.1.	Construction	79
4.2.2.	Existence	111
CHAPTER 5	THE NUMBER OF NONISOMORPHIC ELEMENTARY BIB IN RESTRICTED (v, k) -FAMILIES	113
CHAPTER 6	THE ANALYSIS OF BLOCK DESIGNS	123
6.1.	Models for Analysis and the Concept of Randomization	123
6.2.	Special Models	125
6.2.1.	Model I for Block Designs	126
6.2.2.	Mixed Model for Block Designs	128
6.3.	Statistical Analysis for Model I	130
6.3.1.	Estimation of Parameters for BCB	132
6.3.2.	Estimation of Parameters for BIB	134
6.3.3.	Selection Procedures	135
6.3.4.	Comparison of Means	139
6.4.	Remarks on Analysis in the Case of Mixed Models	142
6.5.	Robustness of Designs	143
6.5.1.	Robustness Against Missing Observations	143
6.5.2.	Robustness Against Special Model Violations	146
CHAPTER 7	THE CHOICE OF OPTIMAL EXPERIMENTAL DESIGNS	147
7.1.	The Most Important Classical Optimality Criteria	148
7.2.	The Optimal Selection of Simple Experimental Designs	149
7.3.	Choosing the Optimal Block Design	152
CHAPTER 8	APPENDIX	163
8.1.	Symbols	163
8.2.	Mathematical Tools	165
8.2.1.	Galois Fields	165
8.2.2.	Finite Projective Geometries	166
8.2.3.	Finite Euclidean Geometries	168
8.2.4.	Partitions, Dual Partitions, and Majorization	168
8.3.	Tables	170
BIBLIOGRAPHY		186
