Contents

Preface v

1 INTRODUCTION 1
1.1 Distribution functions and characteristic functions 1
1.2 Conditions on characteristic functions 4
1.3 Infinite divisibility 12
1.4 Analytic characteristic functions 14

2 MOMENTS OF ARBITRARY POSITIVE ORDER 17
2.1 Existence of moments; behaviour of distribution functions and characteristic functions 17
2.2 Expansion of characteristic functions 21
2.3 Fractional moments and fractional derivatives 25

3 ESTIMATION OF THE CLOSENESS OF DISTRIBUTION FUNCTIONS .. 31
3.1 Distance definitions 31
3.2 Esseen's results and their extension 33
3.3 Distances in the Lévy metric 38

4 EXTENSIONS OF THE CONCEPT OF STABLE DISTRIBUTIONS 45
4.1 Generalizations of stable distributions 45
4.2 Self-decomposable distributions 47

5 UNIMODALITY 49
5.1 Conditions for unimodality 49
5.2 Convolutions of unimodal distributions 50
5.3 Strong unimodality 53
5.4 Unimodality of stable and self-decomposable distributions .. 57

6 FACTORIZATIONS AND INFINITE DIVISIBILITY 64
6.1 Some properties of absolutely continuous or discrete infinitely divisible distributions 64
6.2 Tail behaviour of infinitely divisible distributions 68
6.3 Decomposition of symmetric stable distributions 70
6.4 Certain indecomposable distributions 71

7 ANALYTIC CHARACTERISTIC FUNCTIONS 76
7.1 Analytic continuation of analytic characteristic functions .. 76
7.2 Entire characteristic functions satisfying certain conditions .. 80
7.3 Entire characteristic functions of order 2 with a finite number of zeros 86
7.4 Special families of entire and analytic characteristic functions 92
7.5 Convolution of Poisson type distributions 101
7.6 I_0 contains convolutions of Poisson type distributions 103

8 INFINITELY DIVISIBLE DISTRIBUTIONS DETERMINED BY THEIR VALUES ON A HALF-AXIS 105
8.1 The case of the normal distribution 105
8.2 Generalizations of Theorem 8.1.1 110

9 A GENERALIZATION OF THE DECOMPOSITION PROBLEM 112
9.1 α-decompositions 112
9.2 The class I_0^{α} 114

10 BOUNDARY CHARACTERISTIC FUNCTIONS 116

11 MIXTURES OF DISTRIBUTION FUNCTIONS 119
11.1 Infinite divisibility of mixtures 119
11.2 Mixtures of exponential distributions which are not infinitely divisible 121

12 ANALYTIC DISTRIBUTION FUNCTIONS 123
12.1 Definition of analytic distribution functions and some of their properties 123
12.2 Continuation of distribution functions 127
12.3 Limit theorems and restricted convergence 128

13 METRICS IN THE SPACE OF DISTRIBUTION FUNCTIONS 131
13.1 Properties of metrics defined on a set X; comparison of metrics 131
13.2 The case where X is the set of distribution functions 134
13.3 Metrics on the set of characteristic functions 135

14 RIDGE FUNCTIONS 139
14.1 Definition of ridge functions and the existence of ridge functions which are not analytic characteristic functions .. 139
14.2 Elementary properties of ridge functions 141
14.3 Factorization of ridge functions 143
14.4 Entire ridge functions 147

15 FUNCTIONS OF BOUNDED VARIATION 150
15.1 Fourier–Stieltjes transforms of functions of bounded variation 151
15.2 Decomposition of functions of bounded variation 153

APPENDIX 164
