

Contents

Preface ix

Dedication xi

Perspectives and basic principles

1. Perspectives on XPS and AES 1

David Briggs and John T. Grant

2. XPS: Basic Principles, Spectral Features and Qualitative Analysis 31

David Briggs

3. AES: Basic Principles, Spectral Features and Qualitative Analysis 57

John T. Grant

Sample handling, instrumentation and beam effects

4. Specimen Preparation and Handling 89

Joseph Geller

5. XPS: Instrumentation and Performance 117

Ian W. Drummond

6. AES Instrumentation and Performance 145

Masato Kudo

7. Instrument Calibration for AES and XPS 167

Martin P. Seah

8. Analysing Insulators with XPS and AES 191

Michael A. Kelly

9. Beam Effects During AES and XPS Analysis 211

Don R. Baer, Dan J. Gaspar, Mark H. Engelhard and A.Scott Lea

Surface sensitivity

10. Electron Transport in Solids 235

Wolfgang S.M. Werner

11. Electron Attenuation Lengths 259

Shigeo Tanuma

Quantification

12. Quantification of Nano-structures by Electron Spectroscopy 295
Sven Tougaard

13. Quantification in AES and XPS 345
Martin P. Seah

Spectral interpretation

14. The Use of Chemometrics in AES and XPS Data Treatment 377
William F. Stickle

15. XPS Lineshapes and Curve Fitting 397
Neal Fairley

16. Chemical Effects in XPS 421
Laszlo Kövér

17. Chemical Information from Auger Lineshapes 465
David E. Ramaker

18. The Auger Parameter 501
Giuliano Moretti

19. Valence Bands Studied by XPS 531
Peter M.A. Sherwood

Structural effects

20. Structural Effects in XPS and AES: Diffraction 557
J. Osterwalder

21. Electron Backscattering and Channelling 587
Ding Ze-jun and Ryuichi Shimizu

Depth profiling

22. Sputter Depth Profiling in AES and XPS 619
Thomas Wagner, Jiang Y. Wang and Siegfried Hofmann

23. Angle-Resolved X-Ray Photoelectron Spectroscopy 651
Peter J. Cumpson

Imaging

24. XPS Imaging 677
Kateryna Artyushkova and Julia E. Fulghum

25. Processing, Interpretation and Quantification of Auger Images
Martin Prutton

Developing aspects

26. X-ray Photoelectron Spectroscopy and Imaging at Synchrotrons	733
<i>G. Margaritondo</i>	
27. Total Reflection X-ray Photoelectron Spectroscopy	749
<i>Yoshitoki Iijima</i>	
28. Ion-Excited Auger Electron Spectroscopy	763
<i>John T. Grant</i>	
29. Positron-Annihilation-Induced Auger Electron Spectroscopy	775
<i>Toshiyuki Ohdaira and Ryoichi Suzuki</i>	
30. Electron Coincidence Measurements	787
<i>Stephen M. Thurgate</i>	
31. Recent Developments in the Theory of Auger Spectroscopy	797
<i>Peter Weightman</i>	

Appendices

A. Peak Positions from Mg X-Rays and from Al X-Rays by Atomic Number	815
B. Peak Positions from Mg X-Rays and from Al X-Rays in Numerical Order	821
C. Auger Kinetic Energies and Sensitivity Factors by Atomic Number	825
D. Auger Kinetic Energies in Numerical Order	831
E. Polymer C 1s Chemical Shifts	839
F. Comparing Beam Damage Rates Using Susceptibility Tables	843
<i>D.R. Baer, M.H. Engelhard, A.S. Lea and D.J. Gaspar</i>	
G. Manufacturers of AES and XPS Systems	857
<i>John T. Grant</i>	
H. Software for Processing AES and XPS Data	861
<i>John T. Grant</i>	
I. Databases	869
<i>John T. Grant</i>	

J. Measurement and Documentary Standards	875
<i>John T. Grant</i>	
K. Internet Resources	881
<i>John T. Grant</i>	
Subject Index	885
