CHAPTER 1	DESCRIPTIVE STATISTICS	1
	What is Statistics?	1
	The Data,	1
	Description of the Data,	3
	Problems in Practice,	11
	Summary,	13
	References,	13
	Problems,	14
CHAPTER 2	STATISTICAL INFERENCE: POPULATIONS AND SAMPLES	15
	Distributions for Populations and Samples,	16
	Parameters and Statistics,	16
	The Expected Value,	16
	Important Population Parameters,	17
	The Simple Random Sample,	18
	Statistical Independence,	20
	Linear Combinations of Variables and Their Parameters,	20
	The Normal Distribution,	24
	Areas Under the Normal Curve,	26
	The Distribution of the Sample Mean,	26
	Discussion,	29
	Summary,	30
	References,	30
	Problems,	31

CHAPTER 3	INFERENCE FROM A SINGLE SAMPLE	32
	A Confidence Interval for μ , 35	
	Tests of Hypotheses on the Population Mean, 37	
	Inference Concerning the Mean When the Population Variance is Known, 41	
	Inference Concerning the Population Variance, 42	
	Illustrative Example, 44	
	Summary of Confidence Intervals and Tests for the Single Sample, 44	
	References, 46	
	Problems, 46	
CHAPTER 4	SAMPLES FROM TWO POPULATIONS	48
	The Pooled Estimate of the Variance, 50	
	Confidence Interval for the Difference Between Two Population Means, 50	
	Testing the Equality of Two Means, 52	
	Confidence Intervals and Tests With Known Variances, 53	
	A Confidence Interval for the Variance, 53	
	Testing the Equality of Variances, 54	
	Distributions Related to the Normal Distribution, 56	
	Illustrative Example, 56	
	Summary, 59	
	References, 59	
	Problems, 60	
CHAPTER 5	ONE-WAY ANALYSIS OF VARIANCE	62
	Model I, 63	
	The Assumptions, 65	
	Estimates of Parameters, 65	
	Division of the Basic Sum of Squares, 67	
	Analysis of Variance Table, 70	
	Estimation of Parameters, 73	
	Unequal Sample Sizes, 79	
	Confidence Intervals With an Overall Confidence Level, 80	
	Multiple Tests, 83	

CONTENTS

	Illustrative Example, 83	
	Summary, 85	
	References, 85	
	Problems, 86	
CHAPTER 6	SINGLE FACTOR ANALYSIS OF VARIANCE—OTHER DESIGNS	90
	The Randomized Complete Block Design, 90	
	Hierarchical or Nested Design, 99	
	The Latin Square, 115	
	Illustrative Example, 124	
	Summary, 125	
	References, 126	
	Problems, 126	
CHAPTER 7	CROSS CLASSIFICATIONS	131
	The Two-Way Classification, 132	
	The Three-Way Classification, 145	
	Illustrative Example, 156	
	Review of Designs, 159	
	Summary, 164	
	References, 164	
	Problems, 165	
CHAPTER 8	FACTORIAL DESIGNS WITH ALL FACTORS AT TWO LEVELS	170
	Example, 170	
	Symbolic Notation, 172	
	Orthogonal Linear Combinations, 177	
	Computational Method, 178	
	The Case of n Larger than 1, 182	
	The Case of r Blocks, 182	
	Confounding Block Effects in a 2^k Factorial Design, 184	
	Fractional Replicated Designs, 190	
	Summary, 195	
	References, 195	
	Problems, 195	

CHAPTER 9	OTHER MODELS IN THE ANALYSIS OF VARIANCE	197
	The Mathematical Models, 198	
	Parameters to be Estimated, 201	
	Analysis of Variance Table, 202	
	<i>F</i> Tests, 204	
	Estimation of Variance Components, 206	
	Estimation of Linear Combinations of Means, 209	
	A Conservative <i>F</i> Test, 214	
	An Approximate <i>F</i> Test, 214	
	Rule For Obtaining the EMS Column, 215	
	Summary, 218	
	References, 218	
	Problems, 219	
CHAPTER 10	LINEAR REGRESSION AND CORRELATION	221
	Linear Regression, 221	
	Sampling From the Joint Normal Distribution of <i>X</i> and <i>Y</i> , 239	
	Illustrative Examples, 246	
	Summary, 248	
	References, 248	
	Problems, 249	
CHAPTER 11	MULTIPLE REGRESSION AND CORRELATION	252
	The Regression of <i>Y</i> on Several Variables, 252	
	Sampling From the Joint Normal Distribution, 275	
	Extensions of Multiple Regression, 285	
	**An Example of a Desk Calculator Solution of Linear Equations, 285	
	Illustrative Example, 286	
	Summary, 288	
	References, 289	
	Problems, 289	
CHAPTER 12	POLYNOMIAL REGRESSION	295
	The Least Squares Solution, 295	
	An Example, 297	
	The Model, 300	
	The Analysis of Variance and <i>F</i> Tests, 300	
	Confidence Intervals for Parameters, 302	

Orthogonal Polynomials,	304	
Illustrative Example,	304	
Summary,	305	
References,	305	
Problems,	306	
CHAPTER 13	ANALYSIS OF COVARIANCE	307
An Example,	308	
An Underlying Model,	309	
Preliminary Procedures in a Covariance Analysis,	309	
The Analysis of Covariance Table,	311	
Least Squares Lines Under Several Hypotheses,	317	
A Division of the Basic Sum of Squares,	320	
F Tests,	322	
Confidence Interval Estimates of Parameters,	324	
Adjusted Means,	327	
Confidence Intervals When Population Regression Lines are Not Parallel,	328	
Fitting a Line to Weighted Means,	328	
Discussion,	329	
Summary,	332	
References,	332	
Problems,	333	
CHAPTER 14	DATA SCREENING	336
Post Hoc Review of Data,	336	
Data Screening in Analysis of Variance Problems,	337	
Data Screening in Regression Analysis,	347	
Summary,	351	
References,	352	
APPENDIX		355
Table A.1 The Standard Normal Distribution	357	
Table A.2 Percentage Points $t[\lambda; \nu]$ of Student's t Distribution	360	
Table A.3 Percentage Points $\chi^2[\lambda; \nu]$ of the χ^2 Distribution	363	
Table A.4 Percentage Points $F[\lambda; \nu_1, \nu_2]$ of the F Dis-		

CONTENTS

tribution	365
Table A.5 Percentiles of the Distribution of the Studentized Range	371
Table A.6 Values of $z = \frac{1}{2} \log(1+r)/(1-r)$	373
Table A.7 Percentage Points of the Distribution of r_{10}	374
Table A.8 Percentage Points of T_n or T_1	376
Table A.9 Coefficients $\{a_{n-i+1}\}$ For the W Test for Normality	378
Table A.10 Percentage Points of the W Test	381
