List of Tables xix

List of Figures xxi

44 Systems of Continuous Multivariate Distributions 1

1 Introduction, 1
2 Historical Remarks, 4
3 Multivariate Generalization of Pearson System, 6
4 Series Expansions and Multivariate Central Limit Theorems, 10
5 Translation Systems, 20
6 Multivariate Linear Exponential-Type Distributions, 28
7 Sarmanov's Distributions, 30
8 Multivariate Linnik's Distributions, 33
9 Multivariate Kagan's Distributions, 34
10 Generation of Multivariate Nonnormal Random Variables, 36
11 Fréchet Bounds, 44
12 Fréchet, Plackett and Mardia's Systems, 47
13 Farlie-Gumbel-Morgenstern Distributions, 51
14 Multivariate Phase-Type Distributions, 62
15 Chebyshev-Type and Bonferroni Inequalities, 63
16 Singular Distributions, 67
17 Distributions with Almost-Lack of Memory, 69
18 Distributions with Specified Conditionals, 70
19 Distributions with Given Marginals, 73
20 Measures of Multivariate Skewness and Kurtosis, 77

Bibliography, 85

45 Multivariate Normal Distributions **105**

1 Introduction and Genesis, 105
2 Definition and Moments, 107
3 Other Properties, 111
4 Order Statistics, 116
5 Evaluation of Multivariate Normal Probabilities, 121
5.1 Reduction Formulas, 125
5.2 Orthant Probabilities, 127
5.3 Some Special Cases, 133
5.4 Approximations, 139
6 Quadrivariate Normal Orthant Probabilities, 145
7 Characterizations, 151
8 Estimation, 161
8.1 Estimation of $\boldsymbol{\xi}$, 161
8.2 Estimation of $\boldsymbol{V}$, 178
8.3 Estimation of Correlations, 182
8.4 Estimation Under Missing Data, 183
8.5 Estimation Under Special Structures, 187
8.6 Estimation of Functions of $\boldsymbol{\xi}$ and $\boldsymbol{V}$, 196
9 Tolerance Regions, 200
10 Truncated Multivariate Normal Distributions, 204
11 Related Distributions, 211
12 Mixtures of Multivariate Normal Distributions, 220
13 Complex Multivariate Normal Distributions, 222
Bibliography, 223

46 Bivariate and Trivariate Normal Distributions **251**

1 Definition and Applications, 251
2 Historical Remarks, 252
3 Properties and Moments, 253
4 Bivariate Normal Integral–Tables and Approximations, 264
5 Characterizations, 277
6 Order Statistics, 281
7 Trivariate Normal Integral, 287

8 Estimation, 293
8.1 Bivariate Normal Distribution, 293
8.2 Trivariate Normal Distributions, 310
9 Truncated Bivariate and Trivariate Normal Distributions, 311
10 Dichotomized Variables, 320
10.1 Tetrachoric Correlation, 320
10.2 Biserial Correlation, 324
11 Related Distributions, 326
11.1 Mixtures of Bivariate Normal Distributions, 326
11.2 Bivariate Half Normal Distribution, 326
11.3 Distribution of Ratios, 327
11.4 "Bivariate Normal" Distribution with Centered Normal Conditionals, 328
11.5 Bivariate Skew-Normal Distribution, 331
Bibliography, 333

47 Multivariate Exponential Distributions 349

1 Introduction, 349
2 Bivariate Exponential Distributions, 350
2.1 Introduction, 350
2.2 Gumbel's Bivariate Exponentials, 350
2.3 Freund's Bivariate Exponential (Bivariate Exponential Mixture Distributions), 355
2.4 Marshall and Olkin's Bivariate Exponential, 362
2.5 Friday and Patil's Bivariate Exponential, 369
2.6 Arnold and Strauss' Bivariate Exponential, 370
2.7 Moran and Downton's Bivariate Exponential, 371
2.8 Singpurwalla and Youngren's Bivariate Exponential, 377
2.9 Raftery's Bivariate Exponential, 377
2.10 Hayakawa's Bivariate Exponential, 379
2.11 Lindley and Singpurwalla's Bivariate Exponential Mixture, 380
2.12 Ghurye's Extended Bivariate Lack of Memory Distribution, 383
2.13 Cowan's Bivariate Exponential, 385
2.14 Infinite Divisibility, 385
2.15 Characterizations, 386

3 Multivariate Exponential Distributions, 387
3.1 Freund's Multivariate Exponential, 388
3.2 Marshall and Olkin's Multivariate Exponential, 391
3.3 Block and Basu's Multivariate Exponential, 396
3.4 Olkin and Tong's Multivariate Exponential, 398
3.5 Marshall and Olkin's Multivariate Exponential with Limited Memory, 399
3.6 Moran and Downton's Multivariate Exponential, 400
3.7 Raftery's Multivariate Exponential, 401
3.8 Krishnamoorthy and Parthasarathy's Multivariate Exponential, 403
3.9 Characterizations, 403
4 Multivariate Weibull Distributions, 407
5 Bivariate Distributions Induced by Frailties, 412
Bibliography, 416

48 Multivariate Gamma Distributions **431**

1 Introduction, 431
2 Bivariate Gamma Distributions, 432
2.1 McKay's Bivariate Gamma, 432
2.2 Cheriyan and Ramabhadran's Bivariate Gamma, 432
2.3 Kibble and Moran's Bivariate Gamma, 436
2.4 Sarmanov's Bivariate Gamma, 437
2.5 Jensen's Bivariate Gamma, 438
2.6 Royen's Bivariate Gamma, 440
2.7 Farlie–Gumbel–Morgenstern-Type Bivariate Gamma, 441
2.8 Prékopa and Szántai's Bivariate Gamma, 442
2.9 Smith, Adelfang and Tubb's Bivariate Gamma, 443
2.10 Dussauchoy and Berland's Bivariate Gamma, 445
2.11 Becker and Roux and Steel and le Roux's Bivariate Gamma, 446
2.12 Schmeiser and Lal's Bivariate Gamma, 450
2.13 Bivariate Chi-Square Distributions, 451
3 Multivariate Gamma Distributions, 454
3.1 Cheriyan and Ramabhadran's Multivariate Gamma, 454
3.2 Gaver's Multivariate Gamma, 456
3.3 Krishnamoorthy and Parthasarathy's Multivariate Gamma and Its Extension, 457

3.4 Prékopa and Szántai's Multivariate Gamma, 458
3.5 Kowalczyk and Tyrcha's Multivariate Gamma, 459
3.6 Royen's Multivariate Gamma, 461
3.7 Mathai and Moschopoulos's Multivariate Gamma, 465
3.8 Dussauchoy and Berland's Multivariate Gamma, 470
4 Multivariate (Jensen-Type) Chi-Square Distributions, 471
5 Noncentral Multivariate Chi-Square (Gamma) Distributions, 475
6 Infinite Divisibility of Multivariate Gamma, 477
Bibliography, 478

49 Dirichlet and Inverted Dirichlet Distributions 485

1 Dirichlet Distributions, 485
2 Inverted Dirichlet Distribution, 491
3 Characteristic Functions, 495
4 Evaluation of Probability Integrals of Dirichlet Distributions, 497
5 Characterizations, 500
6 Estimation, 504
7 Applications, 507
8 Generalizations, 512
8.1 Generalized Dirichlet Distribution as a Prior for Multinomial Parameters, 512
8.2 Antelman's Generalization, 514
8.3 Johnson and Kotz's Generalization, 515
8.4 Delta-Dirichlet Distributions, 515
8.5 Connor and Mosimann's Generalization, 519
Bibliography, 523

50 Multivariate Liouville Distributions 529

1 Introduction, 529
2 Definitions, 530
3 Properties, 531
4 Moments and Covariance Structure, 536
5 Characterizations, 538
6 Estimation and Applications, 541

7 Sign-Symmetric Dirichlet and Liouville Distributions, 544
8 Multivariate p-order Liouville Distributions, 547
Bibliography, 548

51 Multivariate Logistic Distributions **551**

1 Introduction, 551
2 Gumbel–Malik–Abraham Distribution, 552
3 Frailty and Archimedean Distributions, 559
4 Farlie–Gumbel–Morgenstern Distributions, 561
5 Differences of Extreme Value Variables, 562
6 Mixture Forms, 564
7 Geometric Minima and Maxima, 565
8 A General Flexible Model, 568
9 Conditionally Specified Logistic Model, 569
10 Some Other Generalizations, 570
Bibliography, 573

52 Multivariate Pareto Distributions **577**

1 Introduction, 577
2 Forms of Univariate Pareto Distributions, 577
3 Bivariate Pareto Distributions, 579
3.1 Bivariate Pareto of the First Kind, 579
3.2 Mardia's Bivariate Pareto of the Second Kind, 584
3.3 Bivariate Pareto of the Fourth Kind, 585
3.4 Conditionally Specified Bivariate Pareto, 587
3.5 Muliere and Scarsini's Bivariate Pareto, 595
3.6 Bilateral Bivariate Pareto, 596
3.7 Bivariate Semi-Pareto, 598
4 Multivariate Pareto Distributions, 599
4.1 Multivariate Pareto of the First Kind, 599
4.2 Multivariate Pareto of the Second Kind, 602
4.3 Multivariate Pareto of the Third Kind, 605
4.4 Multivariate Pareto of the Fourth Kind, 606
4.5 Conditionally Specified Multivariate Pareto, 611
4.6 Marshall–Olkin-Type Multivariate Pareto, 612
4.7 Multivariate Semi-Pareto, 614

Bibliography, 615

53 Bivariate and Multivariate Extreme Value Distributions **621**

1 General Bivariate Extreme Value Distributions, 622
1.1 Definition, 622
1.2 Properties, 622
2 Special Bivariate Extreme Value Distributions, 624
2.1 Type A Distributions, 626
2.2 Type B Distributions, 628
2.3 Type C Distributions, 629
2.4 Normal-Like Bivariate Extreme Value Distributions, 632
2.5 Estimation, 637
3 Multivariate Extreme Value Distributions, 640
Bibliography, 652

54 Natural Exponential Families **659**

1 Introduction, 659
2 Multivariate Natural Exponential Families, 660
3 Multivariate General Exponential Families, 665
4 Parameterization by the Mean and Steepness, 667
5 Variance Function, 669
6 Affine Transformations and Convolution: The Exponential Dispersion Model, 670
7 Some Statistical Results for NEFs, 673
7.1 Sufficiency, MLE, and UMVUE, 673
7.2 Cuts in NEFs, 675
7.3 Bayesian Theory, 676
8 NEFs with Quadratic Variance Function, 678
8.1 Morris Class, 678
8.2 Multivariate Case, 681
8.3 Characterizations, 689
8.4 Extensions, 691
Bibliography, 691
