Preface	vii
List of Tables	xv
List of Figures	xvii
1 Linear algebra	1
1.1 Introduction	1
1.2 Vectors and matrices	1
1.3 Image space and kernel	3
1.4 Nonsingular matrices and determinants	4
1.5 Eigenvalues and eigenvectors	5
1.6 Orthogonal projections	9
1.7 Matrix decompositions	10
1.8 Problems	11
2 Random vectors	14
2.1 Introduction	14
2.2 Distribution functions	14
2.3 Equals-in-distribution	16
2.4 Discrete distributions	16
2.5 Expected values	17
2.6 Mean and variance	18
2.7 Characteristic functions	21
2.8 Absolutely continuous distributions	22
2.9 Uniform distributions	24

2.10	Joints and marginals	25
2.11	Independence	27
2.12	Change of variables	28
2.13	Jacobians	30
2.14	Problems	33
3	Gamma, Dirichlet, and F distributions	36
3.1	Introduction	36
3.2	Gamma distributions	36
3.3	Dirichlet distributions	38
3.4	F distributions	42
3.5	Problems	42
4	Invariance	43
4.1	Introduction	43
4.2	Reflection symmetry	43
4.3	Univariate normal and related distributions	44
4.4	Permutation invariance	47
4.5	Orthogonal invariance	48
4.6	Problems	52
5	Multivariate normal	55
5.1	Introduction	55
5.2	Definition and elementary properties	55
5.3	Nonsingular normal	58
5.4	Singular normal	62
5.5	Conditional normal	62
5.6	Elementary applications	64
	5.6.1 Sampling the univariate normal	64
	5.6.2 Linear estimation	65
	5.6.3 Simple correlation	67
5.7	Problems	69
6	Multivariate sampling	73
6.1	Introduction	73
6.2	Random matrices and multivariate sample	73
6.3	Asymptotic distributions	78
6.4	Problems	81
7	Wishart distributions	85
7.1	Introduction	85
7.2	Joint distribution of $\bar{\mathbf{x}}$ and \mathbf{S}	85
7.3	Properties of Wishart distributions	87
7.4	Box-Cox transformations	94
7.5	Problems	96

8	Tests on mean and variance	98
8.1	Introduction	98
8.2	Hotelling- T^2	98
8.3	Simultaneous confidence intervals on means	104
	8.3.1 Linear hypotheses	104
	8.3.2 Nonlinear hypotheses	107
8.4	Multiple correlation	109
	8.4.1 Asymptotic moments	114
8.5	Partial correlation	116
8.6	Test of sphericity	117
8.7	Test of equality of variances	121
8.8	Asymptotic distributions of eigenvalues	124
	8.8.1 The one-sample problem	124
	8.8.2 The two-sample problem	132
	8.8.3 The case of multiple eigenvalues	133
8.9	Problems	137
9	Multivariate regression	144
9.1	Introduction	144
9.2	Estimation	145
9.3	The general linear hypothesis	148
	9.3.1 Canonical form	148
	9.3.2 LRT for the canonical problem	150
	9.3.3 Invariant tests	151
9.4	Random design matrix \mathbf{X}	154
9.5	Predictions	156
9.6	One-way classification	158
9.7	Problems	159
10	Principal components	161
10.1	Introduction	161
10.2	Definition and basic properties	162
10.3	Best approximating subspace	163
10.4	Sample principal components from \mathbf{S}	164
10.5	Sample principal components from \mathbf{R}	166
10.6	A test for multivariate normality	169
10.7	Problems	172
11	Canonical correlations	174
11.1	Introduction	174
11.2	Definition and basic properties	175
11.3	Tests of independence	177
11.4	Properties of U distributions	181
	11.4.1 Q-Q plot of squared radii	184

11.5	Asymptotic distributions	189
11.6	Problems	190
12	Asymptotic expansions	195
12.1	Introduction	195
12.2	General expansions	195
12.3	Examples	200
12.4	Problem	205
13	Robustness	206
13.1	Introduction	206
13.2	Elliptical distributions	207
13.3	Maximum likelihood estimates	213
	13.3.1 Normal MLE	213
	13.3.2 Elliptical MLE	213
13.4	Robust estimates	222
	13.4.1 M estimate	222
	13.4.2 S estimate	224
	13.4.3 Robust Hotelling- T^2	226
13.5	Robust tests on scale matrices	227
	13.5.1 Adjusted likelihood ratio tests	228
	13.5.2 Weighted Nagao's test for a given variance	233
	13.5.3 Relative efficiency of adjusted LRT	236
13.6	Problems	238
14	Bootstrap confidence regions and tests	243
14.1	Confidence regions and tests for the mean	243
14.2	Confidence regions for the variance	246
14.3	Tests on the variance	249
14.4	Problem	252
A	Inversion formulas	253
B	Multivariate cumulants	256
B.1	Definition and properties	256
B.2	Application to asymptotic distributions	259
B.3	Problems	259
C	S-plus functions	261
	References	263
	Author Index	277
	Subject Index	281
