

CONTENTS

Introduction to the Series.	v
List of Contributors	vii
Preface	xi
<i>I – Non-Linear Models – Introduction</i>	3
<i>Essay 1</i>	
NGO VAN LONG and NEIL VOUSDEN	
Optimal control theorems	11
<i>Essay 2</i>	
BRUCE A. FORSTER	
On a one state variable optimal control problem – Consumption–pollution trade-offs.	35
<i>Essay 3</i>	
NEIL VOUSDEN	
Resource depletion with possible non-convexities in production	57
<i>Essay 4</i>	
NGO VAN LONG	
Optimal exploitation and replenishment of a natural resource	81
<i>Essay 5</i>	
FRANK MILNE	
The adjustment cost problem with jumps in the state variable.	107
<i>Essay 6</i>	
JOHN D. PITCHFORD	
Two state variable problems	127
<i>Essay 7</i>	
EDWIN BURMEISTER, JOHN JACKSON and STEPHEN A. ROSS	
The evaluation of simple and optimal decision rules with misspecified welfare functions.	155

Essay 8

WILLIAM A. BROCK and JOSE A. SCHEINKMAN

The global asymptotic stability of optimal control with applications to dynamic economic theory 173

II – Linear Stabilisation Models – Introduction 209*Essay 9*

A.J. PRESTON and E. SIEPER

Policy objectives and instrument requirements for a dynamic theory of policy 215

Essay 10

A.J. PRESTON

Existence, uniqueness, and stability of linear optimal stabilisation policies . . 255

Essay 11

STEPHEN J. TURNOVSKY

Optimal control of linear systems with stochastic coefficients and additive disturbances 293

Essay 12

STEPHEN J. TURNOVSKY

On the scope of optimal and discretionary policies in the stabilisation of stochastic linear systems 337
