

## Table of Contents

Chapter 1	1
Some Auxiliary Results: Monotonicity Properties of Probability Distributions	
1.1. Introduction	1
1.2. Ordered Families of Distributions	1
1.3. Probability Integrals of Multivariate Normal Distribution - Dependence on Correlations	6
1.4. Dependence and Association of Random Variables	15
1.5. Majorization in Multivariate Distribution	21
Chapter 2	29
Multiple Decision Theory: A General Approach	
Chapter 3	38
Modified Minimax Decision Procedures	
3.1. Introduction	38
3.2. The Problem of Selecting Good Populations with Respect to A Control	38
3.3. On the Problem of Selecting the Best Population	43
3.4. Essentially Complete Classes of Decision Procedures	50
Chapter 4	61
Invariant Decision Procedures	
4.1. Introduction	61
4.2. Selecting the Best Population	61
Chapter 5	73
Robust Selection Procedures: Most Economical Multiple Decision Rules	
5.1. Introduction	73
5.2. Robust Selection Rules	73
Chapter 6	80
Multiple Decision Procedures Based on Tests	
6.1. Introduction	80
6.2. Conditional Confidence Approach	80
6.3. Multiple Comparison Procedures	84
6.4. Multiple Range Tests	89
6.5. Multistage Comparison Procedures	93
