

CONTENTS

1. INTRODUCTION	1
1.1 DATA COLLECTION	2
1.1.1 Data Base Limitations	3
1.1.2 Data-Conditioned Inferences	5
1.2 REGRESSION ANALYSIS	6
1.2.1 Linear Regression Models	6
1.2.2 Regression vs. Correlation	8
1.3 USES OF REGRESSION ANALYSIS	9
1.3.1 Prediction	9
1.3.2 Model Specification	10
1.3.3 Parameter Estimation	11
1.4 ABUSES OF REGRESSION ANALYSIS	12
1.4.1 Extrapolation	12
1.4.2 Generalization	15
1.4.3 Causation	17
2. INITIAL DATA EXPLORATION	19
2.1 PRELIMINARY DATA EDITING	23
2.1.1 Obvious Anomalies	23
2.1.2 Descriptive Statistics	26
2.1.3 Graphical Aids	28
2.2 INITIAL MODEL SPECIFICATION	33
2.2.1 Categorical Predictor Variables	33
2.2.2 Interactions	37
2.2.3 Smoothing	39

2.3 REEXPRESSING VARIABLES	42
2.3.1 Special Functions	42
2.3.2 Predictor Variable Transformations	45
2.3.3 Linearization of the Response	47
2.3.4 Prediction Versus Model Building	48
EXERCISES	50
3. SINGLE-VARIABLE LEAST SQUARES	52
3.1 APPROPRIATENESS	56
3.1.1 Theoretical Validity	57
3.1.2 Approximations in Restricted Regions	61
3.1.3 No-Intercept Models	63
3.2 LEAST SQUARES PARAMETER ESTIMATION	66
3.2.1 The Principle of Least Squares	66
3.2.2 Model Assumptions	71
3.2.3 Standardization	72
3.3 ADDITIONAL MEASURES OF FIT	77
3.3.1 Partitioning Variability	78
3.3.2 Coefficient of Determinatio	82
3.3.3 Residual Variability	83
APPENDIX	85
3.A Derivation of Least Squares Estimators	85
3.B Coefficient Estimates for Standardized Variables	87
3.C Partitioning the Total Sum of Squares	88
3.D Calculation of the Coefficient of Determination	89
EXERCISES	90
4. MULTIPLE-VARIABLE PRELIMINARIES	92
4.1 REVIEW OF MATRIX ALGEBRA	94
4.1.1 Notation	94
4.1.2 Vector and Matrix Operations	96
4.1.3 Model Definition	103
4.1.4 Latent Roots and Vectors	104
4.1.5 Rank of a Matrix	106
4.2 CARE IN MODEL BUILDING	108
4.2.1 Misspecification Bias	108
4.2.2 Overspecification Redundancy	110
4.3 STANDARDIZATION	111
4.3.1 Benefits	112
4.3.2 Correlation Form of $X'X$	114

4.4	MULTICOLLINEARITY	115
4.4.1	Definition	115
4.4.2	Detection	118
4.4.3	Sample vs. Population Multicollinearities	120
	APPENDIX	122
4.A	Determinants and Inverse Matrices	122
4.B	Determinants and Inverses Using Latent Roots and Latent Vectors	124
	EXERCISES	126
5.	MULTIPLE-VARIABLE LEAST SQUARES	128
5.1	PARAMETER ESTIMATION	131
5.1.1	Matrix Algebra Formulation	132
5.1.2	Fitting by Stages	135
5.1.3	Orthogonal Predictor Variables	140
5.1.4	Standardization	142
5.1.5	No-Intercept Models	148
5.2	INTERPRETATION OF FITTED MODELS	149
5.2.1	General Interpretation	150
5.2.2	Adjustment Computations	152
5.2.3	Special Case: Indicator Variables	153
5.3	INITIAL ASSESSMENT OF FIT	154
5.3.1	Analysis of Variance Table	154
5.3.2	Error Variance	158
	APPENDIX	160
5.A	Derivation of Least Squares Estimators	160
5.B	Algebraic Derivation of Fitting by Stages	161
5.C	Calculating SSR	164
5.D	Equivalence of Residual Expressions	165
	EXERCISES	166
6.	INFERENCE	167
6.1	MODEL DEFINITION	169
6.1.1	Four Key Assumptions	169
6.1.2	Alternative Assumptions	172
6.2	ESTIMATOR PROPERTIES	174
6.2.1	Geometrical Representation	174
6.2.2	Expectation	178
6.2.3	Variances and Covariances	183
6.2.4	Probability Distributions	187

6.3	TESTS OF HYPOTHESIS	189
6.3.1	Tests on Individual Parameters	190
6.3.2	Analysis of Variance Tests	195
6.3.3	Repeated Predictor Variable Values (Lack of Fit Test)	198
6.4	INTERVAL ESTIMATION	202
6.4.1	Confidence Intervals and Regions	202
6.4.2	Response Intervals	206
	APPENDIX	210
6.A	Expectation of Least Squares Estimators	210
6.B	Variances and Covariances of Least Squares Estimators	213
6.C	Distribution of Least Squares Estimators	216
	EXERCISES	218
7.	RESIDUAL ANALYSIS	220
7.1	TYPES OF RESIDUALS	223
7.1.1	Distinction Between Residuals and Errors	224
7.1.2	Raw and Scaled Residuals	225
7.1.3	Deleted Residuals	229
7.2	VERIFICATION OF ERROR ASSUMPTIONS	231
7.2.1	Checks for Random Errors	232
7.2.2	Test for Serial Correlation	234
7.2.3	Detecting Heteroscedasticity	236
7.2.4	Normal Probability Plots	239
7.3	MODEL SPECIFICATION	241
7.3.1	Plots of Residuals Versus Predictor Variables	242
7.3.2	Partial Residual Plots	247
7.4	OUTLIER DETECTION	252
7.4.1	Plotting Techniques	252
7.4.2	Statistical Measures	255
	APPENDIX	258
7.A	Derivation of Deleted Residual	258
	EXERCISES	259
8.	VARIABLE SELECTION TECHNIQUES	262
8.1	BASIC CONSIDERATIONS	264
8.1.1	Problem Formulation	265
8.1.2	Additional Selection Criteria	267
8.2	SUBSET SELECTION METHODS	268
8.2.1	All Possible Regressions	269
8.2.2	Best Subset Regression	270
8.2.3	C_k Plots	272
8.2.4	Additional Search Routines	275

8.3	STEPWISE SELECTION METHODS	278
8.3.1	Forward Selection Method	278
8.3.2	Backward Elimination Method	282
8.3.3	Stepwise Procedure	284
	APPENDIX	286
8.A	Derivation of Equation (8.3.4)	286
	EXERCISES	288
9.	MULTICOLLINEARITY EFFECTS	290
9.1	COEFFICIENT ESTIMATORS	293
9.1.1	Variances and Covariances	293
9.1.2	Estimator Effects	299
9.2	INFERENCE PROCEDURES	302
9.2.1	<i>t</i> Statistics	302
9.2.2	Other Selection Criteria	304
9.2.3	Effects on Subset Selection Methods	306
9.3	POPULATION-INHERENT MULTICOLLINEARITIES	308
9.3.1	Variable Selection	308
9.3.2	Prediction	310
	EXERCISES	313
10.	BIASES REGRESSION ESTIMATORS	315
10.1	PRINCIPAL COMPONENT REGRESSION	317
10.1.1	Motivation	318
10.1.2	Analysis of Variance	322
10.1.3	Inference Techniques	326
10.2	LATENT ROOT REGRESSION ANALYSIS	329
10.2.1	Motivation	330
10.2.2	Predictive Multicollinearities	332
10.2.3	Analysis of Variance	335
10.2.4	Inference Techniques	338
10.3	RIDGE REGRESSION	340
10.3.1	Motivation	341
10.3.2	Selecting Ridge Parameters	343
10.3.3	Analysis of Variance	346
10.4	FINAL REMARKS	348
	EXERCISES	350
APPENDIX A.	DATA SETS ANALYZED IN THIS TEXT	352
A.1	Selected Demographic Characteristics of Countries of the World	358
A.2	Final High School Average Grades and First Year of College Average Grades	359

A.3	Homicides in Detroit, 1961-1973	360
A.4	Educational Status Attainment	361
A.5	Nitrous Oxide Emissions Modelling	362
A.6	Anthropometric and Physical Fitness Measurements on Police Department Applicants	363
A.7	Housing Rent Study	365
A.8	Body Measurements on Police Department Applicants	367
APPENDIX B. DATA SETS FOR FURTHER STUDY		368
B.1	Mortality and Pollution Study	370
B.2	Solid Waste Data	372
APPENDIX C. STATISTICAL TABLES		373
C.1	Cumulative Standard Normal Distribution	376
C.2	Cumulative Student t Distribution	377
C.3	Cumulative Chi-Square Distribution	378
C.4	Cumulative F Distribution	380
C.5	Critical Values for Runs Test	386
C.6	Critical Values for Durbin-Watson Test Statistic	388
BIBLIOGRAPHY		389
INDEX		398
