INTRODUCTION 1

1 The two objects of study, 1
2 Observing general objects, 2
3 Parametric study of nonparametric problems, 5
4 General approach, 8
Notation, 9

PART 1 SOME PROBABILITY THEORY ON ABSTRACT SPACES 13

1 **Probabilistic background, 15**

1 Probabilities in function spaces, 15
2 Probabilities in topological vector spaces, 24
3 Probabilities in locally compact spaces, 30

2 **Geometry of stochastic processes, 37**

1 Curves in Hilbert space, 37
2 Calculus of second-order processes, 46
3 Representations of processes, 54
4 Special representations, 62
5 Toeplitz theory of stationary process, 85
6 Reproducing covariance kernels, 93

PART 2 INFERENCE IN ABSTRACT SAMPLE SPACE 103

3 **General inference in abstract sample space, 105**

1 Likelihood ratios in abstract space, 105
2 Calculating Radon-Nikodym derivatives, 114
3 Perpendicular measures and consistent estimation, 133

4 Linear inference, 147

1 The finite-dimensional situation, 147
2 Consistent estimation, 156
3 BLUEs for stochastic processes, 179
4 Asymptotic optimality; discrete time, 212
5 Asymptotic optimality; continuous case, 244
6 Linear inference in Banach spaces, 251
7 Selecting linear functionals for estimation, 258

5 Testing Gaussian processes, 269

1 Testing mean value functions, 269
2 Testing covariance functions, 278
3 Selecting linear functionals for testing, 290

6 Inference in Markov processes, 304

1 The infinitesimal generator as parameter, 304
2 Finite Markov chains, 307
3 Birth-and-death processes with linear growth, 317
4 Processes with independent increments, 323
5 Estimation for diffusion processes, 336
6 Likelihood estimation for some general Markov processes, 340

PART 3 INFERENCE IN ABSTRACT PARAMETER SPACE, 345

7 Regularization in abstract parameter space, 347

1 Parametric methods for nonparametric questions, 347
2 Direct methods in abstract parameter space, 358
3 Regularization of spectral estimates, 361
4 Regularization of frequency estimates, 369
5 Regularization of sets, 373
6 General regularization, 386

8 Sieves in parameter space, 390

1 Parameter in l_1-space, 390
2 Parameter in L_1-space, 395

3 Parameter in l_2- and L_2-spaces, 420
4 Parameter in C-spaces, 426
5 Parameter in a BV-space, 442
6 Operators as parameter, 444
7 Parameter in groups, 452
8 Sets as parameters, 465

9 General Parameter Space, 469

1 General conditions for sieves, 469
2 Regularization via sieves, 472
3 Sieves in general, 478
4 Cramér-Rao's inequality in Banach spaces, 484

NOTES, 492
