

# CONTENTS

|  |            |
|--|------------|
| <b>Preface</b>                               | <b>ix</b>  |
| <b>Acknowledgments</b>                       | <b>xii</b> |
| <b>1 Model and Data : The Inference Base</b> | <b>1</b>   |
| 1-1 The System and the Model                 | 2          |
| 1-2 The Model and the Location-Scale Example | 5          |
| References and Bibliography                  | 15         |
| <b>2 Location-Scale Analysis</b>             | <b>16</b>  |
| 2-1 Core Methods of Analysis                 | 17         |
| 2-2 Terminal Methods of Analysis             | 22         |
| 2-3 Analysis of an Inference Base            | 26         |
| 2-4 Lifetesting and the Weibull              | 30         |
| 2-5 Robustness and Resistance                | 37         |
| References and Bibliography                  | 47         |
| <b>3 Necessary Methods</b>                   | <b>49</b>  |
| 3-1 On the Parameter Space                   | 49         |
| 3-2 On the Sample Space                      | 54         |
| 3-3 Factorization                            | 59         |
| 3-4 By Reexpression                          | 61         |
| 3-5 By Reexpression ; a Parameter Component  | 65         |
| References and Bibliography                  | 68         |

|          |   |            |
|----------|---|------------|
| <b>4</b> | <b>Density Allocation Methods</b>             | <b>69</b>  |
| 4-1      | Sufficiency Reduction                         | 70         |
| 4-2      | Ancillarity Reduction                         | 75         |
| 4-3      | Sufficiency-Ancillarity Reduction             | 80         |
| 4-4      | Weak Sufficiency and Ancillarity              | 84         |
|          | References and Bibliography                   | 86         |
| <b>5</b> | <b>Terminal Methods of Inference</b>          | <b>89</b>  |
| 5-1      | Tests of Significance                         | 89         |
| 5-2      | Confidence Intervals                          | 91         |
| 5-3      | Likelihood                                    | 98         |
| 5-4      | Inference and Decisions                       | 103        |
|          | References and Bibliography                   | 108        |
| <b>6</b> | <b>The Regression Model</b>                   | <b>109</b> |
| 6-1      | Core Methods of Analysis                      | 109        |
| 6-2      | Terminal Methods of Analysis                  | 116        |
| 6-3      | Regression with Serial Correlation            | 120        |
| 6-4      | Regression with Nonnormal Variation           | 125        |
|          | References and Bibliography                   | 132        |
| <b>7</b> | <b>Coherent Models</b>                        | <b>133</b> |
| 7-1      | The Structural Model                          | 133        |
| 7-2      | Change of Variable                            | 139        |
| 7-3      | Inference, Tests and Confidence Regions       | 149        |
| 7-4      | Multiple Tests and Confidence Regions         | 158        |
|          | References and Bibliography                   | 165        |
| <b>8</b> | <b>Some Multivariate Models</b>               | <b>167</b> |
| 8-1      | Location-Scale Multivariate Model             | 167        |
| 8-2      | Multivariate Model: Progression               | 174        |
| 8-3      | Multivariate Model: Normal Progression        | 183        |
| 8-4      | Multivariate Model: Linear                    | 191        |
| 8-5      | Multivariate Model: Normal Linear             | 197        |
|          | References and Bibliography                   | 205        |
| <b>9</b> | <b>Distributions on the Circle and Sphere</b> | <b>206</b> |
| 9-1      | The Circle                                    | 206        |
| 9-2      | The Sphere                                    | 212        |
| 9-3      | Generalized Distribution Form                 | 219        |
|          | References and Bibliography                   | 232        |

|  |            |
|--|------------|
| <b>10 Bioassay and Dilution Series</b>                               | <b>233</b> |
| 10-1 The Model   | 234        |
| 10-2 The Analysis: Theory and Examples                               | 240        |
| References and Bibliography  | 250        |
| <b>11 Extended Likelihood Methods</b>                                | <b>251</b> |
| 11-1 Some Likelihood Components                                      | 252        |
| 11-2 Extended Likelihood   | 253        |
| 11-3 Group-Based Likelihood and the Transformed Regression Model     | 260        |
| References and Bibliography  | 266        |
| <b>12 Multivariate Regression Models</b>                             | <b>267</b> |
| 12-1 Multivariate Regression Model with Progressive Variation        | 267        |
| 12-2 Normal Multivariate Regression Model with Progressive Variation | 276        |
| 12-3 Multivariate Regression Model with Linear Variation             | 281        |
| 12-4 Normal Multivariate Regression Model with Linear Variation      | 287        |
| References and Bibliography  | 293        |
| <b>Index</b>   | <b>295</b> |
