<i>Preface</i>	xi
<i>Acknowledgments</i>	xv
<b>CHAPTER I Vector and Matrix Algebra</b>	
1.0 Introduction	1
1.1 Vectors	1
1.2 Matrices	3
1.3 Rank and Trace of a Matrix	6
1.4 Quadratic Forms and Positive Definite Matrix	7
1.5 Characteristic Roots and Vectors	8
1.6 Partitioned Matrix	13
1.7 Some Special Theorems	16
1.8 Complex Matrices	18
Exercises	18
References	20
<b>CHAPTER II Groups and Jacobian of Some Transformations</b>	
2.0 Introduction	21
2.1 Groups	21
2.2 Some Examples of Groups	22

2.3	Normal Subgroups, Quotient Group, Homomorphism, Isomorphism, Direct Product	23
2.4	Jacobian of Some Transformations	25
	Further Reading	28

### CHAPTER III Notions of Multivariate Distributions and Invariance in Statistical Inference

3.0	Introduction	29
3.1	Multivariate Distributions	29
3.2	Invariance in Statistical Testing of Hypotheses	32
3.3	Sufficiency and Invariance	42
3.4	Unbiasedness and Invariance	42
3.5	Invariance and Optimum Tests	43
3.6	Most Stringent Tests and Invariance	44
	Exercises	45
	References	47

### CHAPTER IV Multivariate Normal Distribution, Its Properties and Characterization

4.0	Introduction	49
4.1	Multivariate Normal Distribution (Classical Approach)	50
4.2	Some Characterizations of the Normal Distribution	57
4.3	Complex Multivariate Normal Distribution	58
4.4	Concentration Ellipsoid and Axes	59
4.5	Some Examples	61
4.6	Regression, Multiple and Partial Correlation	63
	Exercises	66
	References	71

### CHAPTER V Estimators of Parameters and Their Functions in a Multivariate Normal Distribution

5.0	Introduction	72
5.1	Maximum Likelihood Estimators of $\mu$ , $\Sigma$	73
5.2	Properties of Maximum Likelihood Estimators of $\mu$ and $\Sigma$	79
5.3	Bayes, Minimax, and Admissible Characters of the Maximum Likelihood Estimator of $\mu$ , $\Sigma$	89
	Exercises	102
	References	105

### CHAPTER VI Basic Multivariate Sampling Distributions

6.0	Introduction	107
6.1	Noncentral Chi-Square, Student's $t$ -, $F$ -Distributions	107
6.2	Distribution of Quadratic Forms, Cochran's Theorem	109
6.3	The Wishart Distribution	113
6.4	Tensor Product, Properties of the Wishart Distribution	119
6.5	The Noncentral Wishart Distribution	124
6.6	Generalized Variance	125

6.7	Distribution of the Bartlett Decomposition (Rectangular Coordinates)	126
6.8	Distribution of Hotelling's $T^2$ and a Related Distribution	127
6.9	Distribution of Multiple and Partial Correlation Coefficients	133
	Exercises	136
	References	141

## CHAPTER VII Tests of Hypotheses of Mean Vectors

7.0	Introduction	144
7.1	Tests and Confidence Region for Mean Vectors with Known Covariance Matrices	145
7.2	Tests and Confidence Region for Mean Vectors with Unknown Covariance Matrices	147
7.3	Tests of Hypotheses Concerning Subvectors of $\mu$	172
	Exercises	175
	References	177

## CHAPTER VIII Tests Concerning Covariance Matrices and Mean Vectors

8.0	Introduction	179
8.1	Hypothesis That a Covariance Matrix Is Equal to a Given Matrix	180
8.2	The Sphericity Test	186
8.3	Tests of Independence and the $R^2$ -Test	190
8.4	Multivariate General Linear Hypothesis	205
8.5	Equality of Several Covariance Matrices	223
	Exercises	233
	References	237

## CHAPTER IX Discriminant Analysis

9.0	Introduction	240
9.1	Examples	242
9.2	Formulation of the Problem of Discriminant Analysis	243
9.3	Classification into One of Two Multivariate Normal Populations	249
9.4	Classification into More than Two Multivariate Normal Populations	270
9.5	Concluding Remarks	274
	Exercises	275
	References	277

## CHAPTER X Multivariate Covariance Models

10.0	Introduction	281
10.1	Principal Components	281
10.2	Factor Analysis	293
10.3	Canonical Correlations	301
10.4	Time Series Analysis	309
	Exercises	310
	References	311
