CONTENTS

# *Elements of Business and Economic Statistics: Learning by Objectives*

I Introduction: Statistics and Statistical Analysis 1

**UNIT I Frequency Distributions and Their Characteristics** 9

II The Frequency Distribution 10
III Characteristics of a Distribution: Measures of Location 27
IV Characteristics of a Distribution: Measures of Dispersion and Symmetry 55

**UNIT II Probability and Probability Distributions** 75

V Probability 76
VI Probability Distributions 105

**UNIT III Sampling and Sampling Distributions** 141

VII Elements of Sampling and Sampling Distributions 142

**UNIT IV Statistical Estimation and Decision Making** 165

VIII Statistical Estimation 166
IX Tests of Hypotheses 186
X Hypothesis Testing: Differences between Means 214
XI Decisions and Decision Theory 230

**UNIT V Linear Regression and Correlation** 251

XII Linear Regression and Correlation 252

**UNIT VI Data Collection and Presentation** 285

XIII Elements of Data Collection 286
XIV Organizing and Interpreting Data with Tables 307
XV Organizing and Interpreting Data with Graphs 324

**UNIT VII Index Numbers** 357

XVI The Construction and Use of Index Numbers 358
XVII Two Current Price Index Numbers: The Wholesale Price Index and the Consumers' Price Index 380

**UNIT VIII Time Series Analysis** 403

XVIII The Analysis of Time Series: Introduction and the Measurement of Trend 404
XIX Analysis of Time Series: Short Term 439

**Appendixes**

A. The Use of Logarithms 483
B. Use of a Table of Square Roots 491
C. The Principle of the Reciprocal 492
D. Rounding Numbers 493
E. List of Tables 498

**Answers to Selected Problems** 538

**Index** 549
