

Contents

1	THE LINEAR DISCRIMINANT FUNCTION	1
1.1	Introduction, 1	
1.2	Fisher's Rule, 2	
1.3	The Use of Qualitative Data, 4	
1.4	Some Concluding Thoughts, 10	
2	DISCRETE CLASSIFICATION MODELS	11
2.1	Introduction, 11	
2.2	Sampling and the Full Multinomial Model, 12	
2.3	Model Representations for Multivariate Dichotomous Responses, 19	
2.4	A Procedure Based on a Distributional Distance, 42	
3	ERROR RATES AND THE PROBLEM OF BIAS	51
3.1	Introduction, 51	
3.2	Estimates of the Optimal Error t^* , 52	
3.3	Estimating the Mean Actual Error, 53	
3.4	Asymptotic Optimality and Rates of Convergence, 58	
3.5	The Exact Bias of the Apparent Error, 62	
3.6	Afterthought, 66	
4	THE VARIABLE-SELECTION PROBLEM	68
4.1	Introduction, 68	
4.2	A Procedure Based on Differences in Discriminant Scores, 70	

4.3	Forward and Stepwise Procedures, 71	
4.4	An Illustrative Example, 79	
4.5	Afterthought, 87	
5	SPECIAL TOPICS	91
5.1	Introduction, 91	
5.2	Mixture of Variables, 91	
5.3	Methods for Comparing Procedures, 96	
5.4	Sampling Experiments, 99	
6	COMPUTER PROGRAMS	121
6.1	Introduction, 121	
6.2	PROG. NNRULE, 122	
6.3	PROG. DISCRM, 127	
6.4	PROG. POLY, 138	
6.5	PROG. DISTANCE, 146	
6.6	PROG. LACHIN, 153	
6.7	PROG. VARSEL, 168
