Introduction 1
The art of blending 1
The potential of blending 2
The problems with blending 3

1 What is blended e-learning? 9
Where did e-learning come from? 11
Definition of e-learning 16
Educational and not so educational e-drivers 17
Drivers to adopt e-learning 17
e-Learning in online, conventional and blended courses 24
The challenges of designing blended e-learning 27

2 Different approaches to blended e-learning 29
Blending in chunks 30
Why blend at all? 31
Before choosing an e-learning blend 34
Media and mobile manifestations 40
The significance of student location 43
Informal, work-based and just-in-time blends 45
Is blending bland? 47

3 Devising blended e-learning activities **49**
Synchronous or asynchronous? 51
'Looking' at student activity 57
Lurking with intent 59
How am I doing? Providing feedback to students and tutors 61
Assessing online activity 63
Social spaces online 65
Planning for accessibility and usability 67
Blending action and interaction online 69

4 Documenting e-learning blends **70**
Finding the finest blend 70
Factors affecting blending 71
What is in the blend? 75
Orchestrating the blend: blending different approaches to teaching 76
Knowing the score: documenting learning and teaching practice 78
The LD_lite planning tool: three into one 82
Problems with blending 89
Framing the problem 93

5 Choosing e-tools for blended activities **94**
An abundance of activities? 94
Mapping tasks with tools 96
Types of e-tools 99
Trends in the use of e-tools 101
Documenting activities using LD_lite 104
Blending old and new 132
Getting up to speed with blended learning 132

6 Environments to integrate activity blends **134**
Problem-based learning: a case for complex blending 134
Electronic learning environments: who is in control? 138
Electronic learning environment tools 138
Commercial electronic learning environment systems 141
Open source electronic learning environment systems 143
Examples of complex blending 146
Documenting complex blends 163
Blending physical and virtual learning spaces 163
Electrifying or encumbering environments? 166

7 Sustainable blended e-learning designs **168**
Tactic 1: Sourcing and reusing existing materials 170
Tactic 2: Making your own resources 177
Tactic 3: Repurposing resource materials 179
Tactic 4: Designing courses in small, reusable chunks 180
Tactic 5: Documenting courses within reusable templates 183
Tactic 6: Managing and moving materials 184
Moving and sharing across systems 190

8 Support structures for blended e-learning **192**
Supporting blended e-learning: the impact of distance and experience 196
Web-based student support 198
The technical helpdesk 201
Librarians on call 202
Supporting staff to support students in blended e-learning 204
Online peer support 207
Where is student support heading? 209

9 Ethical issues in blended e-learning **211**
Computing codes and controls 213
Privacy and confidentiality online 218
Digital rights 221
The ethics of access 223
The implications of teleworking and the 24/7 network 224

Glossary 226
References 235
Index 243

Figures

1.1	Increase in computing power, 1982–2002	12
2.1	Two approaches to 'wraparound' activity blending	30
2.2	Impact of location and experience on e-learning blend	44
3.1	Example of staff use of 'social space'	66
4.1	A lesson plan for a simple online learning activity	84
4.2	Revised lesson plan linking online and face-to-face activities	86
4.3	A pattern documenting the same scenario as in Figure 4.2	88
4.4	A learning design sequence map documenting the same scenario as in Figure 4.2	90
5.1a	A narrative pattern of an information handling activity	106
5.1b	A lesson plan of an information handling activity	107
5.1c	A lesson plan of an information handling activity for geographically dispersed students	108
5.1d	A learning design sequence of an information handling task	109
5.2a	The 'Exploring Chemistry' lesson on balancing equations	111
5.2b	A narrative pattern of an adaptive task	112
5.2c	A lesson plan of an adaptive activity	113–14
5.2d	A learning design sequence of an adaptive activity	115
5.3a	A narrative pattern of a communicative activity	117
5.3b	A lesson plan of a communicative activity	118–19
5.3c	A learning design sequence of a communicative activity	120
5.4a	A narrative pattern of a productive activity	122
5.4b	A lesson plan of a productive activity	123–4
5.4c	A learning design sequence of a productive activity	125
5.5a	A narrative pattern of an experiential activity	128
5.5b	A lesson plan of an experiential activity	129–30
5.5c	A learning design sequence of the experiential activity	131
6.1	Blackboard at the University of Bradford	142

6.2	A tool to upload resources to an electronic learning environment	143
6.3	The LAMS visual authoring environment	145
6.4	A LAMS learning design with non-sequential activities	145
6.5	The TAET course environment in TeleTOP	147
6.6	Narrative pattern of a flexible problem-based learning activity	149
6.7	A lesson plan of a flexible, problem-based learning activity	150–52
6.8	A learning design sequence of a flexible, problem-based learning activity	153
6.9	A wiki-based learning environment	154
6.10	A file gallery where students store and share learning materials	155
6.11	A concept map illustrating the design process	156
6.12	Wiki-based project assignment linking learning resources to the wiki tool	157
6.13	A narrative pattern of the collaborative product design scenario	158
6.14	A lesson plan of the collaborative product design scenario	159–61
6.15	Learning design sequence map of the collaborative product design scenario	162
6.16	The Saltire Centre at Glasgow Caledonian University	165
6.17	Hand-held polling device	166
7.1	Sourcing resources within an international collection of resources (IVIMEDS)	185
7.2	Metadata information about resources stored within a repository in an electronic learning environment	186
7.3	Uploading learning resources from a desktop into an electronic learning environment	188
7.4	Packaging content using Reload	189
8.1	Location/experience in relation to e-learning and on-campus courses (single student, different courses)	196
8.2	Location/experience in relation to an e-learning course (different students, same course)	197
8.3	Screenshot showing some of the resources available on the Open University's pre-registration web site	200
9.1	Some emoticons and what they mean	217
9.2	Message history from online Firstclass forum	220

Tables

2.1 Comparing the affordances of traditional and e-learning formats across commonly used media 36–9
3.1 Blending asynchronous and synchronous activities: two examples 56
3.2 Assessment strategies to recognize and reward online activity 64
4.1 Frameworks used by tutors to plan and document teaching 80–81
5.1 The Dialog Plus mapping of learning tasks and tools 97–8
6.1 Stages of problem-based learning 136–7
8.1 Examples of academic and non-academic support for students 194
8.2 Examples of using ICT tools and techniques to support students 204–6

Examples

2.1	Mudlarking in Deptford	41
2.2	One child, one laptop	42
2.3	TeachandLearn.net	46
3.1	An online ice-breaker	62
5.1	An information handling activity: personal broadcasting of ideas about swing dancing	104
5.2	An adaptive activity: chemistry virtual experiments	110
5.3	A communicative activity: supporting student reflections in engineering	116
5.4	A productive activity: collaborative construction of a glossary of terms in genetics	121
5.5	An experiential activity: collaborative problem solving and knowledge sharing in a work-based setting	126
6.1	Electronic environments for technology-supported learning	146
6.2	Workspace wikis in engineering	154
6.3	Glasgow Caledonian: Saltire Centre	165
8.1	eLanguages support for new students	199
8.2	Supporting 220,000 students	200
8.3	Accessing law reports online	203
