

# TABLE OF CONTENTS

## Preface

### Topic 1.—Classes of Life Distributions and their Properties

Discussion by the Editors	1
Some classes of distributions closed under the formation of coherent systems . . . . <i>J. D. Esary and A. W. Marshall</i>	9
Families of components, and systems, exposed to a compound Poisson damage process . . . . . <i>J. D. Esary and A. W. Marshall</i>	31
Some contributions to the stochastic characterization of wear . . . . . <i>A. L. Haines and N. D. Singpurwalla</i>	47
Monotonicity and convexity in system survival functions and metabolic disappearance curves . . . . . <i>J. Keilson</i>	81

### Topic 2. Stochastic Processes

Discussion by the Editors	103
Research in point processes, with applications in reliability and biometry . . . . . <i>R. J. Serfling</i>	109
Bounds and inequalities on the rate of population growth . . . . . <i>R. E. Barlow and J. L. M. Saboia</i>	129
Testing for a monotone trend in a modulated renewal process . . . . . <i>P. A. W. Lewis and D. W. Robinson</i>	163
A view of biometry: an interdisciplinary domain concerned with chance mechanisms operating in living organisms; illustration: urethan carcinogenesis . . . . <i>J. Neyman</i>	183

### Topic 3. Linear Models

Population percentile estimation for the unbalanced random-effect model: estimation of the strength of a material when sampling from various batches of the material . . . . . <i>K. W. Fertig and Nancy R. Mann</i>	205
Prediction, mixed models, and variance components . . . . . <i>S. R. Searle</i>	229

### Topic 4. Competing Risks

Discussion by the Editors	271
Parametric approaches to the theory of competing risks . . . . . <i>H. A. David</i>	275

TABLE OF CONTENTS

Results on failure time and pattern for the series system . . . . .	<i>L. Lee and W. A. Thompson, Jr.</i>	291
Presenting censored survival data when censoring and survival times may not be independent . . . . .	<i>L. Fisher and P. Kanarek</i>	303
Nonparametric tests of independence for censored data, with applications to heart transplant studies . . . . .	<i>B. W. Brown, Jr., M. Hollander, and R. M. Korwar</i>	327
 <b>Topic 5. Prediction and Estimation of System Reliability</b>		
Discussion by the Editors		359
Hypothesis testing and confidence intervals for a multiplicative Poisson model with applications to reliability and bioassay . . . . .	<i>B. Harris and A. P. Soms</i>	363
Reliability analysis for complex, repairable systems . . . . .	<i>L. H. Crow</i>	379
 <b>Topic 6. Life Testing</b>		
Discussion by the Editors		415
Estimating the parameters of a bivariate exponential distribution in several sampling situations . . . . .	<i>F. Proschan and P. Sullo</i>	423
Computers and unconventional test-statistics . . . . .	<i>Z. W. Birnbaum</i>	441
Some optimality results for one and two sample procedures based on the smallest $r$ order statistics . . . . .	<i>R. A. Johnson</i>	459
 <b>Topic 7. Comparison of Populations: Ranking, Selection, Classification and Similarity Measurement</b>		
Discussion by the Editors		497
Inference for restricted families: (A) Multiple decision procedures; (B) Order statistics inequalities . . . . .	<i>Shanti S. Gupta and S. Panchapakesan</i>	503
A single-sample complete ordering procedure for certain populations . . . . .	<i>R. E. Schafer</i>	597
Comparison of methods for choosing the better of two negative exponential lifetime distributions . . . . .	<i>D. G. Hoel and G. H. Weiss</i>	619
Classification rules for exponential populations . . . . .	<i>A. P. Basu and A. K. Gupta</i>	637
Measuring affinity of distributions . . . . .	<i>G. Van Belle and I. Ahmad</i>	651
 <b>Topic 8. Applications in Reliability and Biometry</b>		
The evaluation of health-service programs . . . . .	<i>R. Cornell</i>	673
A comparison of models for determining safe levels of environmental agents . . . . .	<i>N. Chand and D. G. Hoel</i>	681

TABLE OF CONTENTS

Problems in cell kinetics and the early detection of disease . . . . .	<i>M. Zelen</i>	701
Reliability of human control . . . . .	<i>R. A. Albanese</i>	727

**Topic 9. Statistical Theory and Methods Not Specifically Directed Towards Reliability and Biometry**

Fixed-width confidence intervals for $P(X < Y)$ . . . . .	<i>Z. Govindarajulu</i>	747
Inference for a normal population when the parameters exhibit some structure . . . . .	<i>I. Olkin</i>	759
Detecting signals in Poisson noise . . . . .	<i>G. S. Watson</i>	775
A comparison of randomized response designs . . . . .	<i>B. G. Greenberg, D. G. Horvitz and J. R. Abernathy</i>	787
