# Contents

Chapter 1 *Introduction* 1

1. Historical Background of the Mathematical Theory of Reliability, 1
2. Definitions of Reliability, 5

Chapter 2 *Failure Distributions* 9

1. Introduction, 9
2. Typical Failure Laws, 12
3. The Exponential as the Failure Law of Complex Equipment, 18
4. Monotone Failure Rates, 22
5. Preservation of Monotone Failure Rate, 35
6. Additional Inequalities, 39
7. General Failure Rates, 41

Chapter 3 *Operating Characteristics of Maintenance Policies* 46

1. Introduction, 46
2. Renewal Theory, 48
3. Replacement Based on Age, 61
4. Comparison of Age and Block Replacement Policies, 67
5. Random Replacement, 72
6. Repair of a Single Unit, 74

Chapter 4 *Optimum Maintenance Policies* 84

1. Introduction, 84
2. Replacement Policies, 85
3. Inspection Policies, 107

Chapter 5 *Stochastic Models for Complex Systems* 119

1. Introduction, 119
2. Markov Chains and Semi-Markov Processes, 121
3. Repairman Problems, 139
4. Marginal Checking, 151
5. Optimal Maintenance Policies under Markovian Deterioration, 156

Chapter 6 *Redundancy Optimization* 162

1. Introduction, 162
2. Optimal Allocation of Redundancy Subject to Constraints, 163
3. Application to Parallel Redundancy Model, 170
4. Application to Standby Redundancy Model, 175
5. Complete Families of Undominated Allocations, 180
6. Optimal Redundancy Assuming Two Types of Failure, 185

Chapter 7 *Qualitative Relationships for Multicomponent Structures* 196

1. Introduction, 196
2. Achieving Reliable Relay Circuits, 197
3. Monotonic Structures, 202
4. S-shaped Reliability Functions for Monotonic Structures, 209
5. *k*-out-of-*n* Structures, 216
6. Relationship between Structure Failure Rate and Component Failure Rates, 219

Appendix 1 *Total Positivity* 227

Appendix 2 *Test for Increasing Failure Rate* 232

Appendix 3 *Tables Giving Bounds on Distributions with Monotone Failure Rate* 236
