

CONTENTS

1. Introduction to Survival Concepts 1
 1. Survival Functions and Hazard Rates, 2
 2. Types of Censoring, 3
 - 2.1. Type I Censoring, 3
 - 2.2. Type II Censoring, 4
 - 2.3. Random Censoring, 5
 - 2.4. Other Types of Censoring, 7
 - Example. African Children, 7
 - Alternative Notation, 8

2. Parametric Models 10
 1. Distributions, 10
 - 1.1. Exponential, 10
 - 1.2. Gamma, 11
 - 1.3. Weibull, 12
 - 1.4. Rayleigh, 12
 - 1.5. Lognormal, 13
 - 1.6. Pareto, 14
 - 1.7. IFR and IFRA, 15

2. Estimation, 16
 - 2.1. Maximum Likelihood, 16
 - Newton-Raphson and Method of Scoring, 17
 - Confidence Intervals and Tests, 20
 - Example 1. Exponential, 21
 - Delta Method, 25
 - Example 2. Weibull, 27
 - Estimation of $S(t)$, 29
 - 2.2. Linear Combinations of Order Statistics, 30
 - Extreme Value Distributions, 32
 - 2.3. Other Estimators, 33
 - Bias-Corrected Estimators, 33
 - Uniformly Minimum Variance Unbiased Estimators (UMVUEs), 34
 - Bayesian Estimates, 35
 3. Regression Models, 35
 4. Models With Surviving Fractions, 36
 - 4.1. Single Sample, 36
 - 4.2. Regression, 37
3. Nonparametric Methods: One Sample 39
1. Life Tables, 39
 - 1.1. Reduced Sample Method, 40
 - 1.2. Actuarial Method, 43
 - 1.3. Variance of $\hat{S}(\tau_k)$, 44
 - 1.4. Types of Life Tables, 45
 2. Product-Limit (Kaplan-Meier) Estimator, 46
 - Example. AML Maintenance Study, 49
 - Variance of $\hat{S}(t)$, 50
 - 2.1. Redistribute-to-the-Right Algorithm, 52

- 2.2. Self-Consistency, 52
 - Self-Consistency Algorithm, 56
- 2.3. Generalized Maximum Likelihood Estimator, 57
- 2.4. Consistency, 59
- 2.5. Asymptotic Normality, 63
- 3. Hazard Function Estimators, 65
 - Asymptotic Normality, 67
- 4. Robust Estimators, 69
 - 4.1. Mean, 70
 - 4.2. L-Estimators, 72
 - 4.3. M-Estimators, 73
 - 4.4. Median, 74
- 5. Bayes Estimators, 76
 - Empirical Bayes Estimators, 80
- 4. Nonparametric Methods: Two Samples 81
 - Example. Hypothetical Clinical Trial, 82
 - 1. Gehan test, 82
 - 1.1. Mean and Variance of U , 85
 - 1.2. Mantel Computational Form for $\text{Var}_{0,P}^*(U)$, 87
 - 1.3. Example, 88
 - 1.4. Variance Under H_0 , 89
 - 2. Mantel-Haenszel Test, 94
 - 2.1. Single 2×2 Table, 94
 - 2.2. Sequence of 2×2 Tables, 96
 - 2.3. Example, 98
 - 2.4. Asymptotic Normality, 101
 - 3. Tarone-Ware Class of Tests, 103
 - Example, 104
 - 4. Efron Test, 105

5.	<u>Nonparametric Methods: K Samples</u>	107
1.	Generalized Gehan Test (Breslow), 107	
	Types of Tests, 109	
1.1.	Permutation Covariance Matrix, 112	
1.2.	Distribution Under H_0 , 113	
2.	Generalized Mantel-Haenszel Test (Tarone and Ware), 114	
	Types of Tests, 116	
6.	<u>Nonparametric Methods: Regression</u>	119
1.	Cox Proportional Hazards Model, 119	
1.1.	Conditional Likelihood Analysis, 122	
1.2.	Justification of the Conditional Likelihood, 127	
	Marginal Likelihood for Ranks, 127	
	Partial Likelihood, 130	
1.3.	Justification of Asymptotic Normality, 132	
1.4.	Estimation of $S(t; \mathbf{x})$, 133	
1.5.	Discrete or Grouped Data, 136	
1.6.	Time Dependent Covariates, 139	
1.7.	Example 1. Stanford Heart Transplant Data, 140	
1.8.	Example 2. Adoption and Pregnancy, 141	
2.	Linear Models, 141	
	Accelerated Time Models, 142	
2.1.	Linear Rank Tests, 143	
2.2.	Least Squares Estimators, 146	
	Miller Estimators, 146	
	Buckley-James Estimator, 150	
	Koul-Susarla-Van Ryzin Estimator, 154	

Example. Stanford Heart
Transplant Data, 155

7.	<u>Goodness of Fit</u>	164
1.	Graphical Methods, 164	
1.1.	One Sample, 165	
1.2.	Two to K Samples, 167	
	Example. DNCB Study, 168	
1.3.	Regression, 168	
2.	Tests, 172	
2.1.	One Sample, 172	
2.2.	Regression, 175	
8.	<u>Miscellaneous Topics</u>	176
1.	Bivariate Kaplan-Meier Estimator, 176	
2.	Competing Risks, 177	
3.	Dependent Censoring, 179	
4.	Jackknifing and Bootstrapping, 180	
9.	<u>Problems</u>	183
	<u>References</u>	213
	<u>Index</u>	231
