<b>Preface</b>	<b>xiii</b>
<b>One</b>	
<b>The Equation of a Straight Line</b>	<b>1</b>
1.1 Introduction	2
1.2 The Equation of a Straight Line	2
1.3 Graph of $Y = a + bX$	3
1.4 The Slope and Intercept of a Straight Line	4
1.5 Positive and Negative Relationships	5
Exercises	5
<b>Two</b>	
<b>The Regression Line of <math>Y</math> on <math>X</math></b>	<b>9</b>
2.1 Introduction	10
2.2 The Mean and Variance of a Variable	10
2.3 Finding the Values of $a$ and $b$ in the Regression Equation	13
2.4 The Covariance	16
2.5 The Residual and Regression Sums of Squares	17
2.6 The Residual Variance and Standard Error of Estimate	20
Exercises	21
<b>Three</b>	
<b>Correlation and Regression</b>	<b>23</b>
3.1 Introduction	24
3.2 The Correlation Coefficient	25
3.3 Formulas for the Correlation Coefficient	26
3.4 The Regression of $Y$ on $X$	26
3.5 The Residual Variance and Standard Error of Estimate	28
3.6 The Regression of $X$ on $Y$	28
3.7 The Two Regression Lines	29
3.8 Correlation and Regression Coefficients	30
3.9 Correlation and the Residual Sum of Squares	31
3.10 Correlation and the Regression Sum of Squares	32
3.11 Coefficients of Determination and Nondetermination	32
Exercises	33

<b>Four</b>		
<b>Factors Influencing the Magnitude of the Correlation Coefficient</b>		<b>35</b>
4.1	The Shapes of the $X$ and $Y$ Distributions	36
4.2	Correlation Coefficients Based on Small Samples	38
4.3	Combining Several Different Samples	39
4.4	Restriction of Range	42
4.5	Nonlinearity of Regression	43
4.6	Correlation with a Third Variable: Partial Correlation	43
4.7	Random Errors of Measurement	45
	Exercises	45
<b>Five</b>		
<b>Special Cases of the Correlation Coefficient</b>		<b>49</b>
5.1	Introduction	50
5.2	The Phi Coefficient	50
5.3	Range of $r$ for Dichotomous Variables	54
5.4	The Point Biserial Coefficient	54
5.5	The Rank Order Correlation Coefficient	58
5.6	The Variance and Standard Deviation of the Difference between Two Independent Variables	61
	Exercises	61
<b>Six</b>		
<b>Tests of Significance for Correlation Coefficients</b>		<b>65</b>
6.1	Introduction	66
6.2	Tests of Significance	66
6.3	Sampling Distribution of the Correlation Coefficient	67
6.4	Test of the Null Hypothesis $\rho = 0$	68
6.5	Table of Significant Values of $r$	68
6.6	The $z_r$ Transformation for $r$	70
6.7	Establishing a Confidence Interval for $\rho$	71
6.8	Test of Significance of the Difference between $r_1$ and $r_2$	72
6.9	The $\chi^2$ Test for the Difference between $r_1$ and $r_2$	74
6.10	Test for Homogeneity of Several Values of $r$	74
6.11	Test of Significance of a Partial Correlation Coefficient: $r_{12.3}$	76
	Exercises	76

## Seven

**Tests of Significance for Special Cases  
of the Correlation Coefficient** **77**

7.1	Introduction	78
7.2	Test of Significance for the Phi Coefficient	78
7.3	The $t$ Test of Significance for the Point Biserial Coefficient	81
7.4	The $F$ Test of Significance for the Point Biserial Coefficient	83
7.5	Test of Significance for the Rank Order Correlation Coefficient	84
	Exercises	85

## Eight

**Tests of Significance for Regression Coefficients** **87**

8.1	Introduction	88
8.2	Test of the Null Hypothesis that $\beta = 0$	88
8.3	Test of the Null Hypothesis that $\beta_1 - \beta_2 = 0$	91
8.4	Test for Homogeneity of Several Independent Values of $b$	93
	Exercises	95

## Nine

**Multiple Correlation and Regression** **97**

9.1	Introduction	98
9.2	Calculating the Values of $b_1$ and $b_2$ for a Three-Variable Problem	98
9.3	A Numerical Example of a Three-Variable Problem	99
9.4	Partitioning the Total Sum of Squares into the Regression and Residual Sums of Squares	100
9.5	The Multiple Correlation Coefficient	101
9.6	Tests of Significance for $R^2_{Y'}$	102
9.7	Conditional Tests of Significance	103
9.8	Semipartial Correlations and Multiple Correlation	105
9.9	Multiple Correlation When the $X$ Variables Are Mutually Orthogonal	108
	Exercises	109

## Ten

**A Little Bit About Matrices and Matrix Algebra** **111**

10.1	Introduction	112
10.2	Addition and Subtraction of Matrices	112

10.3	Matrix Multiplication	113
10.4	The Matrix Product $X'X$	114
10.5	The Inverse of a Matrix	115
10.6	Least Squares Solution in Multiple Regression	116
	Exercises	118

## **Eleven** **Multiple Regression: The General Case** **121**

11.1	Introduction	122
11.2	Calculation of $\mathbf{b}$	122
11.3	Calculation of $SS_{reg}$ and $SS_{res}$	124
11.4	Calculating $R^2_{YY}$ and a Test of Significance of $R^2_{YY}$	124
11.5	Standard Errors of the Regression Coefficients	125
11.6	Correlations among the $X$ Variables	126
11.7	Adjusted $R^2_{YY}$	126
11.8	Package Programs and Computer Output	127
11.9	Semipartial Correlations	128
11.10	Selecting $X$ Variables for Prediction of $Y$	130
	Exercises	132

## **Twelve** **Multiple Regression and Standardized Variables** **135**

12.1	Standardized Variables	136
12.2	The Regression Equation and $R^2_{YY}$	137
12.3	Matrix Calculations	138
12.4	Calculating $R^2_{Y_{123}}$	139
12.5	The Undstandardized Regression Coefficients	139
12.6	Calculating $R^2_i$	139
12.7	Standard Errors of the Standardized Regression Coefficients	140
	Exercises	141

## **Thirteen** **Multiple Regression with Dummy and Effect Coding** **143**

13.1	Introduction	144
13.2	The Analysis of Variance for $k$ Groups	144
13.3	Multiple Regression Analysis for $k$ Groups with Dummy Coding	146
13.4	Multiple Regression Analysis for $k$ Groups with Effect Coding	149
13.5	Effect Coding with Unequal $n_i$ 's	152
	Exercises	153

<b>Fourteen</b>		
<b>Tests for the Trend of a Set of <math>k</math> Sample Means</b>		<b>157</b>
14.1	Introduction	158
14.2	Coefficients for Orthogonal Polynomials	159
14.3	The Analysis of Variance for $k = 5$ Values of $X$	160
14.4	Components of the Trend	163
14.5	The Linear Component and a Test of Significance	164
14.6	The Quadratic Component and a Test of Significance	165
14.7	The Cubic Component and a Test of Significance	167
14.8	The Quartic Component and a Test of Significance	168
14.9	Correlations of $\bar{Y}_i$ with the Orthogonal Coefficients	169
14.10	Correlation Coefficient of $\bar{Y}_i$ with $\bar{Y}_i$	169
14.11	Multiple Regression with Orthogonal Variables	170
	Exercises	173
<b>Answers to Selected Exercises</b>		<b>175</b>
<b>Appendix</b>		<b>183</b>
Table I	Areas and Ordinates of the Normal Curve in Terms of $Z = (X - \mu)/\sigma$	184
Table II	Table of $\chi^2$	192
Table III	Table of $t$	193
Table IV	Values of the Correlation Coefficient for Various Levels of Significance	196
Table V	Table of Values of $z_r = \frac{1}{2} [\log_e(1 + r) - \log_e(1 - r)]$	197
Table VI	Values of $F$ Significant with $\alpha = .05$ and $\alpha = .01$	198
Table VII	Values of the Rank Order Correlation Coefficient for Various Levels of Significance	201
Table VIII	Table of Coefficients for Orthogonal Polynomials	202
<b>Index</b>		<b>203</b>
