

CONTENTS

SECTION 1. NORMAL DISTRIBUTION

1.1	The Normal Distribution and Related Functions	1
1.2	Inverse of the Normal Probability Distribution	11
1.3	Extreme Values of the Normal Distribution and Mill's Ratio	13
1.4	Inverse of the Normal Probability Distribution with Probability in Multiples of One-Half	14
1.5	Operating Characteristics for the Test of a Mean for a Normal Distribution with Standard Deviation Known	17
1.6	Graphs of Sample Sizes Needed for a Test on the Mean of a Normal Distribution with Known Standard Deviation	19
1.7	Graphs of Sample Sizes Needed for a Test Comparing the Means of Two Normal Distributions with Known and Equal Standard Deviations	23

SECTION 2. STUDENT'S t -DISTRIBUTION

2.1	Critical Values for Student's t -Distribution	27
2.2	Graphs of the Operating Characteristic of Student's t -Test	31
2.3	Graphs of Sample Sizes Needed for a Test on the Mean of a Normal Distribution with Unknown Standard Deviation	36
2.4	Graphs of Sample Sizes Needed for a Test Comparing the Means of Two Normal Distributions with Unknown, but Equal, Standard Deviations	41
2.5	Approximate Sample Size for Design of Experiments	46

SECTION 3. CHI-SQUARE DISTRIBUTION

3.1	Critical Values for the Chi-Square Distribution	49
3.2	Operating Characteristics for the Tests on a Standard Deviation σ against a Standard Value σ_0 Based on a 5-Percent Significance Level	56
3.3	Factors λ for Determining Sample Size for Bounds on the End-points of Confidence Intervals on a Standard Deviation from a Normal Distribution	58
3.4	Critical Values of the Noncentral Chi-Square Distribution	60

SECTION 4. F-DISTRIBUTION AND MULTIPLE COMPARISON

4.1	Critical Values of the F -Distribution	63
4.2	Graphs of the Power of the F -Test	88
4.3	Critical Values for the Maximum F -Ratio	100
4.4	Critical Values for a Multiple Comparison Test Between p Treatment Means and a Control	102
4.5	Critical Values of the Duncan Multiple-Range Test	105

SECTION 5. NONCENTRAL t AND TOLERANCE LIMITS

5.1	Factors for Computing Critical Values of the Noncentral t -Distribution	108
5.2	Factors for Computing the Noncentrality Parameter of the Noncentral t -Distribution	113
5.3	One-Sided Tolerance Limit Factors for a Normal Distribution	117
5.4	Two-Sided Tolerance Limit Factors for a Normal Distribution	127

SECTION 6. RANGE, STUDENTIZED RANGE, AND MEAN SQUARE SUCCESSIVE DIFFERENCE

6.1	Critical Values of the Sample Range from a Normal Distribution	138
6.2	Moments of the Range of a Normal Distribution	140
6.3	Critical Values for the G-Test for Testing the Deviation of the Sample Mean from a Preassigned Value Using the Sample Range	141
6.4	Critical Values for the G-Test for Testing the Significance of the Difference Between the Means of Two Samples of Equal Size	143
6.5	Critical Values of the Studentized Range from a Normal Distribution	144
6.6	Critical Values of the Ratio of the Mean Square Successive Difference to the Sample Variance	149

SECTION 7. ORDER STATISTICS FROM THE NORMAL DISTRIBUTION

7.1	Expected Values of Order Statistics from a Normal Distribution	151
7.2	Estimates of the Mean and Standard Deviation in Censored Samples from a Normal Distribution	155
7.3	Variances and Covariances of Order Statistics in Samples up to 20 from a Normal Population	163

SECTION 8. MULTIVARIATE NORMAL AND t -DISTRIBUTIONS

8.1	Critical Values for the Circular Normal Distribution	170
8.2	Offset Circle Probabilities for the Circular Normal Distribution	172
8.3	Distribution of a Quadratic Form in Two Dimensions	181
8.4	Inverse of the Distribution of a Quadratic Form in Two Dimensions	183
8.5	A Function for Computing Bivariate Normal Probabilities	184
8.6	Critical Values for the Spherical Normal Distribution	202
8.7	Distribution of a Quadratic Form in Three Dimensions	204
8.8	Inverse of the Distribution of a Quadratic Form in Three Dimensions	206
8.9	A Function for Computing Trivariate Normal Probabilities	207
8.10	The Maximum of a p -Dimensional Normal Distribution with All Correlations Equal to 0, $\frac{1}{4}$, or $\frac{1}{2}$	225
8.11	The Maximum of a p -Dimensional Normal Distribution with All Correlations Equal to $1/[1 + \sqrt{p}]$	230
8.12	Means and Standard Deviations for the Maximum of a p -Dimensional Normal Distribution with Correlations Equal to 0, $\frac{1}{4}$, $\frac{1}{2}$, or $1/[1 + \sqrt{p}]$	233
8.13	Critical Values for Testing the General Linear Hypothesis	235
8.14	Graphs of Some Upper Percentage Points of the Distribution of the Largest Characteristic Root	237
8.15	Critical Values of a Bivariate t -Distribution with $\rho = \pm 0.5$	250

SECTION 9. LOGISTIC, POISSON, AND BINOMIAL DISTRIBUTIONS

9.1	The Logistic Probability Distribution	254
9.2	Inverse of the Logistic Probability Distribution	257
9.3	The Cumulative Poisson Distribution	259
9.4	Upper Confidence Limits for the Expectation λ of a Poisson Variable with Small Observed Frequency	262
9.5	The Cumulative Binomial Distribution	264
9.6	Confidence Limits on a Proportion	273
9.7	Confidence Limits on Functions of Binomial Parameters	286
9.8	Arcsine Transformation of 0 or 1 Observed Values	293
9.9	Transformation of a Proportion p to $\phi = 2 \arcsin \sqrt{p}$	296
9.10	Inverse Hyperbolic Sine Transformation	304
9.11	Values of ψ' for Use with the Inverse Hyperbolic Sine Transformation	306

CONTENTS

9.12	Inverse of the Double Exponential Extreme Value Distribution	307
9.13	The Borel-Tanner Cumulative Distribution	310

SECTION 10. NONPARAMETRIC TOLERANCE LIMITS

10.1	Sample Sizes for One-Sided Nonparametric Tolerance Limits	317
10.2	Values of $1 - (1 - \gamma)^{1/n}$	319
10.3	Sample Sizes for Two-Sided Nonparametric Tolerance Limits	321
10.4	Values of $\delta(\lambda, \gamma)$ for Determining Sample Sizes for the Birnbaum-McCarty Distribution-Free Upper Confidence Bound for $p = \Pr \{Y < X\}$	322
10.5	Sample Sizes for the Birnbaum-McCarty Distribution-Free Upper Confidence Bound for $p = \Pr \{Y < X\}$ for Equal Size Samples	324

SECTION 11. WILCOXON (MANN-WHITNEY) TESTS

11.1	Cumulative Probabilities for the Wilcoxon Matched Pair Signed Rank Test	325
11.2	Exact Cumulative Frequencies for the Wilcoxon (Mann-Whitney) Two-Sample Statistic	331
11.3	Cumulative Probability Distribution for the Wilcoxon (Mann-Whitney) Two-Sample Rank Test	340
11.4	Critical Values for the Wilcoxon (Mann-Whitney) Two-Sample Statistic	349
11.5	Exact Critical Values for a Nonparametric Sum of Ranks Procedure for Relative Spread in Unpaired Samples (also Wilcoxon's Two-Sample Statistic)	354

SECTION 12. SIGN, RUNS, AND QUADRANT TESTS

12.1	Critical Values for the Sign Test and Distribution-Free Confidence Limits on the Median of a Population	362
12.2	Power of the Sign Test with a Two-Sided 5-Percent Significance Level	366
12.3	Distribution-Free Confidence Limits on the Quartiles of a Population	367
12.4	Critical Values for the Number-of-Runs Test for Equal-Size Samples	373
12.5	Critical Values for the Number-of-Runs Test	377
12.6	Fraction of Arrangements of n Numbers (No Two Alike) With Runs Up or Down of Length p or More	383

CONTENTS

12.7	Minimum Sample Sizes n such that the Probability Equals P that the Longest Run on Either Side of the Median Exceeds or Equals s	386
12.8	Minimum Sample Sizes n such that the Probability Equals P that the Longest Run on One Side of the Median Exceeds or Equals s	387
12.9	Minimum Sample Sizes n such that the Probability Equals P that the Longest Runs on Each Side of the Median Both Exceed or Equal s	388
12.10	Minimum Sample Sizes n such that the Probability Equals P that the Longest Runs on Each Side of any Cut Both Exceed or Equal s	389
12.11	Probability of r or Fewer Runs of Signs of First Differences in Ordered Series	390
12.12	Critical Values for Magnitudes of Quadrant Sums	392
12.13	Critical Values for Magnitudes of Octant Sums	393
12.14	Limiting Distribution of a Nonparametric Test of Independence	394
SECTION 13. RANK CORRELATION		
13.1	Exact Distribution of Kendall's Rank Correlation Coefficient	396
13.2	Exact Distribution of Spearman's Rank Correlation Coefficient	400
SECTION 14. NONPARAMETRIC ANALYSIS OF VARIANCE		
14.1	Exact Distribution of Friedman's Chi-Square Statistic	407
14.2	Kruskal-Wallis Distribution (Ranks in One Criterion Variance Analysis) for Three Samples, Each of Size Five or Less, in the Neighborhood of the 10-, 5-, and 1-Percent Points	420
SECTION 15. KOLMOGOROV-SMIRNOV STATISTICS		
15.1	Critical Values for the Kolmogorov-Smirnov One-Sample Statistic	423
15.2	Probability Distribution of the Kolmogorov-Smirnov One-Sample Statistic	426
15.3	Probability Distribution of the Kolmogorov-Smirnov One-Sided Two-Sample Statistic	431
15.4	Probability Distribution of the Kolmogorov-Smirnov Two-Sample Statistic	434
15.5	Probability Distribution of the Kolmogorov-Smirnov Three-Sample Statistic	437
15.6	Limiting Distribution of the Kolmogorov-Smirnov $D(n)$ Statistic	439
15.7	Limiting Distribution of the Statistic $\sqrt{n}[D^+(n) + D^-(n)]$	441

SECTION 16. CRAMÉR-VON MISES, AND RANDOM DIVISION OF AN INTERVAL DISTRIBUTION

16.1	Limiting Distribution of the Cramér-von Mises $n\omega^2$ Statistic	443
16.2	Sample Sizes Needed with a 5-Percent One-Sample Test Using $D^+(n)$, $\omega^2(n)$, $\omega'(n)$, and $\pi_1(2n)$ to Obtain a Power of 0.95	445
16.3	Critical Values of Sherman's Statistic for the Random Division of an Interval	447

SECTION 17. MATCHING AND MULTINOMIAL DISTRIBUTIONS

17.1	Probability of h or More Matches	449
17.2	Critical Points for the Number of Occupied Cells in the Multinomial Distribution with Equally Probable Cells	454

SECTION 18. HYPERGEOMETRIC DISTRIBUTION

18.1	The Hypergeometric Probability Distribution	458
18.2	Critical Values for Testing Two-by-Two Tables	479
18.3	Number of Cases Required for Comparing Two Proportions	497
18.4	Critical Values for a Nonparametric Test of Location	499
18.5	Critical Values for a Nonparametric Test of Dispersion	504

SECTION 19. PRODUCT MOMENT CORRELATION COEFFICIENT

19.1	Critical Values for the Product Moment Correlation Coefficient when $\rho = 0$	509
19.2	The Transformation $z = \tanh^{-1} r$ for the Correlation Coefficient	511
19.3	Critical Values for the Multiple Correlation Coefficient	513

SECTION 20. ORTHOGONAL POLYNOMIALS, RANDOM NUMBERS, AND CONSTANTS

20.1	Orthogonal Polynomials	515
20.2	Random Numbers	517
20.3	Special Constants	539
