|---|-----------|
| Preface .....   | iii       |
| Preface to the American Edition .....   | v         |
| Introduction .....  | 1         |
| <b>Chapter I. The multiple Laplace transformation, functions of several complex variables, and analytic sheaves .....</b> | <b>7</b>  |
| §1. The multiple Laplace transformation .....   | 7         |
| §2. Functions of several complex variables. Theorems yielding bounds .....  | 10        |
| §3. Ideals in rings of holomorphic functions. Analytic sheaves .....  | 17        |
| <b>Chapter II. Sufficient statistics and exponential families .....</b>   | <b>23</b> |
| §1. General information on sufficient statistics .....  | 23        |
| §2. Examples of sufficient statistics .....   | 27        |
| §3. Informational properties of sufficient statistics .....   | 32        |
| §4. Sufficient statistics for a repeated sample. Exponential families .....   | 35        |
| §5. Exponential families .....  | 41        |
| §6. Sufficient statistics and unbiased estimates .....  | 45        |
| <b>Chapter III. Nuisance parameters. Tests with invariant power functions .....</b>                                       | <b>49</b> |
| §1. Nuisance parameters .....   | 49        |
| §2. Tests with invariant power functions .....  | 51        |
| §3. Some results dealing with tests with invariant power functions .....  | 53        |
| §4. Stein's test .....  | 59        |
| <b>Chapter IV. Similar tests and statistics .....</b>   | <b>63</b> |
| §1. Similarity of tests and of statistics .....   | 63        |
| §2. Neyman structures. Lehmann's and Scheffé's theorems .....   | 66        |
| §3. Some methods of constructing similar zones .....  | 69        |
| §4. Approximately similar zones .....   | 78        |
| §5. Independent statistics .....  | 80        |

|  |     |
|--|-----|
| §6. Applications of a theorem of H. Cartan to the study of families of statistics .....  | 83  |
| <br>Chapter V. Cotent ideals for exponential families .....  | 89  |
| §1. Similar tests and cotent ideals .....  | 89  |
| §2. Statement of the problem for incomplete exponential families .....   | 92  |
| §3. Ideals of precotests .....   | 94  |
| §4. Application of Cartan's theorems .....   | 97  |
| §5. The behavior of smooth precotests .....  | 98  |
| §6. Smoothing of precotests .....  | 101 |
| §7. Formation of smooth precotests from a given one .....  | 104 |
| §8. Formulation of the final results. Examples .....   | 106 |
| <br>Chapter VI. Wijsman's <i>D</i> -method .....   | 117 |
| §1. The <i>D</i> -method and the conditions under which it can be applied .....  | 117 |
| §2. Examples of application of the <i>D</i> -method .....  | 119 |
| <br>Chapter VII. Unbiased estimates .....  | 125 |
| §1. Unbiased estimates for incomplete exponential families depending on sufficient statistics .....                                      | 125 |
| §2. On the behavior of the variance of unbiased estimates .....  | 127 |
| §3. A theorem of S. R. Rao on the inadmissibility of certain estimates ....  | 133 |
| <br>Chapter VIII. Analytical methods of studying unrandomized tests. Application to the Behrens-Fisher problem .....                     | 139 |
| §1. Questions of existence of unrandomized similar tests for incomplete exponential families .....                                       | 139 |
| §2. Statement of the problem of an unrandomized homogeneous similar test in the Behrens-Fisher problem .....                             | 142 |
| §3. Homogeneous Fisher-Welch-Wald tests .....  | 146 |
| §4. Lemmas on tangency of a test boundary to a critic .....  | 151 |
| §5. Completion of the proof of theorem 8.3.1. ....   | 166 |
| <br>Chapter IX. Randomized homogeneous tests in the Behrens-Fisher problem. Characterization of tests of the Bartlett-Scheffé type ..... | 167 |
| §1. Nonexistence of "null-regular" similar tests .....   | 167 |
| §2. Bartlett-Scheffé tests .....   | 178 |
| §3. A homogeneous randomized test associated with Bartlett's test .....  | 181 |
| §4. Characterization of tests of the Bartlett-Scheffé type .....   | 183 |

|  |     |
|--|-----|
| Chapter X. An unrandomized homogeneous similar test in the Behrens-Fisher problem .....                                | 193 |
| §1. Construction of an unrandomized test .....   | 193 |
| §2. The Romanovskii-Sudakov theorem .....  | 197 |
| Chapter XI. The problem of many small samples .....  | 204 |
| §1. Statement of the problem .....   | 204 |
| §2. A. A. Petrov's investigations .....  | 205 |
| Appendix .....   | 213 |
| Supplement. New results in the theory of estimation and testing hypotheses for problems with nuisance parameters ..... | 217 |
| §1. Invariant verification of functions which are polynomials in $\alpha$ and $1/\sigma^2$ for normal samples .....    | 217 |
| §2. The description of all cotests for a class of exponential families with polynomial relations .....                 | 226 |
| §3. Conditions of optimal unbiased estimation for incomplete exponential families with polynomial relations .....      | 232 |
| §4. The sample mean as the estimate of scale parameters .....  | 240 |
| §5. Nonparametric approach to the estimation of location parameters .....  | 243 |
| Bibliography to the Appendix .....   | 249 |
| Bibliography .....   | 251 |
