

CONTENTS

	PAGE
INTRODUCTION	1
<p style="margin-left: 2em;">Man and his surroundings, Nature or Objective World, Physical, Biological World, Space and Time, Matter and Radiation, Experimental and Theoretical Physics, Statistical Physics, Bose and other Statistics, their Importances.</p>	
SCIENTIFIC EPISTEMOLOGY	3
<p style="margin-left: 2em;">What is Science? How is it to be developed? Rules for Scientific Pursuits.</p>	
PRELIMINARIES : PHYSICS OF MATTER	6
<p style="margin-left: 2em;">Primitive Man ; Mechanical Instruments and their Developments, Mechanics ; Fire and its Use ; Theory of Heat ; Progress of Civilisation ; Steam-Engine and its impact on civilisation ; Revolution in Industrial Development ; Thermodynamics.</p>	
PRELIMINARIES : PHYSICS OF RADIATION	10
<p style="margin-left: 2em;">Laws of Optics, Corpuscular Theory ; Spectrum, Interference, Diffraction, Polarisation ; Wave Theory ; Heat Radiation ; Electromagnetic Waves ; Radiation ; Thermodynamics of Radiation ; Wien's formula ; Wien's Displacement Law.</p>	
MOLECULAR THEORY OF MATTER	13
<p style="margin-left: 2em;">Main Ideas, Physical Background, Present Form.</p>	
STATISTICAL MECHANICS OF MATTER	16
<p style="margin-left: 2em;">Necessity, Main Ideas, Its Form in the First Quarter of this Century.</p>	
STATISTICAL MECHANICS AND RADIATION	19
<p style="margin-left: 2em;">Rayleigh-Jeans Law, Wien's Law.</p>	
PLANCK'S QUANTUM HYPOTHESIS AND QUANTUM THEORY	20
<p style="margin-left: 2em;">Planck's quantum hypothesis, Planck's law for Black-Body Radiation, Einstein's Theory of Photo-electric Effect. Theory of Crystals of Einstein and of Debye, Bohr's Theory of Atom, Compton Effect, De Broglie's Wave.</p>	
PLANCK'S LAW : DIFFERENT DERIVATIONS	26
<p style="margin-left: 2em;">Planck's Derivations, Debye's Derivation, Einstein's Derivation.</p>	
SOME INTERESTING INFORMATION ABOUT BOSE'S PAPERS—I & II	27
<p style="margin-left: 2em;">Publications, Some General Features</p>	

	PAGE
ELEGANCE AND SIGNIFICANCE OF BOSE'S POINT OF VIEW Gibbs' view, Boltzmann's hypothesis, States-statistics, epistemological significance.	30
BOSE'S METHOD FOR DERIVATION OF THE PLANCK'S ... LAW : BOSE STATISTICS Preliminary Remarks, Basic Ideas, Derivation, Bose Statistics.	34
IMPORTANCE OF BOSE'S PAPER-I Critical comments on the Basis of Classical Mechanics ; Necessity of Formulation of Special Theory of Relativity, and its importance ; Importance of Bose's Paper-I.	37
OTHER STATISTICS OF PHYSICS Maxwell-Boltzmann, Bose, Bose-Einstein, Fermi-Dirac, Gentile and other (Dutta) Statistics.	40
IMPACT OF BOSE'S WORK ON PHYSICS Development of Quantum Mechanics, Spin and Statistics, Boson and Fermion, Boson Astronomy.	40
BOSE-GAS AND ITS PROPERTIES Degeneracy, Characteristic Thermodynamic Properties ; Bose Condensation, Peculiarities of Liquid Helium, Superfluidity ; Abundance of Elements in the Universe ; Fluctuation, The Formula, Significance ; Relativistic Generalisation, Necessity and applications.	46
BOSE'S PAPER-II : CONTENTS, CRITICAL COMMENTS Subject Matter, Derivation of Planck's Law, Matter-Radiation Interaction, Einstein's Comments, General Comments.	49
CONCLUDING REMARKS	56
BIBLIOGRAPHY	58
APPENDIX (NOTES AND COMMENTS)	61
